

# Contents

Module Detection Based on Significant Shortest Paths for the Characterization of Gene Expression Data . . . . .	1
<i>Daniele Pepe</i>	
Information-Theoretic Active Contour Model for Microscopy Image Segmentation Using Texture . . . . .	12
<i>Veronica Biga and Daniel Coca</i>	
Host Phenotype Prediction from Differentially Abundant Microbes Using RoDEO . . . . .	27
<i>Anna Paola Carrieri, Niina Haiminen, and Laxmi Parida</i>	
DeepScope: Nonintrusive Whole Slide Saliency Annotation and Prediction from Pathologists at the Microscope . . . . .	42
<i>Andrew J. Schaumberg, S. Joseph Sirintrapun, Hikmat A. Al-Ahmadie, Peter J. Schüffler, and Thomas J. Fuchs</i>	
PLS-SEM Mediation Analysis of Gene-Expression Data for the Evaluation of a Drug Effect . . . . .	59
<i>Daniele Pepe and Tomasz Burzykowski</i>	
A Novel Algorithm for CpG Island Detection in Human Genome Based on Clustering and Chaotic Particle Swarm Optimization. . . . .	70
<i>Abdelbasset Boukelia, Zakaria Benmounah, Mohamed Batouche, Bouchera Maati, and Ikram Nekkache</i>	
COSYS: A Computational Infrastructure for Systems Biology . . . . .	82
<i>Fabio Cumbo, Marco S. Nobile, Chiara Damiani, Riccardo Colombo, Giancarlo Mauri, and Paolo Cazzaniga</i>	
Statistical Texture-Based Mapping of Cell Differentiation Under Microfluidic Flow . . . . .	93
<i>Veronica Biga, Olivia M. Alves Coelho, Paul J. Gokhale, James E. Mason, Eduardo M.A.M. Mendes, Peter W. Andrews, and Daniel Coca</i>	
Constraining Mechanism Based Simulations to Identify Ensembles of Parametrizations to Characterize Metabolic Features . . . . .	107
<i>Riccardo Colombo, Chiara Damiani, Giancarlo Mauri, and Dario Pescini</i>	

Process Algebra with Layers: Multi-scale Integration Modelling Applied to Cancer Therapy. . . . .	118
<i>Erin Scott, James Nicol, Jonathan Coulter, Andrew Hoyle, and Carron Shankland</i>	
A Problem-Driven Approach for Building a Bioinformatics GraphDB . . . . .	134
<i>Antonino Fiannaca, Massimo La Rosa, Laura La Paglia, Antonio Messina, Riccardo Rizzo, and Alfonso Urso</i>	
Parameter Inference in Differential Equation Models of Biopathways Using Time Warped Gradient Matching. . . . .	145
<i>Mu Niu, Simon Rogers, Maurizio Filippone, and Dirk Husmeier</i>	
IRIS-TCGA: An Information Retrieval and Integration System for Genomic Data of Cancer. . . . .	160
<i>Fabio Cumbo, Emanuel Weitschek, Paola Bertolazzi, and Giovanni Felici</i>	
Effect of UV Radiation on DPPG and DMPC Liposomes in Presence of Catechin Molecules. . . . .	172
<i>Filipa Pires, Gonçalo Magalhães-Mota, Paulo António Ribeiro, and Maria Raposo</i>	
Inference in a Partial Differential Equations Model of Pulmonary Arterial and Venous Blood Circulation Using Statistical Emulation . . . . .	184
<i>Umberto Noè, Weiwei Chen, Maurizio Filippone, Nicholas Hill, and Dirk Husmeier</i>	
Ensemble Approaches for Stable Assessment of Clusters in Microbiome Samples . . . . .	199
<i>Sanja Brdar and Vladimir Crnojević</i>	
Multilayer Data and Document Stratification for Comorbidity Analysis . . . . .	209
<i>Kevin Heffernan, Pietro Liò, and Simone Teufel</i>	
Evolving Dendritic Morphologies Highlight the Impact of Structured Synaptic Inputs on Neuronal Performance. . . . .	220
<i>Mohammad Ziyad Kagdi</i>	
Semantic Clustering for Identifying Overlapping Biological Communities . . .	235
<i>Hassan Mahmoud, Francesco Masulli, and Stefano Rovetta</i>	
<b>Author Index . . . . .</b>	<b>249</b>

Computational Intelligence Methods for Bioinformatics  
and Biostatistics

13th International Meeting, CIBB 2016, Stirling, UK,

September 1-3, 2016, Revised Selected Papers

Bracciali, A.; Caravagna, G.; Gilbert, D.; Tagliaferri, R.

(Eds.)

2017, XXII, 249 p. 98 illus., Softcover

ISBN: 978-3-319-67833-7
