

Contents

Human-Computer Interaction

A Two-Step Methodology for Human Pose Estimation Increasing the Accuracy and Reducing the Amount of Learning Samples Dramatically . . .	3
<i>Samir Azrour, Sébastien Piérard, Pierre Geurts, and Marc Van Droogenbroeck</i>	
Body Related Occupancy Maps for Human Action Recognition	15
<i>Sanne Roegiers, Gianni Allebosch, Peter Veelaert, and Wilfried Philips</i>	
Facial Expression Recognition Using Local Region Specific Dense Optical Flow and LBP Features	28
<i>Deepak Ghimire, Sang Hyun Park, and Mi Jin Kim</i>	
Fully Automated Facial Expression Recognition Using 3D Morphable Model and Mesh-Local Binary Pattern	39
<i>Hela Bejaoui, Haythem Ghazouani, and Walid Barhoumi</i>	
Real Time Continuous Tracking of Dynamic Hand Gestures on a Mobile GPU	51
<i>Robert Prior, David Capson, and Alexandra Branzan Albu</i>	
Multi-camera Finger Tracking and 3D Trajectory Reconstruction for HCI Studies	63
<i>Vadim Lyubanenko, Toni Kuronen, Tuomas Eerola, Lasse Lensu, Heikki Kälviäinen, and Jukka Häkkinen</i>	
Full Screen Touch Detection for the Virtual Touch Screen	75
<i>Katsuto Nakajima and Takafumi Igarashi</i>	

Classification and Recognition

Optimal Tiling Strategy for Memory Bandwidth Reduction for CNNs	89
<i>Leonardo Cecconi, Sander Smets, Luca Benini, and Marian Verhelst</i>	
Statistical Radial Binary Patterns (SRBP) for Bark Texture Identification . . .	101
<i>Safia Boudra, Itheri Yahiaoui, and Ali Behloul</i>	
Object Tracking Using Deep Convolutional Neural Networks and Visual Appearance Models	114
<i>Bogdan Mocanu, Ruxandra Tapu, and Titus Zaharia</i>	

Sensing Forest for Pattern Recognition	126
<i>Irina Burciu, Thomas Martinetz, and Erhardt Barth</i>	
Analysis of Skeletal Shape Trajectories for Person Re-Identification	138
<i>Amani Elaoud, Walid Barhoumi, Hassen Drira, and Ezzeddine Zagrouba</i>	
Deep Learning on Underwater Marine Object Detection: A Survey	150
<i>Md. Moniruzzaman, Syed Mohammed Shamsul Islam, Mohammed Bennamoun, and Paul Lavery</i>	
A Novel and Accurate Local 3D Representation for Face Recognition	161
<i>Soumaya Mathlouthi, Majdi Jribi, and Faouzi Ghorbel</i>	
Human Face Detection Improvement Using Incremental Learning Based on Low Variance Directions	170
<i>Takoua Kefi, Riadh Ksantini, Mohamed Bécha Kaâniche, and Adel Bouhoula</i>	
Multi-view Pose Estimation with Flexible Mixtures-of-Parts	180
<i>Emre Dogan, Gonen Eren, Christian Wolf, Eric Lombardi, and Atilla Baskurt</i>	
Shearlet-Based Region Map Guidance for Improving Hyperspectral Image Classification	191
<i>Mariam Zaouali, Sonia Bouzidi, and Ezzeddine Zagrouba</i>	
Evaluation of Dimensionality Reduction Methods for Remote Sensing Images Using Classification and 3D Visualization	203
<i>Andreea Griparis, Daniela Faur, and Mihai Datcu</i>	
Towards Condition Analysis for Machine Vision Based Traffic Sign Inventory	212
<i>Petri Hienonen, Lasse Lensu, Markus Melander, and Heikki Kälviäinen</i>	
Learning Siamese Features for Finger Spelling Recognition	225
<i>Bogdan Kwolek and Shinji Sako</i>	
AMD Classification in Choroidal OCT Using Hierarchical Texton Mining	237
<i>Dafydd Ravenscroft, Jingjing Deng, Xianghua Xie, Louise Terry, Tom H. Margrain, Rachel V. North, and Ashley Wood</i>	
Prostate Size Inference from Abdominal Ultrasound Images with Patch Based Prior Information	249
<i>Nur Banu Albayrak, Emrah Yildirim, and Yusuf Sinan Akgul</i>	

Navigation, Mapping, Robotics and Transports

Omnidirectional Localization in vSLAM with Uncertainty Propagation and Bayesian Regression	263
<i>David Valiente, Óscar Reinoso, Arturo Gil, Luis Payá, and Mónica Ballesta</i>	
Visual Localization Based on Place Recognition Using Multi-feature Combination (D- λ LBP++HOG).	275
<i>Yongliang Qiao, Cindy Cappelle, Tao Yang, and Yassine Ruichek</i>	
Homography-Based Navigation System for Unmanned Aerial Vehicles	288
<i>Abdulla Al-Kaff, Arturo de La Escalera, and José María Armingol</i>	
Robust Tracking in Weakly Dynamic Scenes	301
<i>Trevor Gee, Rui Gong, Patrice Delmas, and Georgy Gimel'farb</i>	
Texturizing and Refinement of 3D City Models with Mobile Devices	313
<i>Ralf Gutbell, Hannes Kuehnelt, and Arjan Kuijper</i>	
Image Classification for Ground Traversability Estimation in Robotics.	325
<i>R. Omar Chavez-Garcia, Jérôme Guzzi, Luca M. Gambardella, and Alessandro Giusti</i>	
InSAR Coherence-Dependent Fuzzy C-Means Flood Mapping Using Particle Swarm Optimization	337
<i>Chayma Chaabani and Riadh Abdelfattah</i>	
Monitoring and Evaluation of Flooded Areas Based on Fused Texture Descriptors.	349
<i>Loretta Ichim and Dan Popescu</i>	

Video Processing and Retrieval

Anomaly Detection in Crowded Scenarios Using Local and Global Gaussian Mixture Models	363
<i>Adrián Tomé and Luis Salgado</i>	
JND-Guided Perceptual Pre-filtering for HEVC Compression of UHD TV Video Contents	375
<i>Eloïse Vidal, François-Xavier Coudoux, Patrick Corlay, and Christine Guillemot</i>	
Visual versus Textual Embedding for Video Retrieval	386
<i>Danny Francis, Paul Pidou, Bernard Merialdo, and Benoît Huet</i>	
Handling Noisy Labels in Gaze-Based CBIR System.	396
<i>Stéphanie Lopez, Arnaud Revel, Diane Lingrand, and Frédéric Precioso</i>	

Extracting Relevant Features from Videos for a Robust Smoke Detection. . . .	406
<i>Olfa Besbes and Amel Benazza-Benyahia</i>	
Images Annotation Extension Based on User Feedback	418
<i>Abdessalem Bouzaïeni and Salvatore Tabbone</i>	
A Domain Independent Approach to Video Summarization	431
<i>Amanda Dash and Alexandra Branzan Albu</i>	
Is a Memoryless Motion Detection Truly Relevant for Background Generation with LaBGen?	443
<i>Benjamin Laugraud and Marc Van Droogenbroeck</i>	
Large-Scale Camera Network Topology Estimation by Lighting Variation	455
<i>Michael Zhu, Anthony Dick, and Anton van den Hengel</i>	
Counting Large Flocks of Birds Using Videos Acquired with Hand-Held Devices	468
<i>Amanda Dash and Alexandra Branzan Albu</i>	
Fast Ground Detection for Range Cameras on Road Surfaces Using a Three-Step Segmentation	479
<i>Izaak Van Crombrugge, Ibrahim Ben Azza, Rudi Penne, Gregory Van Barel, and Steve Vanlanduit</i>	
Security, Forensics, Surveillance	
A Robust Video Watermarking for Real-Time Application	493
<i>Ines Bayoudh, Saoussen Ben Jabra, and Ezzeddine Zagrouba</i>	
Multi-object Tracking Using Compressive Sensing Features in Markov Decision Process.	505
<i>Tao Yang, Cindy Cappelle, Yassine Ruichek, and Mohammed El Bagdouri</i>	
Face Detection in Thermal Infrared Images: A Comparison of Algorithm- and Machine-Learning-Based Approaches. . . .	518
<i>Marcin Kopaczka, Jan Nestler, and Dorit Merhof</i>	
Cell-Based Approach for 3D Reconstruction from Incomplete Silhouettes . . .	530
<i>Maarten Slembrouck, Peter Veelaert, David Van Hamme, Dimitri Van Cauwelaert, and Wilfried Philips</i>	
Sliding Window Based Micro-expression Spotting: A Benchmark	542
<i>Thuong-Khanh Tran, Xiaopeng Hong, and Guoying Zhao</i>	
Bimodal Person Re-identification in Multi-camera System	554
<i>Hazar Mliki, Mariem Naffeti, and Emna Fendri</i>	

Image Processing

Adding GLCM Texture Analysis to a Combined Watershed Transform and Graph Cut Model for Image Segmentation	569
<i>Kauê T.N. Duarte, Marco A.G. de Carvalho, and Paulo S. Martins</i>	
Background Subtraction with Multispectral Images Using Codebook Algorithm	581
<i>Rongrong Liu, Yassine Ruichek, and Mohammed El Bagdouri</i>	
Image Ridge Denoising Using No-Reference Metric	591
<i>Nikolay Mamaev, Dmitry Yurin, and Andrey Krylov</i>	
A CSF-Based Preprocessing Method for Image Deblurring.	602
<i>Maria Carmela Basile, Vittoria Bruni, and Domenico Vitulano</i>	
Data Augmentation for Plant Classification.	615
<i>Pornntiwa Pawara, Emmanuel Okafor, Lambert Schomaker, and Marco Wiering</i>	
Vision Based Lidar Segmentation for Scan Matching and Camera Fusion.	627
<i>Gabriel Burtin, Patrick Bonnin, and Florent Malartre</i>	
Proposal of Segmentation Method Adapted to the Infrared Sensor.	639
<i>Félix Polla, Kamal Boudjelaba, Bruno Emile, and Hélène Laurent</i>	
Detection and Tracking of the Pores of the Lamina Cribrosa in Three Dimensional SD-OCT Data	651
<i>Florence Rossant, Kate Grieve, Stéphanie Zwillingner, and Michel Paques</i>	
Leaves Segmentation in 3D Point Cloud	664
<i>William Gélard, Ariane Herbulot, Michel Devy, Philippe Debaeke, Ryan F. McCormick, Sandra K. Truong, and John Mullet</i>	
Relative Camera Pose Estimation Using Convolutional Neural Networks	675
<i>Iaroslav Melekhov, Juha Ylloinas, Juho Kannala, and Esa Rahtu</i>	
Shape Acquisition System Using an Handheld Line Laser Pointer Without Markers.	688
<i>Jae-Hean Kim, Hyun Kang, Jin Sung Choi, and Chang Joon Park</i>	
3D Visualization of Radioactive Sources by Combining Depth Maps Generated from a Stereo Radiation Detection Device.	701
<i>Pathum Rathnayaka, Seung-Hae Baek, and Soon-Yong Park</i>	
Filling Missing Parts of a 3D Mesh by Fusion of Incomplete 3D Data.	711
<i>Laszlo Kormoczi and Zoltan Kato</i>	

An Efficient Descriptor Based on Radial Line Integration
for Fast Non-invariant Matching and Registration of Microscopy Images 723
Anders Hast, Gustaf Kylberg, and Ida-Maria Sintorn

3D Shape from SEM Image Using Improved Fast Marching Method. 735
Lei Huang, Yuji Iwahori, Aili Wang, and M.K. Bhuyan

An Enhanced Multi-label Random Walk for Biomedical Image
Segmentation Using Statistical Seed Generation 748
Ang Bian, Aaron Scherzinger, and Xiaoyi Jiang

Author Index 761

Advanced Concepts for Intelligent Vision Systems
18th International Conference, ACIVS 2017, Antwerp,
Belgium, September 18-21, 2017, Proceedings
Blanc-Talon, J.; Penne, R.; Philips, W.; Popescu, D.;
Scheunders, P. (Eds.)
2017, XVI, 763 p. 339 illus., Softcover
ISBN: 978-3-319-70352-7
