| | | |
|----------|---|-----------|
| 1 | Network Performance and Fault Analytics for LTE Wireless Service Providers | 1 |
| 1.1 | Introduction | 1 |
| 1.2 | Motivation | 1 |
| 1.3 | Current Performance and Fault Management Architectures | 8 |
| 1.4 | Proposed Next-Generation Performance and Fault Management Architectures | 9 |
| 1.5 | Summary of Gaps in Current Network Performance and Fault Tools and Analytics | 12 |
| 1.6 | Book Outline | 13 |
| 2 | Analytics Fundamentals | 15 |
| 2.1 | Statistical Process Control | 15 |
| 2.1.1 | Central Limit Theorem | 15 |
| 2.1.2 | Applications of Central Limit Theorem: Bernoulli Trials | 17 |
| 2.1.3 | Examples of SPC for Bernoulli Trials | 17 |
| 2.2 | Outliers | 19 |
| 2.2.1 | QoS Outliers | 20 |
| 2.2.2 | Outliers: What Are They? | 21 |
| 2.2.3 | Outlier Detection: The Basic Approach | 21 |
| 2.2.4 | Advanced Methods of Outlier Detection | 23 |
| 2.3 | A Few Words About Queueing Systems | 23 |
| 2.3.1 | “True” Process Distributions for LTE Network Components | 25 |
| 2.3.2 | Little’s Law: The “Big Three” of Queueing Dynamics | 25 |
| 2.3.3 | System Performance Laws | 28 |
| 2.3.4 | Conclusion | 30 |
| 2.4 | Forecasting | 30 |
| 2.4.1 | Time Series: Definition and Assumptions | 31 |

| | | |
|----------|--|-----------|
| 2.4.2 | Filling in the Gaps in Data | 32 |
| 2.4.3 | Moving Averages | 34 |
| 2.4.4 | EWMA | 35 |
| 2.4.5 | EWMA Forecasting | 35 |
| 2.4.6 | ARIMA Forecasting | 39 |
| 2.4.7 | Selection of Forecasting Model | 39 |
| 2.5 | Regression | 40 |
| 2.5.1 | A Few Words on Terminology | 41 |
| 2.5.2 | Linearizable Relationships | 41 |
| 2.5.3 | The Main Idea Behind Regression | 43 |
| 2.5.4 | Solving Eq. (2.5.2) | 44 |
| 2.5.5 | Goodness of Fit | 45 |
| 2.5.6 | Model Competition | 45 |
| 2.5.7 | Analysis of Residuals | 47 |
| 2.5.8 | Advanced Regression Methods | 50 |
| 2.5.9 | Do We Have to Compete? | 53 |
| 2.6 | Clustering | 54 |
| 2.6.1 | Bundling the Curves | 55 |
| 2.6.2 | Geographic Clustering | 58 |
| 2.6.3 | Geographic Clustering of Signal | 58 |
| 2.7 | Conclusion | 60 |
| | References | 60 |
| 3 | Evolved Universal Terrestrial Radio Access Network (EUTRAN) | 61 |
| 3.1 | RAN Architecture | 61 |
| 3.1.1 | Evolved Node B | 62 |
| 3.1.2 | Centralized RAN | 63 |
| 3.1.3 | Home eNB | 64 |
| 3.2 | Air Interface Specifications | 64 |
| 3.2.1 | Radio Access Fundamentals | 64 |
| 3.2.2 | Downlink Channel Structure | 66 |
| 3.2.3 | Uplink Channel Structure | 66 |
| 3.2.4 | LTE Mobility | 67 |
| 3.3 | Evolved Node B—Base Station | 68 |
| 3.3.1 | Baseband Processing | 69 |
| 3.3.2 | LTE Scheduler | 70 |
| 3.4 | RAN Network Management Model | 71 |
| 3.4.1 | Performance Management | 72 |
| 3.4.2 | Fault Management | 73 |
| 3.4.3 | Configuration Management | 74 |
| 3.5 | RAN Network Key Performance Indicators and Analyses | 75 |
| 3.5.1 | Accessibility | 76 |
| 3.5.2 | Retainability | 76 |

| | | |
|----------|---|------------|
| 3.5.3 | Integrity | 77 |
| 3.5.4 | Availability | 78 |
| 3.5.5 | Mobility | 78 |
| 3.6 | Summary | 81 |
| 4 | Enhanced Packet Core Network | 83 |
| 4.1 | EPC Architecture | 83 |
| 4.1.1 | SAE Gateways | 85 |
| 4.1.2 | Mobility Management Entity | 86 |
| 4.1.3 | Policy and Charging Resource Function (PCRF) | 87 |
| 4.1.4 | Home Subscription Server (HSS) | 89 |
| 4.1.5 | Application Services Domain (AS) | 89 |
| 4.2 | EPC Interfaces Specifications | 90 |
| 4.2.1 | S1-U Interface | 90 |
| 4.2.2 | S1-C Interface | 91 |
| 4.2.3 | S5/S8 and SGi Interfaces | 92 |
| 4.2.4 | Gx/Gxc and Rx Interfaces | 93 |
| 4.3 | EPC Network Management Model | 94 |
| 4.3.1 | MME Mobility Measurements | 94 |
| 4.3.2 | MME Session and Subscriber Management | 96 |
| 4.3.3 | SGW Measurements | 97 |
| 4.3.4 | PDN-GW Management | 98 |
| 4.3.5 | PCRF-Related Measurement | 98 |
| 4.4 | EPC Key Performance Indicators and Analyses | 99 |
| 4.4.1 | MME Accessibility, Mobility, and Capacity | 99 |
| 4.4.2 | SGW and PGW Capacity and Connectivity | 99 |
| 4.4.3 | Service-Specific Performance and Analyses | 100 |
| 4.5 | Summary | 102 |
| 5 | Overview of IP Transport Network Architectures—Backhaul, Metro, and Core Network | 103 |
| 5.1 | Ethernet Backhaul Network Architectures | 105 |
| 5.1.1 | Ethernet Network Analytics—Optimal Hub Sites | 108 |
| 5.1.2 | Ethernet Backhaul Network Analytics—Measuring Actual Customer Experience | 109 |
| 5.1.3 | Backhaul Analytics Insights | 111 |
| 5.2 | Core and Metro Network Architectures | 113 |
| 5.2.1 | Core and Metro Network Elements—ROADMS | 120 |
| 5.2.2 | Core and Metro Network Elements—IP/MPLS Routers | 121 |
| 5.2.3 | Core and Metro Transport Links | 121 |
| 5.2.4 | Core and Metro Network Analytics and SDN | 122 |
| 5.2.5 | Multilayer Network Performance Correlation | 122 |
| 5.3 | TCP Analytics | 129 |
| 5.4 | QoS Analytics | 131 |

| | | |
|----------|--|------------|
| 5.5 | Network Analytics and SDN | 134 |
| 5.6 | Summary | 135 |
| 6 | Advanced Analytics | 137 |
| 6.1 | Statistical Process Control for E-UTRAN KPIs | 137 |
| 6.1.1 | Retainability | 137 |
| 6.1.2 | The KPIs: UL and DL Throughputs | 142 |
| 6.1.3 | The KPIs: UL and DL Latencies | 144 |
| 6.1.4 | Nonparametric SPC—A Cleaner Way to Show the UCL and LCL of the Non-normal Variable | 145 |
| 6.1.5 | The KPIs: Availability | 147 |
| 6.1.6 | The KPIs: Mobility | 147 |
| 6.2 | Real-World Outliers | 148 |
| 6.2.1 | Introduction | 148 |
| 6.2.2 | Advantages of Tukey’s Method | 151 |
| 6.2.3 | Disadvantages | 151 |
| 6.2.4 | Practical Use Cases | 151 |
| 6.2.5 | Aggregating Data | 155 |
| 6.3 | Queueing and LTE Data | 157 |
| 6.3.1 | User Throughput | 157 |
| 6.3.2 | Effects of Data Transformations on Distributions | 158 |
| 6.3.3 | Retransmissions | 160 |
| 6.3.4 | Router Load Balancing/Scheduling | 162 |
| 6.4 | Conclusion | 164 |
| | References | 165 |
| 7 | Next Generation Network Performance and Fault Analytics Management Systems | 167 |
| 7.1 | Overview | 167 |
| 7.1.1 | Network Measurements | 168 |
| 7.1.2 | Standards | 170 |
| 7.2 | Network Performance and Fault Management Systems Architectures | 171 |
| 7.2.1 | Incremental Migration to Next-Generation Performance and Fault Analytics Platform—Integration of Existing NMS Systems at Top Layer | 172 |
| 7.3 | Design Considerations for Carrier Grade Network Analytics System Optimized for Performance and Cost | 175 |
| 7.3.1 | Carrier Grade Network Performance and Fault Analytics System Features and Functionalities | 176 |
| 7.3.2 | TS 32.401—Performance Management Concept and Requirements | 177 |
| 7.4 | Network Traffic Analytics Architectures | 178 |
| 7.5 | Network Analytics Engine | 179 |

| | | |
|----------|---|------------|
| 7.5.1 | Current Approach | 180 |
| 7.5.2 | Limitations of Current Approach | 180 |
| 7.5.3 | Proposed Approach | 181 |
| 7.6 | Summary | 182 |
| 8 | Self Organizing Networks (SON) | 183 |
| 8.1 | SON Introduction. | 184 |
| 8.1.1 | Self-configuration | 184 |
| 8.1.2 | Self-optimization | 185 |
| 8.1.3 | Self-healing | 186 |
| 8.2 | SON Architecture. | 186 |
| 8.2.1 | eNB SON Functionalities | 187 |
| 8.2.2 | Centralized SON Functionalities. | 188 |
| 8.2.3 | Hybrid SON Control Mechanism | 189 |
| 8.3 | Self-optimization Features | 189 |
| 8.3.1 | Mobility Robustness Optimization | 190 |
| 8.3.2 | Mobility Load Balancing | 192 |
| 8.3.3 | Coverage and Capacity Optimization | 193 |
| 8.4 | SON Deployment and Performance Benefits | 194 |
| 8.4.1 | SON Deployment | 195 |
| 8.4.2 | Performance Benefits | 198 |
| 8.5 | Evolved Network Architecture. | 199 |
| 8.6 | Summary | 200 |
| 9 | Summary | 201 |
| 9.1 | LTE Wireless Network Element. | 201 |
| 9.2 | Analytics | 202 |
| 9.3 | Solutions | 202 |

Network Performance and Fault Analytics for LTE

Wireless Service Providers

Kakadia, D.; Yang, J.; Gilgur, A.

2017, XVIII, 204 p. 146 illus., Hardcover

ISBN: 978-81-322-3719-8
