Reviewing / Publication

Once the chapter pdf is approved, it will move to the editors for the reviewing process. The editor responsible for your volume will contact you, either directly or through the Editorial Manager Office if there are any edits or comments.

As soon as your chapter has been approved by the editors, the manuscript will be forwarded to our production service SPI. Here the technical details are checked and the texts and figures formatted. You will receive chapter proofs for a final proofreading before your chapter is published online first. The production editor will send you the **Consent to Publish form** for your signature. Please return the signed form as soon as possible. We cannot publish the chapter without this form.
