

Contents

A. D. Soloviev	1
<i>D. B. Gnedenko, S. S. Demidov, A. M. Zubkov, and V. A. Kashtanov</i>	
Queueing Models and Stochastic Networks	
The Analysis of Cloud Computing System as a Queueing System with Several Servers and a Single Buffer	11
<i>Ivan Zaryadov, Andrey Kradeniyh, and Anastasiya Gorbunova</i>	
Analysis of K -Capacity Queueing System with Two-Heterogeneous Server	23
<i>H. Okan Isguder and Umay Uzunoglu Kocer</i>	
Fluid Limit for Closed Queueing Network with Several Multi-servers	31
<i>Svetlana Anulova</i>	
Stationarity Conditions for the Control Systems that Provide Service to the Conflicting Batch Poisson Flows	43
<i>Maria Rachinskaya and Mikhail Fedotkin</i>	
Transient Analysis of a Multi-server Queueing Model with Discouraged Arrivals and Retention of Reneging Customers	54
<i>Rakesh Kumar and Sapana Sharma</i>	
Priority Management in a Semi-Markov Queueing Model	65
<i>O. B. Zaytseva and E. V. Kondrashova</i>	
Optimal Antivirus Protection Strategy in Computer Networks	75
<i>Yulia Grishunina and Larisa Manita</i>	
Necessary Conditions for the Existence of Stationary Distribution in the Adaptive Control System of Conflict Flows.	83
<i>Mikhail Fedotkin and Evgeniy Kudryavtsev</i>	
One Server Queue with Bulk Arrivals	97
<i>A. D. Soloviev and V. N. Sobolev</i>	
Priority Systems with Orientation. Analytical and Numerical Results	109
<i>Gheorghe Mishkoy</i>	
Discrete Gamma Approximation in Retrial Queue MMPP/M/1 Based on Moments Calculation.	121
<i>Ekaterina Fedorova, Anatoly Nazarov, and Svetlana Paul</i>	

Inventory Management System with On/Off Control of Output Product Flow	132
<i>Anatoly Nazarov and Valentina Broner</i>	
On a Multi-server Priority Queue with Preemption in Crowdsourcing	145
<i>A. Krishnamoorthy, Dhanya Shajin, and A. S. Manjunath</i>	
MAP/PH/1 Retrial Queueing-Inventory System with Orbital Search and Reneging of Customers	158
<i>A. Krishnamoorthy and Dhanya Shajin</i>	
Analysis of a Wireless Sensor Node with Varying Rates of Energy Harvesting and Consumption	172
<i>Alexander Dudin, Sergey Dudin, Olga Dudina, and Chesoong Kim</i>	
Infinite Order Systems of Differential Equations and Large Scale Random Neural Networks	183
<i>Soltan K. Kanzitdinov and Sergey A. Vasilyev</i>	
Reliability, Risk, Insurance	
On Reliability Function of a Parallel System with Three Renewable Components.	199
<i>A. M. Andronov, V. V. Rykov, and V. M. Vishnevsky</i>	
Analysis of Renewable Reliability Systems by Markovization Method.	210
<i>V. V. Rykov and D. V. Kozyrev</i>	
New Applied Probability Models and Their Stability	221
<i>Ekaterina Bulinskaya</i>	
Analytic-Numerical Investigations of Singular Problems for Survival Probability in the Dual Risk Model with Simple Investment Strategies	236
<i>T. A. Belkina, N. B. Konyukhova, and B. V. Slavko</i>	
Asymptotic Behavior of Reliability Function for Multidimensional Aggregated Weibull Type Reliability Indices	251
<i>Julia Farkas, Enkelejd Hashorva, and Vladimir I. Piterbarg</i>	
Sensitivity Analysis of Reliability and Performability Measures for a Multi-server Queueing System with Constant Retrial Rate	265
<i>Dmitry Efrosinin</i>	
Bivariate Teissier Distributions	279
<i>Nikolai Kolev, Ngo Ngoc, and Yang Ting Ju</i>	

Analytical Methods and Limit Theorems

Weighted Entropy and its Use in Computer Science and Beyond	293
<i>Mark Kelbert, Izabella Stuhl, and Yuri Suhov</i>	
Selected Data Compression: A Refinement of Shannon's Principle	309
<i>Yuri Suhov and Izabella Stuhl</i>	
On the Estimates in the Lindeberg-Feller's Limit Theorem.	322
<i>Shakir Formanov</i>	
Number of Pairs of Template Matchings in q -ary Tree with Randomly Marked Vertices	336
<i>Vasiliy Kruglov and Andrey Zubkov</i>	
Limit Distributions in Stochastic Networks with Message-Passing Synchronization	347
<i>Anatoly Manita</i>	
Stochastic Time Synchronization Models Based on Agreement Algorithms	361
<i>Larisa Manita and Anatoly Manita</i>	
Algorithms of Inertial Mirror Descent in Stochastic Convex Optimization Problems.	376
<i>Alexander Nazin</i>	
Security Models Based on Stochastic Meta Data.	388
<i>Alexander Grusho, Elena Timonina, and Sergey Shorgin</i>	
Branching Random Walks with Immigration	401
<i>Dan Han, Yulia Makarova, Stanislav Molchanov, and Elena Yarovaya</i>	
An Invariance Principle for Additive Functionals of Semi-Markov Processes	409
<i>Adina Oprisan</i>	
Probabilistic Algorithms for Numerical Construction of Classical Solutions to the Cauchy Problem for Nonlinear Parabolic Systems	421
<i>Yana Belopolskaya and Anastasija Stepanova</i>	
Some Extensions of Alternating Series Test and Its Applications.	435
<i>Galina Zverkina</i>	
Quantum-Semiclassical Calculation of Transition Probabilities in Antiproton Collisions with Helium Ions	449
<i>Vladimir S. Melezhik and Leonid A. Sevastianov</i>	

Application of Homogeneity Tests: Problems and Solution.	461
<i>Boris Yu. Lemesenko, Irina V. Veretelnikova,</i> <i>Stanislav B. Lemesenko, and Alena Yu. Novikova</i>	
Algorithm of Exact Computation of Decomposable Statistics	
Distributions and Its Applications	476
<i>Marina Filina and Andrey Zubkov</i>	
Statistical Analysis of Big Data Based on Parsimonious Models	
of High-Order Markov Chains	485
<i>Yu. S. Kharin</i>	
The HRD-Algorithm: A General Method for Parametric Estimation	
of Two-Component Mixture Models	497
<i>Yuri Belyaev, David Källberg, and Patrik Rydén</i>	
On Robust Sequential Parameters Estimating	509
<i>Ivan Tsitovich</i>	
Adapted Statistical Experiments with Random Change of Time	523
<i>D. Koroliouk and V. S. Koroliuk</i>

Analytical and Computational Methods in Probability
Theory

First International Conference, ACMPT 2017, Moscow,
Russia, October 23-27, 2017, Proceedings

Rykov, V.; Singpurwalla, N.D.; Zubkov, A.M. (Eds.)

2017, XVI, 540 p. 64 illus., Softcover

ISBN: 978-3-319-71503-2
