

## Contents – Part II

### Poster Papers: Economics, Science of Success, and Education

|   |    |
|---|----|
| Mobile Social Media and Academic Performance . . . . .  | 3  |
| <i>Fausto Giunchiglia, Mattia Zeni, Elisa Gobbi, Enrico Bignotti,<br/>and Ivano Bison</i>                                 |    |
| Towards Real-Time Prediction of Unemployment and Profession . . . . .   | 14 |
| <i>Pål Sundsøy, Johannes Bjelland, Bjørn-Atle Reme, Eaman Jahani,<br/>Erik Wetter, and Linus Bengtsson</i>                |    |
| The Digital Flynn Effect: Complexity of Posts on Social Media<br>Increases over Time . . . . .                            | 24 |
| <i>Ivan Smirnov</i>   |    |
| An Exploration of Wikipedia Data as a Measure of Regional<br>Knowledge Distribution . . . . .                             | 31 |
| <i>Fabian Stephany and Fabian Braesemann</i>  |    |
| Differential Network Effects on Economic Outcomes:<br>A Structural Perspective. . . . .                                   | 41 |
| <i>Eaman Jahani, Guillaume Saint-Jacques, Pål Sundsøy,<br/>Johannes Bjelland, Esteban Moro, and Alex ‘Sandy’ Pentland</i> |    |

### Poster Papers: Health and Behaviour

|   |    |
|---|----|
| Stance Classification in Out-of-Domain Rumours: A Case Study<br>Around Mental Health Disorders. . . . .                             | 53 |
| <i>Ahmet Aker, Arkaitz Zubiaga, Kalina Bontcheva, Anna Kolliakou,<br/>Rob Procter, and Maria Liakata</i>                            |    |
| Predicting Multiple Risky Behaviors via Multimedia Content . . . . .  | 65 |
| <i>Yiheng Zhou, Jingyao Zhan, and Jiebo Luo</i>   |    |
| On the Role of Political Affiliation in Human Perception The Case<br>of Delhi OddEven Experiment . . . . .                          | 74 |
| <i>Tahar Zanouda, Sofiane Abbar, Laure Berti-Equille, Kushal Shah,<br/>Abdelkader Baggag, Sanjay Chawla, and Jaideep Srivastava</i> |    |
| Discovering the Typing Behaviour of Parkinson’s Patients<br>Using Topic Models . . . . .  | 89 |
| <i>Antony Milne, Mihalios Nicolaou, and Katayoun Farrahi</i>  |    |

**Poster Papers: Network Science**

|   |     |
|---|-----|
| Effects of Contact Network Models on Stochastic Epidemic Simulations . . . .  | 101 |
| <i>Rehan Ahmad and Kevin S. Xu</i>  |     |
| From Relational Data to Graphs: Inferring Significant Links<br>Using Generalized Hypergeometric Ensembles . . . . . | 111 |
| <i>Giona Casiraghi, Vahan Nanumyan, Ingo Scholtes,<br/>and Frank Schweitzer</i>                                     |     |
| DepthRank: Exploiting Temporality to Uncover Important Network Nodes. . .   | 121 |
| <i>Nikolaos Bastas, Theodoros Semertzidis, and Petros Daras</i>   |     |

**Poster Papers: News, Misinformation, and Collective Sensemaking**

|   |     |
|---|-----|
| On Early-Stage Debunking Rumors on Twitter: Leveraging<br>the Wisdom of Weak Learners . . . . .   | 141 |
| <i>Tu Ngoc Nguyen, Cheng Li, and Claudia Niederée</i>   |     |
| Convergence of Media Attention Across 129 Countries . . . . .   | 159 |
| <i>Jisun An, Hassan Aldarbesti, and Haewoon Kwak</i>  |     |
| Attention Please! Exploring Attention Management on Wikipedia<br>in the Context of the Ukrainian Crisis . . . . .   | 169 |
| <i>Jon Roozenbeek and Mariia Terentieva</i>   |     |
| I Read It on Reddit: Exploring the Role of Online Communities<br>in the 2016 US Elections News Cycle . . . . .  | 192 |
| <i>Jon Roozenbeek and Adrià Salvador Palau</i>  |     |
| How do eyewitness social media reports reflect socio-economic effects<br>of natural hazards? . . . . .  | 221 |
| <i>Nataliya Tkachenko, Rob Procter, and Stephen Jarvis</i>  |     |
| What Can Software Tell Us About Media Coverage and Public Opinion?<br>An Analysis of Political News Posts and Audience Comments<br>on Facebook by Computerised Method . . . . . | 230 |
| <i>Yunya Song and Yin Zhang</i>   |     |

**Poster Papers: Opinions, Behavior, and Social Media Mining**

|  |     |
|--|-----|
| GitHub and Stack Overflow: Analyzing Developer Interests Across<br>Multiple Social Collaborative Platforms . . . . . | 245 |
| <i>Roy Ka-Wei Lee and David Lo</i>   |     |
| How Are Social Influencers Connected in Instagram? . . . . .   | 257 |
| <i>Seungbae Kim, Jinyoung Han, Seunghyun Yoo, and Mario Gerla</i>  |     |

|  |     |
|--|-----|
| Affinity Groups: A Linguistic Analysis for Social Network<br>Groups Identification . . . . .   | 265 |
| <i>Jonathan Mendieta, Gabriela Baquerizo, Mónica Villavicencio,<br/>and Carmen Vaca</i>  |     |
| Deliberative Platform Design: The Case Study of the Online Discussions<br>in Decidim Barcelona . . . . .   | 277 |
| <i>Pablo Aragón, Andreas Kaltenbrunner, Antonio Calleja-López,<br/>Andrés Pereira, Arnau Monterde, Xabier E. Barandiaran,<br/>and Vicenç Gómez</i> |     |
| Computational Controversy . . . . .  | 288 |
| <i>Benjamin Timmermans, Tobias Kuhn, Kaspar Beelen, and Lora Aroyo</i>   |     |
| Evaluative Patterns and Incentives in YouTube . . . . .  | 301 |
| <i>David Garcia, Adiya Abisheva, and Frank Schweitzer</i>  |     |
| Beyond the Culture Effect on Credibility Perception on Microblogs . . . . .  | 316 |
| <i>Suliman Aladhadh, Xiuzhen Zhang, and Mark Sanderson</i>   |     |
| Twigraph: Discovering and Visualizing Influential Words<br>Between Twitter Profiles . . . . .  | 329 |
| <i>Dhanasekar Sundararaman and Sudharshan Srinivasan</i>   |     |
| An Exploratory Study on the Influence of Guidelines<br>on Crowdfunding Projects in the Ethereum Blockchain Platform . . . . .                      | 347 |
| <i>Vanessa Bracamonte and Hitoshi Okada</i>  |     |
| Lost in Re-Election: A Tale of Two Spanish Online Campaigns . . . . .  | 355 |
| <i>Helena Gallego, David Laniado, Andreas Kaltenbrunner,<br/>Vicenç Gómez, and Pablo Aragón</i>  |     |
| Beyond Item Recommendation: Using Recommendations to Stimulate<br>Knowledge Sharing in Group Decisions . . . . .                                   | 368 |
| <i>Müslim Atas, Alexander Felfernig, Martin Stettinger,<br/>and Thi Ngoc Trang Tran</i>  |     |
| A Hierarchical Topic Modelling Approach for Tweet Clustering . . . . .   | 378 |
| <i>Bo Wang, Maria Liakata, Arkaitz Zubiaga, and Rob Procter</i>  |     |
| Combining Network and Language Indicators for Tracking<br>Conflict Intensity . . . . .   | 391 |
| <i>Anna Rumshisky, Mikhail Gronas, Peter Potash, Mikhail Dubov,<br/>Alexey Romanov, Saurabh Kulshreshtha, and Alex Gribov</i>                      |     |
| Like Trainer, Like Bot? Inheritance of Bias in Algorithmic<br>Content Moderation . . . . .   | 405 |
| <i>Reuben Binns, Michael Veale, Max Van Kleek, and Nigel Shadbolt</i>  |     |

**Poster Papers: Proximity, Location, Mobility, and Urban Analytics**

|   |     |
|---|-----|
| Modeling and Managing Airport Passenger Flow Under Uncertainty:<br>A Case of Fukuoka Airport in Japan . . . . .                     | 419 |
| <i>Hiroaki Yamada, Kotaro Ohori, Tadashige Iwao, Akifumi Kira,<br/>Naoyuki Kamiyama, Hiroaki Yoshida, and Hirokazu Anai</i>         |     |
| When Internet Really Connects Across Space: Communities of Software<br>Developers in Vkontakte Social Networking Site . . . . .     | 431 |
| <i>Olessia Koltsova, Sergei Koltcov, and Yadviga Sinyavskaya</i>  |     |
| Inferring the Social-Connectedness of Locations from Mobility Data . . . . .  | 443 |
| <i>Tristan Brugman, Mitra Baratchi, Geert Heijenk, and Maarten van Steen</i>  |     |
| Towards Simulating Criminal Offender Movement Based on Insights<br>from Human Dynamics and Location-Based Social Networks . . . . . | 458 |
| <i>Raquel Rosés Brüngger, Robin Bader, Cristina Kadar,<br/>and Irena Pletikosa</i>  |     |

**Poster Papers: Security, Privacy, and Trust**

|   |     |
|---|-----|
| The Importance of Consent in User Comfort with Personalization . . . . .  | 469 |
| <i>Jennifer Golbeck</i>   |     |
| Nudging Nemo: Helping Users Control Linkability Across Social Networks . . .  | 477 |
| <i>Rishabh Kaushal, Srishti Chandok, Paridhi Jain, Prateek Dewan,<br/>Nalin Gupta, and Ponnurangam Kumaraguru</i>           |     |
| Mediated Behavioural Change in Human-Machine Networks:<br>Exploring Network Characteristics, Trust and Motivation . . . . . | 491 |
| <i>Paul Walland and J. Brian Pickering</i>  |     |
| Hunting Malicious Bots on Twitter: An Unsupervised Approach . . . . .   | 501 |
| <i>Zhouhan Chen, Rima S. Tanash, Richard Stoll,<br/>and Devika Subramanian</i>  |     |

**Poster Papers: Tools and Methods**

|   |     |
|---|-----|
| Exploratory Analysis of Big Social Data Using MIC/MINE Statistics . . . . .   | 513 |
| <i>Piyawat Lertvittayakumjorn, Chao Wu, Yue Liu, Hong Mi, and Yike Guo</i>  |     |
| Exploring Emerging Topics in Social Informatics: An Online Real-Time<br>Tool for Keyword Co-Occurrence Analysis . . . . . | 527 |
| <i>Florian Cech</i>   |     |
| Writer Profiling Without the Writer's Text . . . . .  | 537 |
| <i>David Jurgens, Yulia Tsvetkov, and Dan Jurafsky</i>  |     |

|                               |            |

# Contents – Part I

## Economics, Science of Success, and Education

|  |    |
|--|----|
| Simple Acoustic-Prosodic Models of Confidence and Likability<br>are Associated with Long-Term Funding Outcomes for Entrepreneurs . . . . .                     | 3  |
| <i>Natalie A. Carlson</i>  |    |
| ABCE: A Python Library for Economic Agent-Based Modeling . . . . .   | 17 |
| <i>Davoud Taghawi-Nejad, Rudy H. Tanin, R. Maria Del Rio Chanona,<br/>Adrián Carro, J. Doyne Farmer, Torsten Heinrich, Juan Sabuco,<br/>and Mika J. Straka</i> |    |
| The Dynamics of Professional Prestige in Fashion Industries of Europe<br>and the US: Network Approach . . . . .  | 31 |
| <i>Margarita Kuleva and Daria Maglevanaya</i>  |    |
| Matching Graduate Applicants with Faculty Members . . . . .  | 41 |
| <i>Shibamouli Lahiri, Carmen Banea, and Rada Mihalcea</i>  |    |

## Network science

|   |    |
|---|----|
| Why Groups Show Different Fairness Norms? The Interaction<br>Topology Might Explain . . . . . | 59 |
| <i>Mohsen Mosleh and Babak Heydari</i>  |    |
| Constrained Community Detection in Multiplex Networks . . . . .                               | 75 |
| <i>Koji Eguchi and Tsuyoshi Murata</i>  |    |

## News, Misinformation, and Collective Sensemaking

|  |     |
|--|-----|
| Seminar Users in the Arabic Twitter Sphere . . . . .   | 91  |
| <i>Kareem Darwish, Dimitar Alexandrov, Preslav Nakov,<br/>and Yelena Mejova</i>                                      |     |
| Exploiting Context for Rumour Detection in Social Media . . . . .  | 109 |
| <i>Arkaitz Zubiaga, Maria Liakata, and Rob Procter</i>   |     |
| Multidimensional Analysis of the News Consumption of Different<br>Demographic Groups on a Nationwide Scale . . . . . | 124 |
| <i>Jisun An and Haewoon Kwak</i>   |     |

|   |     |
|---|-----|
| Trump vs. Hillary: What Went Viral During the 2016<br>US Presidential Election. . . . .                             | 143 |
| <i>Kareem Darwish, Walid Magdy, and Tahar Zanouda</i>   |     |
| Understanding Online Political Networks: The Case of the Far-Right<br>and Far-Left in Greece. . . . .               | 162 |
| <i>Pantelis Agathangelou, Ioannis Katakis, Lamprini Rori,<br/>Dimitrios Gunopulos, and Barry Richards</i>           |     |
| Polarization in Blogging About the Paris Meeting on Climate Change. . . . .   | 178 |
| <i>Dag Elgesem</i>  |     |
| Event Analysis on the 2016 U.S. Presidential Election Using Social Media . . .                                      | 201 |
| <i>Tarrek A. Shaban, Lindsay Hexter, and Jinho D. Choi</i>  |     |
| Badly Evolved? Exploring Long-Surviving Suspicious Users on Twitter . . . .   | 218 |
| <i>Majid Alfifi and James Caverlee</i>  |     |
| <b>Opinions, Behavior, and Social Media Mining</b>  |     |
| Like at First Sight: Understanding User Engagement with the World<br>of Microvideos . . . . .                       | 237 |

| Compression-Based Algorithms for Deception Detection . . . . .  | 257 |
| <i>Christina L. Ting, Andrew N. Fisher, and Travis L. Bauer</i>   |     |
| ‘Dark Germany’: Hidden Patterns of Participation in Online Far-Right<br>Protests Against Refugee Housing. . . . .   | 277 |
| <i>Sebastian Schelter and Jérôme Kunegis</i>  |     |
| An Analysis of UK Policing Engagement via Social Media . . . . .  | 289 |
| <i>Miriam Fernandez, Tom Dickinson, and Harith Alani</i>  |     |
| What Makes a Good Collaborative Knowledge Graph:<br>Group Composition and Quality in Wikidata . . . . .             | 305 |
| <i>Alessandro Piscopo, Chris Phethean, and Elena Simperl</i>  |     |
| Multimodal Analysis and Prediction of Latent User Dimensions . . . . .  | 323 |
| <i>Laura Wendlandt, Rada Mihalcea, Ryan L. Boyd,<br/>and James W. Pennebaker</i>                                    |     |
| Characterizing Videos, Audience and Advertising in Youtube Channels<br>for Kids. . . . .                            | 341 |
| <i>Camila Souza Araújo, Gabriel Magno, Wagner Meira Jr.,<br/>Virgilio Almeida, Pedro Hartung, and Danilo Doneda</i> |     |

|   |     |
|---|-----|
| Comparing Influencers: Activity vs. Connectivity Measures in Defining Key Actors in Twitter <i>Ad Hoc</i> Discussions on Migrants in Germany and Russia . . . . . | 360 |
| <i>Svetlana S. Bodrunova, Anna A. Litvinenko, and Ivan S. Blekanov</i>  |     |
| The President on Twitter: A Characterization Study of @realDonaldTrump . . .  | 377 |
| <i>Brooke Auxier and Jennifer Golbeck</i>   |     |
| Social Networking Sites Withdrawal . . . . .  | 391 |
| <i>Carlos Osorio, Rob Wilson, and Savvas Papagiannidis</i>  |     |
| When <i>Follow</i> is Just One Click Away: Understanding Twitter <i>Follow</i> Behavior in the 2016 U.S. Presidential Election . . . . .                          | 409 |
| <i>Yu Wang, Jiebo Luo, and Xiyang Zhang</i>   |     |
| Inferring Spread of Readers' Emotion Affected by Online News . . . . .  | 426 |
| <i>Agus Sulistya, Ferdian Thung, and David Lo</i>   |     |
| How Polarized Have We Become? A Multimodal Classification of Trump Followers and Clinton Followers . . . . .  | 440 |
| <i>Yu Wang, Yang Feng, Zhe Hong, Ryan Berger, and Jiebo Luo</i>   |     |
| Can Cross-Lingual Information Cascades Be Predicted on Twitter? . . . . .   | 457 |
| <i>Hongshan Jin, Masashi Toyoda, and Naoki Yoshinaga</i>  |     |
| An Analysis of Individuals' Behavior Change in Online Groups . . . . .  | 473 |
| <i>David Jurgens, James McCorriston, and Derek Ruths</i>  |     |
| The Message or the Messenger? Inferring Virality and Diffusion Structure from Online Petition Signature Data. . . . .   | 499 |
| <i>Chi Ling Chan, Justin Lai, Bryan Hooi, and Todd Davies</i>   |     |
| <b>Proximity, Location, Mobility, and Urban Analytics</b>   |     |
| Measuring Ambient Population from Location-Based Social Networks to Describe Urban Crime . . . . .  | 521 |
| <i>Cristina Kadar, Raquel Rosés Brüngger, and Irena Pletikosa</i>   |     |
| Robust Modeling of Human Contact Networks Across Different Scales and Proximity-Sensing Techniques . . . . .  | 536 |
| <i>Michele Starnini, Bruno Lepri, Andrea Baronchelli, Alain Barrat, Ciro Cattuto, and Romualdo Pastor-Satorras</i>  |     |
| Personalized Recommendation of Points-of-Interest Based on Multilayer Local Community Detection . . . . .   | 552 |
| <i>Roberto Interdonato and Andrea Tagarelli</i>   |     |

Designing for Digital Inclusion: A Post-Hoc Evaluation  
of a Civic Technology . . . . . 572  
*Claudia López and Rosta Farzan*

**Security, Privacy, and Trust**

The Cognitive Heuristics Behind Disclosure Decisions. . . . . 591  
*Vincent Marmion, Felicity Bishop, David E. Millard,  
and Sarah V. Stevenage*

**Tools and Methods**

A Propagation-Based Method of Estimating Students’  
Concept Understanding . . . . . 611  
*Rafael López-García, Makoto P. Kato, and Katsumi Tanaka*

Seeds Buffering for Information Spreading Processes. . . . . 628  
*Jarosław Jankowski, Piotr Bródka, Radosław Michalski,  
and Przemysław Kazienko*
