

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	About Protocells	1
1.2	Why Modelling Protocells	3
1.3	Collective Self-Replication	5
1.4	Self-Replication in a Vesicle	7
1.5	Self-Replication in a Reproducing Protocell	11
<b>2</b>	<b>Generic Properties of Dynamical Models of Protocells</b>	15
2.1	Introduction	15
2.2	Generic Properties of Biological Systems: Data	17
2.3	Generic Properties of Biological Systems: Concepts	19
2.4	What Shall We Model	24
<b>3</b>	<b>Dynamical Models of Protocells and Synchronization</b>	29
3.1	Simplified Surface-Reaction Models of Protocells	29
3.2	Synchronization in Surface Reaction Models	32
3.3	Several Linearly Interacting Replicators	41
3.4	Several Interacting Replicators with Nonlinear Interactions	48
3.5	Internal Reaction Models	52
<b>4</b>	<b>Models of Self-Replication</b>	61
4.1	Introduction	61
4.2	Autocatalytic Sets	65
4.3	The Properties of Some Replication Models	70
4.3.1	Quasispecies and the Error Catastrophe	70
4.3.2	Hypercycles	74
4.3.3	The Arrival of New Species from Outside	77
4.4	Products and Substrates	80
4.4.1	Synthesizing Catalysts and Substrates	80
4.4.2	The Rise of Autocatalytic Structures	82
4.4.3	The Dynamical Model	84

4.4.4	The Experiments . . . . .	88
4.4.5	An Unexpected Fragility . . . . .	93
4.5	Reflexive Autocatalytic Food-Generated (RAF) Sets . . . . .	94
4.5.1	RAF Sets in Kauffman Random Topologies . . . . .	98
4.5.2	A Taxonomy of RAF Sets . . . . .	100
<b>5</b>	<b>A Stochastic Model of Growing and Dividing Protocells . . . . .</b>	<b>105</b>
5.1	Semipermeable Protocells . . . . .	107
5.2	The Role of Active Membranes . . . . .	112
5.3	The Effects of Passive Membranes . . . . .	116
5.4	Coupled Dynamics of RAFs and Protocells . . . . .	121
5.4.1	RAFs in Different Chemistries . . . . .	122
5.4.2	Synchronization. . . . .	123
5.4.3	Interactions Among RAFs in the Same Protocell . . . . .	128
5.4.4	Spontaneous Reactions . . . . .	131
5.5	Maintaining Novelties. . . . .	133
5.6	A Comment on Evolvable Populations of Protocells . . . . .	139
5.7	Appendix . . . . .	141
5.7.1	The Chemical Reaction System. . . . .	142
5.7.2	The Exchange with the Environment . . . . .	144
5.7.3	The Protocell Splitting Process . . . . .	147
<b>6</b>	<b>Conclusions, Open Questions and Perspectives . . . . .</b>	<b>149</b>
6.1	Introduction . . . . .	149
6.2	The Hypothesis of Spontaneous Fission and Synchronization. . . . .	153
6.3	The Formation of Self-Sustaining Autocatalytic Cycles . . . . .	158
6.4	The Role of Membranes . . . . .	163
6.5	A Virtual Laboratory . . . . .	165
	<b>Bibliography . . . . .</b>	<b>169</b>
	<b>Index . . . . .</b>	<b>179</b>

Modelling Protocells

The Emergent Synchronization of Reproduction and  
Molecular Replication

Serra, R.; Villani, M.

2017, XV, 182 p. 46 illus., 33 illus. in color., Hardcover

ISBN: 978-94-024-1158-4
