

Contents

Part I Current Status of R&D on Tritium Fueling (Including Breeding) Systems

1	Introduction of a Nuclear Fusion Reactor	3
	Tetsuo Tanabe	
2	Characteristics of Tritium	27
	Tetsuo Tanabe	
3	Fuel Flow and Balance in a D–T Fusion Reactor	49
	Tetsuo Tanabe and Masabumi Nishikawa	
4	Burning Plasma	73
	Yasuyuki Nakao	
5	Behavior of Fuels in Reactor	93
	Tetsuo Tanabe	

Part II Tritium Handling (Fueling) and Processing

6	Tritium Fueling System	119
	Toshihiko Yamanishi	
7	Tritium Measurement I—Tritium in Gas, Liquid, and Solid	137
	Masanori Hara, Yoshinori Kawamura and Tetsuo Tanabe	
8	Tritium Measurement II—Tritium in Plasma	165
	Hideki Zushi	
9	Permeation and Permeation Barrier	207
	Yuji Hatano	
10	Contamination and Decontamination	231
	Kanetsugu Isobe	

11	Isotope Separation System (ISS)	243
	Toshihiko Yamanishi	
12	Evaluation Method of Tritium Breeding Ratio Using Neutron Transport Equation	257
	Hideaki Matsuura and Masabumi Nishikawa	
13	Recovery of Tritium Bred in Blanket	273
	Kazunari Katayama and Masabumi Nishikawa	
Part III Tritium Issues Relating Safety		
14	Safety Confinement System	297
	Kazunari Katayama and Masabumi Nishikawa	
15	Behavior of Tritium Released to the Environment	331
	Kazuyuki Noborio and Tetsuo Tanabe	
	Index	357

Tritium: Fuel of Fusion Reactors

Tanabe, T. (Ed.)

2017, XII, 365 p. 167 illus., 101 illus. in color.,

Hardcover

ISBN: 978-4-431-56458-4
