

Contents

List of Figures	XV
List of Tables	XIX
List of Abbreviations	XXI
1 Introduction	1
1.1 Motivation	1
1.2 Objectives	2
1.3 Research Design	3
1.4 Structure of the Thesis	5
2 Energy Usage in Industry	9
2.1 Terms and Definitions	9
2.2 Driving Concerns for Energy Efficiency	10
2.2.1 Ecological Effects of Energy Consumption	11
2.2.2 Political Conditions for Energy Efficiency	12
2.2.3 Energy Costs in Industry	13
2.2.4 Structure of Energy Consumption in Industry	15
2.2.5 Energy Saving Potentials	17
2.3 Barriers for Implementing Energy Efficiency in Industry	18
2.4 Interim Conclusion on Energy Usage in Industry	20
3 State of the Art	23
3.1 Models and Modeling	23
3.1.1 Terms and Definitions	23
3.1.2 Model Types	24
3.1.3 Modeling Process and Modeling Principles	26
3.2 System Theory and Systems Engineering	29
3.2.1 Terms and Definitions	29
3.2.2 Systems Engineering Methods and Tools	30

3.2.3	Decision-Making Methods	31
3.3	Knowledge Management	33
3.3.1	Terms and Definitions	33
3.3.2	Knowledge Representation	35
3.4	Factory Planning and Factory Management	39
3.4.1	Terms and Definitions	39
3.4.2	Factory Systems	40
3.4.3	Factory Planning Tasks and Approaches	42
3.5	Approaches to Increase Energy Efficiency in Factories	47
3.5.1	Norms and Standards	47
3.5.2	Industrial Cooperations and Commercial Offers	50
3.5.3	Generalized Energy Efficiency Principles	51
3.5.4	Systematic Methods for Energy Efficiency Improvement	55
3.5.5	Assessment of Existing Methods	62
3.6	Interim Conclusion on the State of the Art	67
4	Method to Identify Energy Efficiency Measures for Factory Systems	71
4.1	Goals and Requirements	71
4.2	Overview on Methodical Approach	73
4.3	Description of the Object System	75
4.3.1	General Characteristics of Factory Types	75
4.3.2	Hierarchical Description of Factory Systems	76
4.3.3	Functional Description of Factory Systems	78
4.4	Description of the Energy Efficiency Influential Parameters	81
4.4.1	Extended Functional Model of the Object System	81
4.4.2	Influential Parameters on the Energy Efficiency of Buildings	84
4.4.3	Influential Parameters on the Energy Efficiency of Work Centers	89
4.4.4	Influential Parameters on the Energy Efficiency of Components	91
4.5	Description of the Project Characteristics	93
4.6	Description of the Actor	96
4.7	Description of the Energy Efficiency Measures	101
4.8	Description of the Measure Implementation Support	109
4.9	Matching Algorithm for Assigning Energy Efficiency Measures	114
4.10	Procedure Model for Method Application	120
4.11	Results of the Method Development	123

5	Validation	127
5.1	Validation Concept	127
5.2	Review of Methodical Requirements	128
5.3	Prototype	131
5.4	Case Study 1: Planning of Welding Processes	135
5.4.1	Goal Definition	135
5.4.2	Basics on Welding Processes	135
5.4.3	Situation Analysis	138
5.4.4	Identification of Energy Efficiency Measures	141
5.4.5	Interpretation of Case Study Results	148
5.5	Case Study 2: Planning of Logistics Systems	149
5.5.1	Goal Definition	150
5.5.2	Situation Analysis	151
5.5.3	Identification of Energy Efficiency Measures	156
5.5.4	Assessment and Selection of Energy Efficiency Measures	161
5.5.5	Interpretation of Case Study Results	166
5.6	Validation Results	167
6	Conclusions	171
6.1	Summary	171
6.2	Outlook	173
	References	175
	Appendix	203
A1	Additional Material for Case Study 1	203
A2	Additional Material for Case Study 2	204

A Method to Identify Energy Efficiency Measures for
Factory Systems Based on Qualitative Modeling

Krones, M.

2017, XXII, 234 p. 43 illus., Softcover

ISBN: 978-3-658-18342-4
