

Contents

1	Introduction	1
1.1	Fluctuations and the Physical Origin of the van der Waals and Casimir Forces	3
1.2	Radiative Heat Transfer	7
1.3	Non-contact Friction	13
2	Surface Electromagnetic Waves	21
2.1	Surface Polaritons	21
2.1.1	<i>s</i> -Polarization (TE)	23
2.1.2	<i>p</i> -Polarization (TM)	24
2.1.3	Some Comments	25
2.1.4	Dispersion Relation	25
3	Theory of the Fluctuating Electromagnetic Field	29
3.1	Electromagnetic Fluctuations at Thermodynamical Equilibrium	29
3.1.1	Electromagnetic Fluctuations and Linear Response Theory	29
3.1.2	Electromagnetic Fluctuations in a Homogeneous Medium	34
3.2	Electromagnetic Fluctuations for Nonequilibrium Systems	38
3.3	Fluctuating Field in the Non-retarded Limit	40
3.3.1	Interaction Energy Between a Charged Particle and a Solid: Image Potential	44
3.3.2	Interaction Energy Between a Neutral Particle and a Solid: van der Waals Interaction	45
3.3.3	Inelastic Electron Scattering from Surfaces	47
4	Spectral Correlation Function for the Electromagnetic Field from Planar Sources	51
4.1	Generalized Kirchhoff Law	51
4.2	The Green's Function Approach	56

4.3	Density of Emitted Electromagnetic Energy	57
4.4	Local Density of States	60
4.5	Coherence Properties of Planar Thermal Sources in the Near-Field	62
4.5.1	Spatial Coherence in the Near-Field	63
4.5.2	Temporal Coherence in the Near-Field	65
4.5.3	Design of Coherent Thermal Sources	66
5	The Casimir Forces	69
5.1	Casimir Calculations	69
5.2	Casimir Forces Between Two Plane-Parallel Surfaces	73
5.2.1	General Formulas	73
5.2.2	Limiting Cases	78
5.2.3	Effect of Temperature	79
5.3	Interaction of a Small Particle with a Plane Surface	81
5.4	Interaction Between Small Particles	86
5.5	Casimir Force Out of Thermal Equilibrium	88
5.5.1	Force Between Identical Bodies	88
5.5.2	Force Between Different Bodies	88
6	Radiative Heat Transfer	91
6.1	The Green's Function Theory	91
6.2	The Scattering Matrix Theory	94
6.3	General Formulas and Limiting Cases	96
6.4	Resonant Photon Tunneling Enhancement of the Radiative Heat Transfer	102
6.5	Adsorbate Vibrational Mode Enhancement of the Radiative Heat Transfer	103
6.6	Vibrational Heating by Localized Photon Tunneling	106
6.7	Radiative Heat Transfer Between a Small Particle and a Plane Surface	111
6.8	Near-Field Radiative Heating in Ion Traps	113
6.9	Radiative Heat Transfer Between Two Dipole Inside a N-Dipole System	116
6.10	Local Heating of the Surface by an Atomic Force Microscope Tip	119
6.11	A Nanoscale 'Heat Stamp'	121
7	Casimir Friction Between Two Plates	123
7.1	Kubo Formula Approach	124
7.2	Quantum Oscillator Model	125
7.3	Casimir Friction Between Two Plane Surfaces in Parallel Relative Motion	129
7.3.1	Discussion of General Formula and Limiting Cases	131

7.4	Casimir Friction Between Two Semi-infinite Solids in Normal Relative Motion	133
7.5	The Case of Good Conductors	137
7.5.1	Parallel Relative Motion	137
7.5.2	Normal Relative Motion	140
7.6	Numerical Results	144
7.7	The Case of Bad Conductors	146
7.8	Resonant Photon Tunneling Enhancement of Casimir Friction	149
7.8.1	Surface Phonon–Polariton Enhancement of Casimir Friction	149
7.8.2	Adsorbate Vibrational Mode Enhancement of the van der Waals Friction	149
8	Casimir Friction Between a Small Particle and a Plane Surface	153
8.1	Friction Force on a Particle Moving Parallel to a Plane Surface: Non-relativistic Theory	153
8.2	Friction Force on a Particle Moving Parallel to Plane Surface: Relativistic Theory	156
8.3	Effect of Multiple Scattering of the Electromagnetic Waves	160
8.4	Friction Force on Physisorbed Molecules	164
8.4.1	Casimir Friction	166
8.4.2	High-Order Processes	167
8.4.3	Comparison of the Theory with Experiment	172
8.5	Force on a Particle in a Thermal Field	175
8.5.1	The Case of Small Velocities	175
8.5.2	Relativistic Case	176
8.5.3	Einstein’s Formula	186
9	Casimir Frictional Drag Force in Low-Dimensional Systems	189
9.1	Introduction	189
9.2	Fluctuating Electromagnetic Field	191
9.3	Casimir Frictional Drag Force Between Two Quantum Wells	195
9.4	Casimir Frictional Drag Induced by Liquid Flow in Low-Dimensional Systems	200
9.4.1	Casimir Frictional Drag Between Two 2D Systems Induced by Liquid Flow	200
9.4.2	Casimir Frictional Drag in a 2D System Induced by Liquid Flow in a Semi-infinite Chamber	202
9.4.3	Casimir Frictional Drag in Low Dimensional Structures Induced by Liquid Flow in Infinite System	204

10	Casimir Forces and Near-Field Radiative Heat Transfer in Graphene Structures.	211
10.1	Introduction	212
10.2	The Casimir Forces in Graphene Systems.	213
10.3	Using Graphene to Detect Quantum Friction	218
10.4	Casimir Frictional Drag Force Between Graphene Sheets.	221
10.5	Near-Field Radiative Heat Transfer Between Closely Spaced Graphene and Amorphous SiO ₂	223
11	Radiation by Uniformly Moving Sources.	227
11.1	Vavilov-Cherenkov Effect.	228
11.2	Photon Emission and Anomalous Doppler Effect	231
11.3	Quantum Friction Between Two Transparent Plates	233
11.4	Quantum Friction Between a Particle and Transparent Plate	238
11.5	Discussion.	241
12	Phononic Heat Transfer at Planar Interfaces	243
12.1	Introduction	243
12.2	Theory	244
12.2.1	Solids	247
12.2.2	Liquids	247
12.2.3	Membranes	247
12.3	Some Limiting Cases	248
12.4	Phonon Heat Transfer at Disordered Interfaces: Friction Model.	250
12.5	Numerical Results.	252
12.5.1	Solid-Solid.	252
12.5.2	Solid-Liquid.	253
12.5.3	Solid-Membrane	253
12.6	Role of Surface Roughness.	258
12.7	Summary	260
13	Heat Transfer: Role of Surface Roughness	261
13.1	Introduction	261
13.2	Theory	265
13.2.1	Heat Transfer Coefficient.	265
13.2.2	Calculation of α .	267
13.2.3	Heat Flow Through the Area of Real Contact.	268
13.2.4	Heat Flow Through the Non-contact Area.	271
13.2.5	(a) Radiative Contribution to α (in Vacuum).	274
13.2.6	(b) Contribution to α from Heat Transfer via the Surrounding Gas or Liquid	277
13.2.7	(c) Contribution to α from Heat Transfer via Capillary Bridges.	278
13.3	Contact Mechanics: Short Review and Basic Equations	279

13.4	Numerical Results.	282
13.5	Role of Adhesion and Plastic Deformation.	284
13.6	Application to Tires	286
13.7	Experimental Test of the Theory.	289
13.8	Experimental Results and Discussion	292
13.9	Electric Contact Resistance.	297
13.10	Summary	297
14	Electrostatic Friction.	299
14.1	Effect of a Bias Voltage and the Spatial Variation of the Surface Potential.	299
14.2	Friction Due to Spatial Fluctuations of Static Charge in the Bulk of the Sample.	306
14.3	Contact Electrification and the Work of Adhesion	307
14.4	Influence of Attractive Force on Cantilever Eigenfrequencies.	316
15	Phonon and Internal Non-contact Friction	321
15.1	Non-contact Friction Due to Excitation of Substrate Phonons	321
15.2	Suppression of Electronic Friction in the Superconducting State	324
15.3	Non-contact Friction Due to the Internal Friction of the Substrate.	328
15.3.1	van der Waals Interaction	329
Appendix A: Spectral Function of Fluctuations of the Electric Fields		331
Appendix B: Fluctuating Electromagnetic Field in the Vacuum Gap Between Two Plane Surfaces Moving Relative to Each Other		333
Appendix C: The Green's Function of the Electromagnetic Field in the Vacuum Gap Between Two Plane Surfaces		337
Appendix D: Reflection Amplitudes for Electromagnetic Waves for Medium with Spatial Dispersion		341
Appendix E: Fresnel's Reflection Amplitude for Surfaces with a Layer of Adsorbed Molecules.		343
Appendix F: Comparison with the Results of Philbin and Leonhardt.		345
Appendix G: Derivation of (7.57) and (7.58).		349
Appendix H: Derivation of the Friction Force on a Particle from the Energy Conservation Law		351

Appendix I: Derivation of (8.47) and (8.48)	355
Appendix J: Calculation of the Casimir Friction Between Plane Surfaces Using Quantum Field Theory	359
Appendix K: Calculation of the Casimir Friction Between a Small Particle and Plane Surface Using Quantum Field Theory	367
Appendix L: Derivation of (8.77).	371
Appendix M: Reflection Amplitudes for a 2D Quantum Well	373
Appendix N: Quantum VC Radiation in the Plate-Plate Configuration	375
Appendix O: Quantum VC Radiation in the Particle–Plate Configuration	379
Appendix P: Phononic Heat Transfer at Planar Interfaces	385
Appendix Q: Heat Transfer: Role of Surface Roughness.	395
Appendix R: Friction Coefficient for Point Charges Moving Relative to a Plane Surface: Non-relativistic Theory	399
Appendix S: Attracting Force Between a Tip and a Flat Surface of a Body	401
Appendix T: Friction Coefficient due to Excitation of the Acoustic Waves	403
