

Table of content

Preface	V
Acknowledgments	VII
Declaration	IX
List of Figures	XV
Abstract	XVII
Publications arising from this thesis.....	XIX
Abbreviations	XXI
1 Introduction	1
1.1 Human Genetics.....	1
1.2 Exome Sequencing.....	1
1.2.1 Strategies to identify rare disease causing variants	2
1.3 Lymphocyte development.....	2
1.3.1 B cell development	3
1.3.2 T cell development	3
1.4 Secondary lymphoid organs and germinal centers	4
1.4.1 Structure of a germinal center.....	4
1.4.2 B cell fate within the germinal center	5
1.4.3 Follicular dendritic cells	6
1.4.4 T _{FH} cells within the germinal center	7
1.5 Inherited disorders of the immune system	7
1.5.1 (Severe) Combined Immunodeficiencies	8
1.5.2 Primary antibody deficiencies	10
1.6 Central and peripheral tolerance	11
1.6.1 Central tolerance.....	11
1.6.2 Peripheral tolerance	12
1.7 Autoimmunity and auto inflammation.....	12
1.7.1 Innate Immune Activation-Auto inflammation	12
1.7.2 Activation of the adaptive immune system – Autoimmunity.....	13
1.8 Lymphoproliferation	14
1.8.1 EBV-driven lymphoproliferation.....	14
1.9 Hemophagocytic lymphohistiocytosis (HLH)	15
1.10 Clinical diagnosis of patients with primary immunodeficiencies	15
1.11 Therapy of primary immunodeficiencies- curative approaches.....	16
1.11.1 Hematopoietic stem cell transplantation (HSCT).....	16
1.11.2 Gene therapy.....	16
1.12 Therapy of primary immunodeficiencies- supportive/ non-curative approaches	17
1.12.1 Enzyme replacement therapy.....	17
1.12.2 Immunoglobulin substitution.....	17
1.12.3 Antimicrobials	18

1.12.4 Antifungals	18
2 Aim of the thesis.....	19
3 Results.....	21
3.1 Combined immunodeficiency with life-threatening EBV-associated lymphoproliferative disorder in patients lacking functional CD27	21
3.1.1 Abstract.....	21
3.1.2 Introduction.....	21
3.1.3 Methods	22
3.1.4 Results.....	23
3.1.5 Discussion.....	24
3.1.6 Acknowledgements.....	25
3.1.7 Authorship	25
3.1.8 Disclosures.....	25
3.1.9 References.....	26
3.2 B-cell deficiency and severe autoimmunity caused by deficiency of protein kinase C δ	30
3.2.1 Abstract.....	30
3.2.2 Introduction.....	30
3.2.3 Methods	31
3.2.4 Results and Discussion	31
3.2.5 Mutation identification in the PRKCD gene	33
3.2.6 Functional consequences of PRKCD deficiency	33
3.2.7 Acknowledgments	34
3.2.8 Author contributions	34
3.2.9 References.....	35
3.3 Early-onset inflammatory bowel disease and common variable immunodeficiency-like disease caused by IL-21 deficiency	38
3.3.1 Abstract.....	38
3.3.2 Introduction.....	38
3.3.3 Methods	39
3.3.4 Results.....	40
3.3.5 Discussion.....	43
3.3.6 Acknowledgments	45
3.3.7 Author Contributions	45
3.3.8 References.....	45
4 Discussion	53
4.1 Contribution to the field of primary immunodeficiencies	53
4.2 Combined immunodeficiency with life threatening EBV-associated lymphoproliferative disorder in patients lacking functional CD27.	53
4.2.1 CD27 biology.....	53
4.2.2 CD27 deficiency in the context of other PIDs with lymphoproliferation	54
4.3 B cell deficiency and severe autoimmunity caused by deficiency of protein kinase C δ	55
4.3.1 PKC δ biology	55

4.3.2	PKC δ activation.....	55
4.3.3	Human PKC δ deficiency	56
4.3.4	PKC δ signaling and SLE	57
4.4	Early-onset inflammatory bowel disease and common variable immunodeficiency-like disease caused by IL-21 deficiency	57
4.4.1	Discovery and biology of the IL-21/IL-21 receptor system	57
4.4.2	Human IL-21R and IL-21 deficiency	58
4.4.3	Concluding remarks.....	59
5	References.....	61
6	Publications	75

Identifying Novel Inborn Errors of the Immune System
Primary Immunodeficiencies with Defective Class Switch
and Autoimmunity

Salzer, E.

2017, XXIII, 76 p. 11 illus., Softcover

ISBN: 978-3-658-16795-0
