
Inhaltsverzeichnis

Strategic optimization of powertrain technology portfolios by means of market simulation

Nils Robert Neumann, Jan Bavendiek und Prof. Dr. Lutz Eckstein

Design of battery electric vehicles in accordance with legal standards and manufacturers' and customers' requirements

Dr. Fabian Schüppel, Michael Schlüter und Dr. Jan Gacnik

48V –Where to place the e-machine?

Thomas Pels, Vitali Davydov, Dr. Raimund Ellinger, Carsten Kaup und Dr. Wolfgang Schöffmann

Synthesis of various hybrid drive systems

Andreas Englisch, Thomas Pfund, Dierk Reitz, Emmanuel Simon und Florian Kolb

Tailored diesel engines for electrical propulsion systems or tailored electrification for future diesel powertrains

Thomas Körfer, Bastian Holderbaum, David Blanco-Rodriguez, Giovanni Vagnoni und Markus Eisenbarth

The intelligent operating strategy of the Mercedes-Benz plug-in hybrid electric vehicles

Dr. Daniel Görke, Jochen Strenkert, Stefan Schmiedler, Tobias Schürmann und Lukas Engbroks

Thermal management of a fuel cell range-extended electric vehicle

Johannes Höflinger und Prof. Dr. Peter Hofmann

Highly fuel-efficient transmission and propulsion concepts

Prof. Dr. Ferit Küçükay, Lin Li und Andreas Lange

Innovative electric motors for the future electric powertrain

Dr. Peter Fischer, Dr. Martin Braun, Dr. Stephan Usbeck und Ralf Schmid

Protection for HV battery systems – humidity control

Dr. Michael Harenbrock, Jürgen Kosicki und Dr. Stefan Kunze

Battery-electric vehicle efficiency potential assessment and thermal aging investigation

Alessandro Colla, Tomaž Katrašnik, Konstantin Walter und Dr. Franz Diwoky

Synthesis of electrified drive systems

Hendrik Piechottka, Dr. Sebastian Grams, Axel Sturm und Prof. Dr. Ferit Küçükay

The interaction between tribology and emissions under real driving conditions (RDE)

Christian Lensch-Franzen, Prof. Dr. J. Hadler, Dr. M. Gohl, Dr. J. Becker, T. Mink und J. Wang

Real-time capable model environment for developing and testing hybrid and battery electric vehicles

Dr. Christian Donn und Valerie Bensch

Dynamic downsizing gasoline demonstrator

Dr. Mike Bassett, Jonathan Hall, Tony Cains, Dr. Stephen Borman und Simon Reader

Potential of the hybrid operating modes of the plug-in hybrid powertrain concept ‘Two-Drive**Transmission with Range Extender’ (DE-REX)**

Sebastian Fischer, Andreas Viehmann, Ruben König, Prof. Dr. Christian Beidl und Prof. Dr. Stephan Rinderknecht

Tagungsbericht

Martin Westerhoff

Der Antrieb von morgen 2017

Hybride und elektrische Antriebssysteme 11.

Internationale MTZ-Fachtagung Zukunftsantriebe

Liebl, J. (Hrsg.)

2017, XI, 282 S. 146 Abb., Softcover

ISBN: 978-3-658-19223-5
