1	A Tribute to Antoni Olivé on the Occasion of His Retirement	1
	Janis Bubenko, Colette Rolland and Arne Sølvberg	
2	30 Years of Contributions to Conceptual Modeling	7
	Jordi Cabot, Cristina Gómez, Maria-Ribera Sancho and Ernest Teniente	
2.1	Introduction	7
2.2	The Deductive Approach to Conceptual Modeling	8
2.3	Techniques for Deductive Conceptual Models	9
	2.3.1 Deductive Databases	10
	2.3.2 Deductive Conceptual Models	11
	2.3.3 Object-Oriented Deductive Conceptual Models	13
2.4	Object-Oriented Conceptual Schemas: definition and evolution . .	13
	2.4.1 Definition	13
	2.4.2 Evolution	16
2.5	Conceptual Schema-Centric Development	17
	2.5.1 Very large conceptual schemas	17
	2.5.2 Quality in modeling	19
2.6	Conclusions	20
3	Modeling Life: A Conceptual Schema-centric Approach to Understand the Genome	25
	Óscar Pastor López, Ana León Palacio, José Fabián Reyes Román and Juan Carlos Casamayor	
3.1	Introduction	26
3.2	Conceptual Schema of the Human Genome (CSHG)	29
3.3	SILE Methodology and Data Quality	32
	3.3.1 SILE Methodology	32
	3.3.2 Data Quality	35
3.4	Conclusions and Future Work	38

4	Strategic Reading & Conceptual Modeling	41
	Oscar Díaz	
4.1	Introduction	42
4.2	Student Reading Experience	43
4.3	Coupling MindMeister & Mendeley	45
4.3.1	The RCA tool: MindMeister	46
4.3.2	The reading tool: Mendeley	47
4.3.3	The coupling	48
4.4	DScaffolding at work	48
4.4.1	Conducting RCA	48
4.4.2	Setting RCA issues	49
4.4.3	Strategic Reading	50
4.4.4	Back to conducting RCA	51
4.5	Conclusions	52
5	Conceptual Modeling for Indicator Selection	55
	Alejandro Maté, Juan Trujillo and John Mylopoulos	
5.1	Introduction	56
5.2	Related Work	57
5.3	A Methodology for Eliciting and Selecting Business Indicators	59
5.3.1	Business Modeling and Indicator Metamodel	60
5.3.2	Analysis	62
5.3.3	Model Update	63
5.4	Case Study: Performance Indicators for Water Supply Management	64
5.5	Discussion and Limitations	66
5.6	Conclusions and Future Work	67
6	Conceptual Modeling in Accelerating Information Ingest into <i>Family Tree</i>	69
	David W. Embley, Stephen W. Liddle, Tanner S. Eastmond, Deryle W. Lonsdale, Joseph P. Price and Scott N. Woodfield	
6.1	Introduction	70
6.2	Fe6 Pipeline	72
6.2.1	Import Book	72
6.2.2	Run Extraction Tools	73
6.2.3	Merge Extracted Information	75
6.2.4	Check Quality	76
6.2.5	Enhance Data	77
6.2.6	Update Tree	78
6.3	Project Status	79
6.3.1	Human Oversight of Automated Updates	79
6.3.2	Pipeline Implementation	81
6.3.3	Initial Field Tests	81
6.4	Conclusions	82

7	Model Centered Architecture	85
	Heinrich C. Mayr, Judith Michael, Suneth Ranasinghe, Vladimir A. Shekhovtsov and Claudia Steinberger	
7.1	Introduction	86
7.1.1	Motivation	86
7.1.2	Related Work	86
7.1.3	The Paper's Aim	87
7.2	The Model Centered Perspective	88
7.2.1	Background: Models and Metamodels	88
7.2.2	MCA: The Concept	89
7.2.3	Running examples	91
7.3	Models in QuASE and HBMS	91
7.3.1	Models in QuASE	91
7.3.2	Models in HBMS	92
7.4	Model Centered Interfacing	95
7.4.1	Model Centered Interfacing in QuASE	95
7.4.2	Model Centered Activity Recognition Interface	96
7.4.3	Operating Instruction Integration	97
7.4.4	Model Centered User Interface	98
7.5	MCA: Patterns and Implementation Examples	99
7.5.1	Architectural Patterns for MCA solutions	99
7.5.2	Concrete MCA: Pattern Usage in Development Processes	100
7.6	Conclusions and Future Work	102
8	Design-time Models for Resiliency	105
	Andrea Marrella, Massimo Mecella, Barbara Pernici and Pierluigi Plebani	
8.1	Introduction	105
8.2	The Approach	106
8.3	Resiliency Scenarios	107
8.4	Modeling Processes and Data for Resiliency	108
8.4.1	Modeling Processes	108
8.4.2	Modeling Time Varying Information	111
8.5	Analyzing Resiliency Data Properties	112
8.6	Related Work	116
8.7	Conclusions and Future Work	117
9	Web System Development Using Polymorphic Widgets and Generic Schemas	121
	Scott Britell, Lois M. L. Delcambre and Paolo Atzeni	
9.1	Introduction	122
9.2	Background	123
9.3	Canonical Structures	127
9.3.1	Widgets	127
9.3.2	Mappings	130
9.3.3	Query Rewriting	131

9.4	Evaluation	131
9.5	Related Work	132
9.6	Conclusions	134
10	Model-Based Engineering for Database System Development	137
	Bernhard Thalheim	
10.1	Models in Computer Science and Computer Engineering	137
10.1.1	The Model	137
10.1.2	Multi-Model Modelling	138
10.1.3	Science and Engineering	139
10.1.4	Co-Models and Model Suites in CS&CE	140
10.1.5	Model-Based Engineering as Specific Model-Based Reasoning	141
10.1.6	The Objectives of the Paper	141
10.2	A Case Study for Structure-Representing Co-Models	142
10.2.1	Co-Models: Business Data Models and Conceptual Models	142
10.2.2	Co-Models: Conceptual Models and Logical Models	143
10.2.3	Co-Models: Conceptual Co-Design of Structuring and Functionality	144
10.2.4	Lessons Learned for Model-Based Engineering	144
10.3	The First Principle of Modelling	145
10.3.1	Logoi of Modelling	145
10.3.2	Scenarios and Resulting Functions of Models	146
10.4	Engineering for Vertical Co-Models	146
10.4.1	Database Development with Vertical Co-Models	146
10.4.2	Model-Based Engineering with Co-Models	147
10.5	Conceptual Models as Mediators Within a Model Suite	148
10.5.1	The Dichotomy of Description and Prescription for eER Models	149
10.5.2	Some Modelling Logos of ER Modelling	149
10.6	Conclusions	150
11	Quality Improvement of Conceptual UML and OCL Schemata through Model Validation and Verification	155
	Martin Gogolla and Khanh-Hoang Doan	
11.1	Introduction	155
11.2	Validation and Verification Use Cases	156
11.3	Use Cases Applied in a Conceptual Modeling Example	158
11.3.1	Model Consistency	162
11.3.2	Property Satisfiability	162
11.3.3	Constraint Independence	163
11.3.4	Partial Solution Completion	165
11.4	Related Work	165
11.5	Conclusions and Future Work	167

12	Creating Worlds with Words: Ontology-guided Conceptual Modeling for Institutional Domains	169
	Paul Johannesson, Maria Bergholtz and Owen Eriksson	
12.1	Introduction	170
12.2	Related Work	171
12.2.1	The Construction of Social Reality	171
12.2.2	The REA Ontology	171
12.2.3	Business Process Management	172
12.3	Research Setting and the Consultation Case	173
12.3.1	Research Setting	173
12.3.2	The Consultation Case	173
12.4	The Institutional Ontology	175
12.4.1	Institutional Rights	175
12.4.2	Institutional Entities	176
12.4.3	Rules and Institutional Functions	177
12.4.4	Institutional Processes	178
12.5	Domain Model for the Consultation Case	178
12.5.1	Institutional Subjects	179
12.5.2	Institutional Information and Informational Content	180
12.5.3	Rules and Institutional Functions	180
12.5.4	Institutional Rights and Institutional Contracts	181
12.5.5	Institutional Processes	181
12.6	Discussion and Conclusions	182
13	Quality of Conceptual Models in Model Driven Software Engineering	185
	John Krogstie	
13.1	Introduction	185
13.2	Quality of Models – The SEQUAL Framework	186
13.3	SEQUAL specialized for conceptual models used for model-driven software development	188
13.3.1	Physical Quality	190
13.3.2	Empirical quality	193
13.3.3	Syntactic quality	193
13.3.4	Semantic quality	194
13.3.5	Pragmatic quality	194
13.3.6	Social quality	195
13.3.7	Deontic quality	196
13.4	Conclusions	197
14	A Unified Conceptual Framework for Managing Services in the Web Oriented Architecture	199
	Devis Bianchini, Valeria De Antonellis and Michele Melchiori	
14.1	Introduction	200
14.2	Related Work	201
14.3	Multi-Perspective Conceptual Model	203

14.3.1	Motivations	203
14.3.2	Representation of data providing services	203
14.4	Model-based service search and ranking	206
14.4.1	Service request	207
14.4.2	Developers' credibility evaluation and ranking	208
14.4.3	Service selection and ranking	210
14.5	The WISeR system for service selection	211
14.6	Conclusions and Future Work	212
15	Handling the Evolution of Information Systems: An Overview of Challenges and Prospective Solutions	215
	Michel Léonard and Jolita Ralyté	
15.1	Introduction	215
15.2	A Service-Oriented Perspective to IS	216
15.2.1	Information Service	217
15.2.2	Information Services System	218
15.2.3	Designing Information Services Systems	219
15.3	IS Evolution Steering	222
15.4	A Framework for IS Evolution Steering	224
15.4.1	IS-SM	225
15.4.2	Evolution Metamodel	226
15.4.3	Ispace/Rspace	226
15.4.4	Evolution Steering Method	226
15.5	Conclusions	227
16	On Warehouses, Lakes, and Spaces: The Changing Role of Conceptual Modeling for Data Integration	231
	Matthias Jarke and Christoph Quix	
16.1	Introduction	231
16.2	Conceptual Model Formalization and Model Management for Data Warehouse Integration	233
16.3	Generic Modeling Languages for Heterogeneous Sources	235
16.3.1	Role-Based Generic Metamodeling	235
16.3.2	Generic Mappings	237
16.3.3	Conceptual Modeling and Integration for Data Lakes	238
16.4	Conclusions: From Data Lakes to Data Spaces	240
17	A Method for Emerging Technology Evaluation. Application to Blockchain and Smart Data Discovery	247
	Jacky Akoka and Isabelle Comyn-Wattiau	
17.1	Introduction	247
17.2	State of the Art	248
17.3	Our Approach	249
17.3.1	The Guiding Method	250
17.4	Application to Blockchain and Smart Data Discovery	252
17.4.1	The case of Blockchain (BC)	252

17.4.2	The case of Smart Data Discovery	253
17.4.3	Hierarchies' Comparison	256
17.5	Conclusions and Future Work	256
18	The Early Days of Entity-Relationship Modeling Retrospective on Dataid Project and Beyond	259
	Carlo Batini and Stefano Ceri	
18.1	Conceptual Modeling: An historical Perspective	259
18.2	DATAID	261
	18.2.1 The Method	261
18.3	Conceptual Design Book	264
18.4	Antoni Olivé	266

Conceptual Modeling Perspectives

Cabot, J.; Gómez, C.; Pastor, O.; Sancho, M.R.; Teniente,
E. (Eds.)

2017, XIII, 268 p. 94 illus., 63 illus. in color., Hardcover

ISBN: 978-3-319-67270-0
