

Preface

The bulk of the work embodied in this book was undertaken in April 2012 and continued over a period of three years up to September 2015, as the project entitled “Economies of Education”, under the group “Cultural Resources and Social Science”, under the UGC scheme of “The University with Potential For Excellence”. I am deeply indebted to the programme authority for providing the necessary funding to complete the work. I would like to thank Finance Officer of the Jadavpur University for regular release of funds which facilitated the smooth functioning of the project programme and thereby led to the completion of the work as designed. I would also like to thank Prof. Ajitava Raychaudhuri, Professor, Department of Economics, Jadavpur University and Joint Coordinator, Cultural Resources and Social Science Programme under UPE II, for his encouragement, constructive suggestions and support which gave the project the status of a book.

My heartiest thanks to Smt. Amrita Bhanja, Research Assistant of the project for her sincere support.

I owe an intellectual debt to Prof. Subhash Ray, University of Connecticut, USA, whose academic input made it possible to include the Nonparametric Data Envelopment Analysis, as a tool for the measurement of efficiency problem of India’s education sector. Discussions with Professor Ray and his constructive criticisms and suggestions were very helpful.

It is not possible to mention the names of all the officials, colleagues, and friends, who contributed and helped during the course of this project. But I would like to mention specifically the encouragement and support given by Dean, Faculty of Arts at Jadavpur University, the coordinators – Prof. M.K. Mitra, Prof. Dipankar Sanyal – of UPE II programme, and Prof. Nilanjana Gupta, Joint coordinator of Cultural Resource and Social Science programme of UPE II, for their support during the project whenever necessary.

Thanks also to honourable Vice-Chancellor and Registrar of Jadavpur University and all the faculty members of the Department of Economics, Jadavpur University, for their co-operation whenever needed. The author would also like to thank the members of Central and Departmental Libraries of Jadavpur University, as well as Library members of Indian Statistical Institute of Kolkata and Delhi Centre, Centre

for Studies in Social Science, Kolkata, Bureau of Applied Economics and Statistics Kolkata, Indian Institute of Management Kolkata, and Jawaharlal Nehru University, New Delhi.

The contents of this book is the revised version of the papers presented at the three International conferences: (i) 12th International DEA Conference of International DEA Association, held at Kuala Lumpur, Malaysia, during April 15–17, 2014, (ii) Fourth CESI International Conference, 2013, held at Indian Statistical Institute Kolkata, and organized by Department of Economics, Calcutta University, in association with Indian Statistical Institute Kolkata, Pratichi Institute and Institute of Development Studies Kolkata, during December 28–30, 2013, (iii) the 50th Annual conference of the Indian Econometric Society, organized by Indira Gandhi Institute of Development and Research, Mumbai, during December 22–24, 2013. The earlier version was also presented at a workshop organized by the Department of Economics, Jadavpur University, in April 2013. The suggestions made by the participants of those conferences and the workshop and by Prof. Sarmila Banerjee and Dr. Robindranath Mukherjee of Calcutta University are gratefully acknowledged.

Last but not the least, my gratitude goes to my family members. Though the death of my husband, Dr. Shyamal Kumar Ghose (Professor of Genetics, Head, Department of Genetics, B.C. Agricultural University, West Bengal) is a terrible loss to me, I can visualize his invisible continuous encouragement, extreme patience and moral support, which has sustained me and my work at all times.
