1	Introduction	1
2	The Theory: Mechanics. An Example: Collision of a Point and a Plane	5
	Michel Frémond	
2.1	A System Made of a Point and a Plane	5
2.2	The Velocities	5
2.3	The Velocity of Deformation	6
2.4	The Principle of Virtual Work	7
	2.4.1 The Work of the Acceleration Forces	8
	2.4.2 The Work of the External Forces	9
	2.4.3 The Work of the Internal Forces	10
2.5	The Equations of Motion	11
	2.5.1 Properties of the Equations of Motion	13
2.6	The Laws of Thermodynamics	14
	2.6.1 The First Law	14
	2.6.2 The Second Law	15
2.7	The Constitutive Laws	16
	2.7.1 The Free Energy and the Non Dissipative Forces	17
	2.7.2 The Dissipative Forces	18
2.8	Examples of Collisions with Internal Forces Defined with a Pseudo-potential of Dissipation	20
	2.8.1 First Example	21
	2.8.2 Second Example	22
	2.8.3 Third Example. Interpenetration Is Possible	25
2.9	Examples of Dissipative Forces Defined with a Function of Dissipation	27
	2.9.1 The Coulomb's Friction Law	27
	2.9.2 The Coulomb's Collision Law	28

2.9.3	Experimental Results.	28
2.9.4	Relationships Between Smooth Friction and Collision Constitutive Laws	30
	References	30
3	The Theory: Mechanics and Thermics. An Example: Collision of Two Balls	33
	Michel Frémond	
3.1	Introduction.	33
3.2	The Velocities and the Velocities of Deformation.	33
3.3	The Principle of Virtual Work and the Equations of Motion	34
3.4	The Virtual Works	34
	3.4.1 The Theorem of Kinetic Energy	35
3.5	The Equations of Motion.	36
3.6	Smooth Evolution of Two Balls with Thermal Effects.	37
	3.6.1 Laws of Thermodynamics for a Ball	37
	3.6.2 Laws of Thermodynamics for the System	38
	3.6.3 The Constitutive Laws.	40
	3.6.4 An Example.	40
3.7	Collisions of Two Balls with Thermal Effects	45
	3.7.1 First Law of Thermodynamics for a Ball	46
	3.7.2 Second Law of Thermodynamics for a Ball	46
	3.7.3 A Useful Inequality for a Ball	46
	3.7.4 The First Law for the System.	47
	3.7.5 The Second Law for the System.	48
	3.7.6 A Useful Inequality for the System.	49
	3.7.7 The Constitutive Laws.	50
	3.7.8 An Example of Thermal Effects Due to Collisions	51
3.8	Phase Change and Collisions	54
3.9	Experimental Results	55
	References	55
4	Collisions of Rigid Solids: Three Disks in a Plane	57
	Federica Caselli and Michel Frémond	
4.1	Introduction.	57
4.2	The Velocities	58
4.3	The Velocities of Deformation	59
4.4	The Work of the Interior Forces.	60
4.5	The Work of the Acceleration Forces	60
4.6	The Equations of Motion.	61
4.7	The Constitutive Laws	61
	4.7.1 Solution of the Equations	62

4.8	Numerical Examples	63
4.8.1	The Mass Moment of Inertia Is Infinite: $I = \infty$	63
4.8.2	The Mass Moment of Inertia Is Finite: $I < \infty$	64
	References	65
5	Collisions of Rigid Solids: Three Balls in a Box.	67
	Federica Caselli and Michel Frémond	
5.1	Introduction	67
5.2	Three Balls Evolving on a Plane	67
5.2.1	Numerical Examples	69
5.3	Three Balls Evolving in a Box.	73
5.3.1	Numerical Examples	76
	References	76
6	Pedestrian Trajectories and Collisions in Crowd Motion	79
