

INDEX

KEYNOTE LECTURES

- Electric mobility – sustainably into the future** 3
Dr. Marcus Bollig, BMW Group
- The challenge of electric mobility in digitized power grids** 5
Heiko Fastje, EWE NETZ GmbH; I. Kolmsee, EWE AG

MARKETS

- The market integration of electric vehicles –
how SchwarmMobilität® creates purchasing incentives
and stabilizes power grids** 9
Gero Lücking, LichtBlick SE
- Case study – China's regulatory impact on electric
mobility development and the effects on power generation
and the distribution grid** 13
Guiping Zhu, Electrical Engineering Department, Tsinghua University,
China; Qiao Ding, C. T. Hein, BMW Group, China
- Unlock the value of electric vehicles' batteries** 31
Marcus Fendt, The Mobility House GmbH
- Smart charging in daily routine – expectations, experiences,
and preferences of potential users** 33
Franziska Schmalfuß, M. Kreußlein, C. Mair, S. Döbelt,
C. Heller, R. Wüstemann, B. Kämpfe, Prof. Dr. J. F. Krems,
Institute of Psychology, Cognitive and Engineering Psychology,
TU Chemnitz

TRAFFIC AND ENERGY SYSTEMS

Energy and transport systems grow together 51

Prof. Dr. Ulrich Wagner, Institute for Energy Economy
and Application Technology (IfE), TU Munich

**Synergies and challenges when transportation demand meets
the electricity sector** 65

Tetyana Raksha, P. R. Schmidt, C. Bendig-Daniels,
Ludwig-Bölkow-Systemtechnik GmbH

OVERALL ENERGY SYSTEMS I

Grid integration of electric vehicles 81

Xaver Pfab, V. Haese, BMW Group

**Challenges and results in the BMUB research project
'Controlled Charging V3.0'** 103

Michael Westerburg, B. Jünemann, R. Drexler, EWE AG

**The 'INEES' research project – intelligent grid integration
of electric vehicles to provide system services** 105

Hannes Haupt, Dr. G. Bäuml, Dr. G. Bärwaldt, H. Nannen,
M. Kammerlocher, Volkswagen AG

KEYNOTE LECTURE

Roles for regulators in electric Vehicle-Grid Integration 119

Noel Crisostomo, California Public Utilities Commission, USA

LOCAL ENERGY SYSTEMS

- Local energy systems for electric mobility** 125
Dr. Willibald Prestl, B. Brendle, Dr. M. Beer, BMW Group
- PV energy and electric mobility –
driving forces of the energy transition** 143
Detlef Beister, Dr. T. Leifert, SMA Solar Technology AG
- Photovoltaics and electric mobility –
potentials and reasonable integration into the power grid –
data and facts gained from practical experience** 161
Hans Urban, Schletter GmbH

INFORMATION AND COMMUNICATION TECHNOLOGY

- Data communication and grid quality on charging interface** 197
Ursel Willrett, IAV GmbH
- ISO 15118 – charging communication between plug-in
electric vehicles and charging infrastructure** 213
Dr. Andreas Heinrich, Daimler AG; Michael Schwaiger, BMW Group
- E-mobility – a challenge for IT as well!** 229
Jörn Cohrs, Dr. R. Walther, R. Norrenbrock, H. Lüschen,
M. Neuendorf, BTC AG

SYSTEM BEHAVIOR

- The grid-friendly integration of shiftable loads –
the approaches from the EnBW pilot project
'Flexible Power-to-Heat' also suitable for electric vehicles** 239
Dr. Holger Wiechmann, EnBW Energie Baden-Württemberg AG
- Decentralized grid integration of electric vehicles** 253
Dr. Gunnar Bärwaldt, Dr. L. Hofmann, Volkswagen AG

OVERALL ENERGY SYSTEMS II

**Integration of renewables and electric vehicles
into the smart grid – innovative energy management strategies
and implementation** 257

Yutaka Ota, Power Systems Design Laboratory,
Tokyo City University, Japan

**Grid optimization through electric vehicles
in a cross-system comparison** 269

Florian Samweber, S. Fattler, S. Köppl,
Research Center for Energy Economics (FfE)

**Rollout e-mobility – the next big challenge for network operations
and network planning** 287

Dr. Armin Gaul, C. Czajkowski, S. Voit, RWE International SE;
S. Übermasser, AIT, Austria

KEYNOTE LECTURE

**Operational experience of grid-integrated vehicles with V2G
in three countries** 307

Prof. Dr. Willett Kempton, Center for Carbon-free Power Integration,
University of Delaware, S. Fisher, NRG EVgo; S. Fisher,
PJM Interconnection; G. Poilasne, Nuvve Corporation, USA
