

Preface

Welcome to the Second IFIP International Conference on Topics in Theoretical Computer Science (TTCS 2017), held during September 12–14, 2017, at the School of Computer Science, Institute for Research in Fundamental Sciences (IPM), Tehran, Iran.

This volume contains the papers accepted for presentation at TTCS 2017. For this edition of TTCS, we received 20 submissions from 10 different countries. An international Program Committee comprising 32 leading scientists from 13 countries reviewed the papers thoroughly providing on average four review reports for each paper. We accepted eight submissions, which translates into 40% of all submissions. This means that the process was selective and only high-quality papers were accepted. The program also includes four invited talks by the following world-renowned computer scientists:

- Mahdi Cheraghchi, Imperial College, UK
- Łukasz Jeż, University of Wrocław, Poland
- Jaco van de Pol, University of Twente, The Netherlands
- Peter Csaba Ölveczky, University of Oslo, Norway

Additionally, the program features two talks and one tutorial in the PhD Forum, which are not included in the proceedings.

We thank IPM, and in particular the Organizing Committee, for having provided various facilities and for their generous support. We are also grateful to our Program Committee for their professional and hard work in providing expert review reports and thorough discussions leading to a very interesting and strong program.

We also acknowledge the excellent facilities provided by the EasyChair system, which were crucial in managing the process of submission, selection, revision, and publication of the manuscripts included in these proceedings.

September 2017
