

Contents

1	Introduction	1
1.1	Background	1
1.2	Cosmic Rays	3
1.3	Cosmic Ray Acceleration in Supernova Remnants	5
1.3.1	Kinetic Energy Budget	5
1.3.2	Diffusive Shock Acceleration	6
1.4	Radiative Processes of High Energy Cosmic Rays	9
1.4.1	Synchrotron Radiation	10
1.4.2	Inverse Compton Scattering	12
1.4.3	π^0 -Decay Emission	12
1.5	Association Between SNRs and the Interstellar Gas	14
1.5.1	Overview of Previous Studies	14
1.5.2	Previous Studies of the Young SNR RX J1713.7–3946	17
1.6	Thesis Outline	22
	References	22
2	Non-thermal X-Ray Enhancement Around Dense Gas Clumps	25
2.1	Datasets of CO, H _I , and X-Rays	26
2.1.1	CO	26
2.1.2	H _I	28
2.1.3	X-Rays	28
2.2	Analysis	30
2.2.1	Large-Scale CO, H _I , and X-Ray Distributions	30
2.2.2	Detailed Comparison with X-Ray Data	36
2.2.3	Sub-Millimeter Results; $^{12}\text{CO}(J = 4-3)$ Distribution	47
2.2.4	$^{12}\text{CO}(J = 4-3)$ Broad Wings	48
2.3	Analysis of Detailed Molecular Properties	51
2.3.1	LVG Analysis	51
2.3.2	Density Distribution of Clump C	53
2.3.3	Physical Parameters of the Outflow	54

2.4	Discussion	55
2.5	Conclusions	58
	References.	59
3	Evidence for the Acceleration of Cosmic Ray Protons	63
3.1	Datasets of CO, H _i , and VHE γ -rays	64
3.1.1	CO	64
3.1.2	H _i	65
3.1.3	VHE γ -rays.	65
3.2	Combined Analysis of the CO and H _i Data	65
3.2.1	Distribution of CO and H _i	65
3.2.2	Molecular Protons.	67
3.2.3	Atomic Protons	68
3.2.4	Total ISM Protons.	73
3.2.5	γ -rays and the ISM Protons	74
3.3	Discussion	78
3.3.1	The Evacuated Cavity by the Stellar Wind	78
3.3.2	γ -ray Emission Mechanism.	80
3.4	Conclusions	82
	References.	83
4	Evidence for Efficient Acceleration of Cosmic Rays	85
4.1	Observations and Data Reductions	85
4.1.1	X-Rays	85
4.1.2	CO and H _i	88
4.2	Results	90
4.2.1	Typical X-Ray Spectra	90
4.2.2	Spatial and Spectral Characterization of the X-Rays	90
4.2.3	Comparison with the ISM: The X-Ray Flux, Photon Index, and ISM.	92
4.3	Discussion	95
4.3.1	Spatial Variation of the Absorbing Column Density	95
4.3.2	Relationship Among the X-Ray Flux, Photon Index, and X-Ray Absorption/ ISM.	97
4.4	Conclusions	102
	References.	103
5	Summary and Future Prospects	105
5.1	Summary of the Thesis.	105
5.2	Future Prospects	108
5.2.1	Further Expansion Our Studies into Analysis of Other SNRs	108
5.2.2	Resolving the Small-Scale Structure of SNR RX J1713.7–3946.	111
5.2.3	More Detailed Analyses from a Viewpoint of Numerical Simulations	111

5.2.4 Shock Speed Measurement Toward Southeastern Rim of RX J1713.7–3946	111
5.2.5 Search for Thermal X-Rays in Synchrotron Dominant SNRs	112
References.	112
Appendix A: Velocity Channel Distributions in RX J1713.7–3946	115
Appendix B: Expanding Motion of the Dark Hα SE Cloud	123
Appendix C: Analysis of the Hα Emission; The Optically Thin Case . . .	127
Appendix D: The Background Level of X-Rays	131
Appendix E: X-Ray Absorption by the ISM Affects the X-Ray Images	133

Shock-Cloud Interaction in RX J1713.7–3946
Evidence for Cosmic-Ray Acceleration in the Young VHE
 γ -ray Supernova Remnant
