1	Introduction	1
1.1	The Quantum Computer	1
1.2	Quantum Computation with Trapped Ions	2
1.3	Thesis Outline	3
	References	4
2	Trapped-Ion Qubits	5
2.1	The Calcium Ion as a Qubit	5
2.1.1	Photo-Ionisation	5
2.1.2	Doppler Cooling	6
2.1.3	The Qubit and Coherent Manipulations	6
2.1.4	Readout of the Qubit State	8
2.2	Linear Paul Traps	9
2.2.1	Micro-Motion Detection and Compensation	10
2.3	Motion of the Ions	11
2.3.1	Quantization of Motion	11
2.3.2	Coupling to the Motion	11
	References	13
3	Raman Interactions	15
3.1	The Raman Coupling	15
3.2	Rabi Frequencies and Light-Shifts	16
3.3	Photon Scattering	17
3.3.1	Raman Scattering	17
3.3.2	Rayleigh Scattering	18
3.3.3	Motional Decoherence from Scattering	18
3.4	Raman Transitions in $^{43}\text{Ca}^+$	19
3.4.1	Stretch Qubit	19
3.4.2	Low-Field Clock Qubit	20
3.4.3	Scaling of Raman Rates with Detuning	21

3.5	Scattering Experiments	22
3.5.1	Ratio of Scattering Rate to Light-Shift	22
3.5.2	Stretch Qubit Rayleigh Dephasing	24
	References	25
4	Two-Qubit Gate Theory	27
4.1	Introduction	27
4.2	The Geometric Phase Gate	28
4.3	The Light-Shift Gate	30
4.4	Sources of Error	32
4.4.1	Mis-Set Gate Detuning	33
4.4.2	Mis-Set Rabi Frequency	33
4.4.3	Unequal Illumination	33
4.4.4	Thermal Errors	34
4.4.5	Motional Heating	36
4.4.6	Motional Dephasing	37
4.4.7	Amplitude and Phase Noise	37
4.4.8	Motional Kerr Cross-Coupling	38
4.4.9	Spin Dephasing from Rayleigh Scattering	39
4.4.10	Raman Photon Scattering	39
4.4.11	Off-Resonant Excitation	40
4.5	Error Summary	43
	References	44
5	Apparatus	47
5.1	The Ion Trap	47
5.1.1	Trap Geometry	47
5.1.2	Vacuum System	49
5.1.3	Trap RF Source	50
5.1.4	Trap DC Source	51
5.2	Magnetic Field Coils	52
5.3	Imaging System	53
5.4	Laser Systems	53
5.4.1	Ca^+ Lasers	53
5.4.2	Photo-Ionisation Lasers	54
5.4.3	Beam-Paths	55
5.5	Raman Lasers	56
5.5.1	Laser Sources	57
5.5.2	AOM Switch-Yard and Optical Fibres	57
5.5.3	Beam-Paths	59
5.6	Microwave Qubit Drive	60
5.7	Experimental Control	61
5.7.1	Coherent DDS	61

5.7.2	Laser Intensity Stabilisation	62
	References	62
6	Experiment Characterization	65
6.1	Trap Behaviour	65
6.1.1	Axial Micro-Motion	65
6.1.2	Magnetic Field Gradient	68
6.1.3	Recrystallisation	70
6.2	State-Preparation and Readout	71
6.2.1	$^{43}\text{Ca}^+$ Optical Qubit	71
6.2.2	$^{43}\text{Ca}^+$ Stretch Qubit	71
6.2.3	$^{43}\text{Ca}^+$ Low-Field Clock Qubit	72
6.2.4	$^{40}\text{Ca}^+$ Zeeman Qubit	73
6.3	Qubit Dephasing and Frequency Drift	73
6.3.1	Magnetic Field Drift and Modulation	73
6.3.2	Stretch Qubit Coherence	74
6.3.3	Clock Qubit Coherence	75
6.4	Raman Lasers	75
6.4.1	Beam-Pointing and Rabi Frequency Stability	76
6.4.2	Intensity and Phase Noise	78
6.5	Motion	81
6.5.1	Cooling	81
6.5.2	Motional Frequency Drifts	81
6.5.3	Motional Heating	83
6.5.4	Motional Coherence	83
	References	85
7	Single-Qubit Gates	87
7.1	Randomized Benchmarking of a Single Qubit	87
7.2	Experimental Setup	88
7.3	Error Sources	89
7.3.1	Photon Scattering	89
7.3.2	Off-Resonant Excitation	89
7.3.3	Detuning	90
7.3.4	Systematic Rabi Frequency Error	90
7.3.5	Rabi Frequency Noise	91
7.3.6	Phase Noise	92
7.4	Results	94
	References	96
8	Experimental Implementations of Two-Qubit Gates	97
