1	Introduction	1
1.1	Historical Points	1
1.2	Applications and Questions	4
1.3	Outline	8
	References.	9
2	The SD Oscillator	11
2.1	Introduction	11
2.2	Unperturbed Oscillator	13
2.3	The Transition from Smooth to Discontinuous Dynamics.	16
2.4	Summary	20
	References.	21
3	Discontinuous Dynamics	23
3.1	Introduction	23
3.2	Static Response of the SD Oscillator	24
3.3	Equation of Motion	26
3.4	Perturbed Discontinuous Dynamics.	28
3.4.1	Semi-analytical Analysis	29
3.4.2	Dissipative Oscillations	30
3.4.3	Undamped Forcing Oscillations.	31
3.4.4	Forced Dynamics.	34
3.5	Summary	39
	References.	40
4	Resonances	43
4.1	Introduction	43
4.2	Time Dependent Hamiltonian	44
4.3	Generalized Winding Number and Resonances.	47
4.4	Summary	50
	References.	50

5	Co-Dimension Two Bifurcation	53
5.1	Introduction	53
5.2	Equilibrium Analysis	54
5.3	Universal Unfoldings	55
5.4	Codimension Two Bifurcations.	59
5.4.1	Universal Codimension Bifurcations	59
5.4.2	SD Oscillator Codimension Bifurcations	61
5.5	Summary	64
	References.	64
6	Wada Basin Dynamics	67
6.1	Introduction	67
6.2	Preliminaries.	69
6.3	The Attractors and Their Basins	71
6.4	Wada Property and the Uncertainty Exponents.	77
6.5	Wada Basin Boundaries	85
6.6	Summary	86
	References.	87
7	Piecewise Linear Approach.	89
7.1	Introduction	89
7.2	Unperturbed Dynamics.	90
7.2.1	Triple Linear Approach.	90
7.2.2	Hamiltonian Function	92
7.2.3	Homoclinic Orbit.	94
7.2.4	Periodic Orbits.	95
7.3	Perturbed System	96
7.3.1	Melnikov Method	96
7.3.2	Semi-analytical Analysis	98
7.3.3	Bifurcation Diagrams and Dynamical Analysis	100
7.4	Summary	102
	References.	102
8	Extended Averaging Method	103
8.1	Introduction	103
8.2	The Averaging Procedure	104
8.2.1	Periodic Solutions Near $(0, 0)$	104
8.2.2	Periodic Solution Near $(\sqrt{1 - \alpha^2}, 0)$	106
8.3	Stability Analysis	107
8.4	Hopf Bifurcations	114
8.5	Summary	119
	References.	120
