1	An Introduction to Remote Sensing	1
1.1	Introduction	1
1.2	History of Remote Sensing	3
1.3	Electromagnetic Radiation (EMR)	4
1.3.1	Particle Model	4
1.3.2	Wave Model	4
1.3.3	Amplitude	5
1.3.4	Phase	6
1.3.5	Polarization	6
1.4	Electromagnetic Spectrum	8
1.4.1	The Ultraviolet Spectrum	8
1.4.2	The Visible Spectrum	9
1.4.3	The Infrared Spectrum	9
1.4.4	The Microwave Spectrum	9
1.5	Energy–Matter Interactions in the Atmosphere	10
1.5.1	Scattering	10
1.5.1.1	Rayleigh Scattering	11
1.5.1.2	Mie Scattering	11
1.5.1.3	Non selective Scattering	11
1.5.2	Absorption	12
1.5.3	Emission	12
1.6	Atmospheric Windows	12
1.6.1	Atmospheric Windows in Optical Range	13
1.6.2	Atmospheric Windows in Thermal IR Region	14
1.6.3	Atmospheric Windows in Microwave Region	14
1.7	Energy–Matter Interactions with the Terrain	15
1.7.1	Reflection Mechanism	16
1.7.2	Transmission Mechanism	17
1.7.3	Absorption Mechanism	18

1.7.4	Emission Mechanism	19
1.8	Electromagnetic Radiation Laws	19
1.8.1	Planck's Law	19
1.8.2	Stefan–Boltzmann Law	20
1.8.3	Wein's Radiation Law	22
1.8.4	Rayleigh–Jeans Law	22
1.8.5	Kirchhoff's Law	23
1.9	Spectral Response Pattern	23
1.10	Imaging Spectrometry	24
1.11	Geographical Information System (GIS)	27
1.11.1	Components of a GIS	27
1.11.2	GIS Database	28
1.11.3	Location Data	28
1.11.4	Attribute Data	29
1.11.5	Data Representation in GIS.	29
1.11.5.1	Topology	29
1.11.5.2	Layers and Coverages.	30
1.11.6	Spatial Analysis	30
1.11.7	Map Projections and Coordinate Systems	30
1.11.7.1	Conformal Projection: Shape Preserving	31
1.11.7.2	Equal Area Projection: Area Preserving	31
1.11.7.3	Equidistant Projection: Distance Preserving.	31
1.11.7.4	True-Direction Projection: Direction Preserving.	31
1.12	Global Navigation Satellite Systems (GNSSs)	32
1.12.1	Basic Principles	33
1.12.2	GNSS Segments	34
1.12.3	Positioning Determination.	36
1.13	Remote Sensing System.	37
1.13.1	The Source of Illumination	38
1.13.2	The Sensor	38
1.13.3	Platforms.	39
1.13.4	Data Reception	39
1.13.5	Data Product Generation.	40
1.13.6	Data Analysis/Interpretation	40
1.13.7	Data/Information Storage	41
1.13.8	Archival and Distribution	41
1.14	Resolution Requirements	42
1.14.1	Spatial Resolution	43
1.14.2	Spectral Resolution	44

1.14.3	Radiometric Resolution	44
1.14.4	Temporal Resolution	44
1.14.5	Angular Resolution	45
1.15	Organization of This Book	45

2	Earth Observation Systems	49
2.1	Introduction	49
2.2	Sensing Platforms	49
2.2.1	Airborne Platforms	50
2.2.2	Spaceborne Platforms	51
2.2.2.1	Near-Polar Orbits	51
2.2.2.2	Geosynchronous Orbits	52
2.3	Sensors	53
2.3.1	Optical Sensors	53
2.3.1.1	Photographic Cameras	53
2.3.1.2	Digital Aerial Cameras	55
2.3.1.3	Video Cameras	56
2.3.1.4	Radiometers	56
2.3.1.5	Electro-Optical Scanners	57
2.3.2	Microwave Sensors	58
2.3.2.1	Passive Microwave Sensors	58
2.3.2.2	Active Microwave Sensors	59
2.3.3	LiDAR	64
2.4	The Ground Segment	66
2.5	Earth-Observing Systems (EOS)	67
2.5.1	The Landsat System	67
2.5.1.1	The First Landsat Series	67
2.5.1.2	The Second Landsat Series	68
2.5.1.3	The Third Landsat Series	68
2.5.1.4	Multi-sensor Formation Concept	70
2.5.2	Satellite Pour l'Observation de la Terre (SPOT)	71
2.5.2.1	The First SPOT Series	72
2.5.2.2	The Second SPOT Series	73
2.5.2.3	The Third SPOT Series	75
2.5.3	PLÉIADES Systems	75
2.5.4	The Indian Remote Sensing Satellites (IRS) Mission	76
2.5.4.1	The IRS Series of Satellites	76
2.5.4.2	Resourcesat-1	77
2.5.4.3	Resourcesat-2	80
2.5.5	China–Brazil Earth Resources Satellite (CBERS) Programme	80

	2.5.5.1	CBERS-1 and -2	81
	2.5.5.2	CBERS-2B	83
	2.5.5.3	CBERS-3 and CBERS-4	84
2.5.6		Formosat Satellite Mission	84
	2.5.6.1	Formosat-1	84
	2.5.6.2	Formosat-2	84
2.5.7		The Earth Observing System Mission	85
	2.5.7.1	Terra (EOS-AM)	85
	2.5.7.2	Aqua (EOS PM)	87
2.5.8		Earth Observing-1 (EO-1) Mission	88
2.5.9		RapidEye	90
2.5.10		High Spatial Resolution Remote Sensing Systems	91
	2.5.10.1	Earlybird and QuickBird	91
	2.5.10.2	Ikonos	91
	2.5.10.3	Orbview-3	91
	2.5.10.4	Cartosat Mission	92
	2.5.10.5	GeoEye-1	94
	2.5.10.6	WorldView Missions	95
2.6		The NOAA Missions	97
2.6.1		JPSS Satellites	99
2.7		Spaceborne Imaging Microwave Systems	99
	2.7.1	Seasat	99
	2.7.2	European Remote Sensing Satellite (ERS-1 and -2)	100
	2.7.3	Sentinel-1	100
	2.7.4	Japanese Earth Resources Satellite (JERS-1)	101
	2.7.5	Advanced Land Observation Satellite (ALOS-1)	101
	2.7.6	Radarsat Missions	104
	2.7.6.1	Radarsat-1	104
	2.7.6.2	Radarsat-2	104
	2.7.6.3	RADARSAT Constellation Mission (RCM)	105
	2.7.7	Envisat	105
	2.7.8	Radar Imaging Satellite (RISAT) Missions	107
	2.7.8.1	Radar Imaging Satellite (RISAT-2)	108
	2.7.8.2	Radar Imaging Satellite (RISAT-1)	109
	2.7.9	Soil Moisture and Ocean Salinity Mission (SMOS)	109
	2.7.9.1	Measurement Principle	111
	2.7.10	Soil Moisture Active Passive Mission (SMAP)	112
2.8		Conclusions	113

3	Digital Image Processing	117
3.1	Introduction	117
3.2	Data Storage Media	118
3.2.1	Compact Disc (CDs)	119
3.2.2	Digital Versatile Disk (DVD)	120
3.2.3	Memory Sticks	120
3.3	Digital Data Format	120
3.3.1	Generic Binary	121
3.3.2	GIF	121
3.3.3	JPEG	121
3.3.4	TIFF and GeoTIFF	122
3.4	Image Restoration	122
3.4.1	Geometric Correction	123
3.4.1.1	Correction for Systemic Distortions	123
3.4.1.2	Correction of Nonsystemic Errors	124
3.4.2	Radiometric Correction	125
3.4.3	Corrections for Solar Illumination Variation	128
3.4.4	Noise Removal	129
3.5	Image Enhancement	134
3.5.1	Contrast Manipulation	135
3.5.2	Density Slicing	135
3.5.3	Linear Enhancement	136
3.5.3.1	Piece-wise Linear Enhancement	136
3.5.4	Look-up Table	137
3.5.5	Nonlinear Stretching	137
3.5.6	Histogram Equalization	138
3.5.7	Histogram Matching	139
3.5.8	Spatial Filtering	139
3.5.9	Image Smoothing	140
3.5.10	Edge Enhancement and Detection	143
3.6	Multiple Image Manipulation	143
3.6.1	Band Ratioing	144
3.6.2	Vegetation Index (Components)	145
3.6.3	Image Transformation	146
3.6.3.1	Principal Component Analysis	146
3.6.3.2	Tasseled Cap Transformation	146
3.6.3.3	Digital Image Fusion Techniques	148
3.7	Image Classification	151
3.7.1	Unsupervised Classification	152
3.7.1.1	Moving Cluster Analysis	152
3.7.1.2	Iterative Self-organizing Data Analysis (ISODATA)	152
3.7.1.3	Agglomerative Hierarchical Clustering	152

3.7.1.4	Histogram-Based Clustering	153
3.7.1.5	AMOEBA	153
3.7.2	Supervised Classification.	153
3.7.2.1	Parallelepiped Classification	153
3.7.2.2	Minimum Distance Classification	154
3.7.2.3	Maximum Likelihood Classification	154
3.7.2.4	Classification and Regression Tree Analysis	154
3.7.2.5	Fuzzy Clustering.	155
3.7.2.6	Artificial Neural Networks	156
3.7.2.7	Contextual Classification	157
3.7.2.8	Object-Oriented Classification	158
3.7.2.9	Iterative Guided Spectral Class Rejection	159
3.7.2.10	Other Classifiers	159
3.8	Accuracy Assessment.	159
3.9	Conclusion.	162
