1	History of Biogas Production in China	1
1.1	The History of Biogas in China	4
1.2	Significance of Developing Biogas in China	4
1.3	Policies for Biogas Projects	5
1.3.1	Energy Policies for Biogas Projects	5
1.3.2	Environmental Policies for Biogas Projects	6
1.3.3	Economic Policies for Biogas Projects	7
1.3.4	Standards for Biogas Projects	8
1.4	Development of Biogas Industrialization	10
1.4.1	Introduction of Biogas Production	10
1.4.2	Biogas Plant Industry	12
1.4.3	Biogas Equipment Industry	12
1.4.4	Biogas Service Industry	12
1.5	Development Planning for Biogas Production	13
1.5.1	Developing Motion of Biogas Production	13
1.5.2	Rural Biogas Development Policies	14

2.1	Life-Cycle Assessment (LCA)	17
2.1.1	Background of LCA	17
2.1.2	Methodology of LCA	19
2.1.3	LCA-Based Integrated Evaluation Indices	20
2.2	Economic Assessment	22
2.2.1	Cost–Benefit Analysis	22
2.2.2	Data Envelopment Analysis (DEA)	23
2.3	Emergy Analysis	25

2.3.1	Emergy Concept	25
2.3.2	Emergy Diagram	26
2.3.3	Emergy Indices	26
2.3.4	Emergetic Ternary Diagrams	29
2.4	Extended Exergy Analysis	30
2.4.1	Extended Exergy Analysis Framework	30
2.4.2	Extended Exergy-Based Sustainability Indexes	31
2.5	Analytic Hierarchy Process	34
	References	34
3	Four Typical Biogas Systems in China	37
3.1	“Six-in-One” Biogas System (SIOBS)	37
3.1.1	Biogas Plant Construction Stage	38
3.1.2	Biogas Plant Maintenance Stage	38
3.1.3	Feedstock Supply Stage	39
3.1.4	Biogas Energy Utilization Stage	39
3.1.5	Digestate Processing Stage	39
3.2	Biogas-Persimmon Cultivation and Processing System (BCPS)	40
3.2.1	Biogas Infrastructure (Fraction I)	41
3.2.2	Biogas System Operation (Fraction II)	41
3.2.3	Digestate Reuse for Persimmon Cultivation (Fraction III)	42
3.2.4	Biogas Utilization for Persimmon Processing (Fraction IV)	43
3.3	Wastewater Treatment Plants (WWTPs)	44
3.3.1	WWTP Construction Stage	44
3.3.2	WWTP Operation and Maintenance Stage	44
3.3.3	Biogas–Sludge Use Stage	45
3.4	“Three-in-One” Biogas Project	45
	References	47
4	Environment Emissions of Household Biogas Project	49
4.1	Biogas-Persimmon Cultivation and Processing System (BCPS)	49
4.1.1	Emissions Inventory	49
4.1.2	GHG Emissions Mitigation	51
4.2	Wastewater Treatment Plants (WWTPs)	52
4.2.1	Emissions Inventory	52
4.2.2	Environmental Impact Mitigation	52
4.3	‘Six in One’ Biogas System (SIOBS)	56
4.3.1	System Inventory	57
4.3.2	Overall Environmental Evaluation	58
4.3.3	Sensitivity Analysis	59
4.3.4	Digestate Reuse	60

4.3.5	Environmental Benefit Under Different Scenarios	62
	References.	63
5	Energy Evaluation of Household Biogas Project.	65
5.1	Life-Cycle Energy Evaluation.	65
5.2	Case Study of BCPS	66
5.3	“Six in One” Biogas System (SIOBS)	68
5.3.1	Overall Energy Evaluation	68
5.3.2	Sensitivity Analysis.	68
5.3.3	Environmental Benefit Under Different Scenarios	69
5.3.4	Digestate Reuse.	70
5.4	Wastewater Treatment Plants (WWTPs).	70
5.4.1	Energy Input–Output Analysis	70
5.4.2	System Energy Production	70
5.4.3	Sensitivity Analysis.	72
