| | | |
|----------|---|-----------|
| 1 | Fuzzy Sets Theory and Uncertainty in Mathematical Modeling . . . | 1 |
| 1.1 | Uncertainty in Modeling and Analysis | 1 |
| 1.2 | Fuzzy Subset | 6 |
| 1.3 | Operations with Fuzzy Subsets | 11 |
| 1.4 | Concept of α -Level. | 17 |
| 1.5 | Summary | 21 |
| | References. | 21 |
| 2 | The Extension Principle of Zadeh and Fuzzy Numbers | 23 |
| 2.1 | Zadeh's Extension Principle | 23 |
| 2.2 | Fuzzy Numbers. | 28 |
| 2.2.1 | Arithmetic Operations with Fuzzy Numbers | 31 |
| | References. | 41 |
| 3 | Fuzzy Relations | 43 |
| 3.1 | Fuzzy Relations | 43 |
| 3.1.1 | Forms of Representation and Properties of the Binary Relations | 46 |
| 3.2 | Composition Between Binary Fuzzy Relations | 48 |
| | References. | 51 |
| 4 | Notions of Fuzzy Logic | 53 |
| 4.1 | Basic Connectives of Classical Logic | 54 |
| 4.2 | Basic Connectives of Fuzzy Logic | 58 |
| 4.2.1 | Operations T-Norm and T-Conorm | 58 |
| 4.3 | Approximate Reasoning and Linguistic Variables. | 63 |
| 4.4 | Modus Ponens and Generalized Modus Ponens | 65 |
| 4.5 | Linguistic Modifiers | 69 |
| 4.6 | Independence and Non-interactivity | 73 |
| 4.6.1 | Probabilistic Independence and Non-interactivity | 74 |
| 4.6.2 | Possibilistic Independence and Non-interactivity | 75 |
| 4.6.3 | The Conditional Distributions and Modus Ponens. | 76 |
| | References. | 78 |

|----------|--|-----|
| 5 | Fuzzy Rule-Based Systems | 79 |
| 5.1 | Fuzzy Rule Bases | 81 |
| 5.2 | Fuzzy Controller | 82 |
| 5.2.1 | Fuzzification Module | 82 |
| 5.2.2 | Base-Rule Module | 82 |
| 5.2.3 | Fuzzy Inference Module | 82 |
| 5.2.4 | Defuzzification Module | 83 |
| 5.3 | Mamdani Inference Method | 84 |
| 5.4 | Defuzzification Methods | 87 |
| 5.4.1 | Centroid or Center of Mass or Center of Gravity ($G(B)$) | 88 |
| 5.4.2 | Center of Maximum ($C(B)$) | 89 |
| 5.4.3 | Mean of Maximum ($M(B)$) | 89 |
| 5.5 | Takagi–Sugeno–Kang Inference Method (TSK) | 90 |
| 5.6 | Applications | 95 |
| 5.6.1 | Model 1 – Forecasting the Salinity of an Estuary in Cananea and Ilha Comprida | 95 |
| 5.6.2 | Model 2 – Rate of Seropositive Transfer (HIV^+) | 101 |
| 5.6.3 | Model 3 – Pharmacological Decay | 107 |
| | References | 111 |
| 6 | Fuzzy Relational Equations and Universal Approximation | 113 |
| 6.1 | Generalized Compositions of Fuzzy Relations | 114 |
| 6.2 | Fuzzy Relational Equations | 116 |
| 6.2.1 | Fuzzy Relational Equations with the max–min Composition | 116 |
| 6.2.2 | Fuzzy Relational Equations with the sup– t Composition | 118 |
| 6.2.3 | Mathematical Modelling: Medical Diagnosis | 120 |
| 6.3 | Fuzzy Relational Equation and Bayesian Inference | 123 |
| 6.3.1 | Possibility Distribution and Bayesian Inference | 125 |
| 6.3.2 | Possibilistic Rule of Bayes | 126 |
| 6.4 | Universal Approximation | 127 |
| 6.4.1 | Approximating Capability | 128 |
| 6.5 | Applications of Fuzzy Controllers in Dynamic Systems | 131 |
| | References | 133 |
| 7 | Measure, Integrals and Fuzzy Events | 135 |
| 7.1 | Classic Measure and Fuzzy Measure | 136 |
| 7.1.1 | Probability Measure | 136 |
| 7.2 | Fuzzy Measure | 138 |
| 7.3 | Possibility Measure | 140 |
| 7.4 | Probability/Possibility Transformations | 144 |

| | | |
|-----------|---|------------|
| 7.5 | Fuzzy Integrals | 146 |
| 7.5.1 | Lebesgue Integral | 147 |
| 7.5.2 | Choquet Integral | 149 |
| 7.5.3 | Sugeno Integral | 150 |
| 7.6 | Fuzzy Events | 159 |
| 7.6.1 | Probability of Fuzzy Events | 160 |
| 7.6.2 | Independence Between Fuzzy Events | 164 |
| 7.6.3 | Random Linguistic Variable and Fuzzy Random Variable. | 166 |
| | References. | 172 |
| 8 | Fuzzy Dynamical Systems. | 175 |
| 8.1 | Continuous Fuzzy Dynamical Systems | 175 |
| 8.1.1 | Integration and Differentiation of Fuzzy Functions | 177 |
| 8.1.2 | Fuzzy Initial Value Problem (FIVP) | 180 |
| 8.1.3 | Generalized Fuzzy Initial Value Problem (GFIVP) | 184 |
| 8.2 | Discrete Fuzzy Dynamic System | 195 |
| 8.2.1 | Discrete Fuzzy Malthusian Model | 195 |
| 8.2.2 | Discrete Fuzzy Logistic Model | 198 |
| | References. | 201 |
| 9 | Modeling in Biomathematics: Demographic Fuzziness | 205 |

| 10.1 | Life Expectancy and Poverty | 238 |
| 10.1.1 | The Model. | 238 |
| 10.1.2 | Statistical Expectation: $E[n(t)]$ | 239 |
| 10.1.3 | Fuzzy Expectation Value: $FEV\left[\frac{n(t)}{n(0)}\right]$ | 241 |

| | | |
|-----------|--|------------|
| 10.1.4 | Application: Life Expectancy of a Group of Metal Workers in Recife, Pernambuco - Brazil | 242 |
| 10.1.5 | Comparisons of the Statistical Expected Value and the Fuzzy Expected Value | 245 |
| 10.2 | The SI Epidemiological Model | 247 |
| 10.2.1 | The Fuzzy SI Model | 248 |
| 10.2.2 | Expected Value of the Number of Infected Individuals | 250 |
| 10.2.3 | Statistical Expected Values of the Number in Infected | 253 |
| 10.2.4 | $I(FEV[V], t)$ Versus $FEV[I(V, t)]$ | 256 |
| 10.2.5 | Control of Epidemics and the Basic Reproductive Number | 257 |
| 10.3 | A Fuzzy Model of the Transference from Asymptomatic to Symptomatic in HIV ⁺ Patients | 258 |
| 10.3.1 | The Classical Model | 259 |
| 10.3.2 | The Fuzzy Model | 260 |
| 10.3.3 | The Fuzzy Expectation of the Asymptomatic Individuals | 261 |
| 10.4 | Population Dynamics and Migration of Blow Flies | 264 |
| | References | 268 |
| 11 | End Notes | 271 |
| 11.1 | Subtraction of Interactive Fuzzy Numbers | 272 |
| 11.1.1 | Difference Between Fuzzy Numbers | 274 |
| 11.2 | Prey-Predator | 277 |
| 11.2.1 | Prey-Predator with the Minimum t -Norm | 278 |
| 11.2.2 | Prey-Predator with the Hamacher t -Norm | 278 |
| 11.3 | Epidemiological Model | 280 |
| 11.3.1 | SI Model with Minimum t -Norm | 281 |
| 11.3.2 | SI Model with Hamacher t -Norm | 282 |
| 11.4 | Takagi-Sugeno Method to Study the Risk of Dengue | 284 |
| 11.4.1 | Takagi-Sugeno Model | 284 |
| 11.4.2 | Dengue Risk Model | 285 |
| 11.4.3 | Simulations | 288 |
| 11.4.4 | Final Considerations | 289 |
| 11.5 | The SI-model with Completely Correlated Initial Conditions | 290 |
| | References | 293 |
| | Index | 297 |

A First Course in Fuzzy Logic, Fuzzy Dynamical Systems,
and Biomathematics

Theory and Applications

de Barros, L.C.; Bassanezi, R.C.; Lodwick, W.A.

2017, XVI, 299 p. 113 illus., 15 illus. in color., Hardcover

ISBN: 978-3-662-53322-2
