

Contents

- 1 The Stable Population Model 1**
 - 1.1 Basic Model Ingredients 1
 - 1.1.1 Introduction 1
 - 1.1.2 Mortality 3
 - 1.1.3 Fertility 8
 - 1.1.4 Malthusian Populations 10
 - 1.2 Fundamental Theorem of Demography 13
 - 1.2.1 The Stable Population Model 13
 - 1.2.2 Classical Solutions 17
 - 1.2.3 Semigroup Solutions 20
 - 1.2.4 Generation Expansion and R_0 24
 - 1.2.5 Fundamental Theorem of Demography 28
 - 1.2.6 The Intrinsic Rate of Natural Increase 35
 - 1.3 The Dual System and the Reproductive Value 39
 - 1.3.1 The Population Operator 39
 - 1.3.2 The Reproductive Value 41
 - 1.3.3 Fundamental Solutions 44
 - 1.3.4 Backward System and Demographic Potential 45
 - 1.3.5 Stochastic Interpretations 46
 - 1.4 Some Demographic Applications 50
 - 1.4.1 Demographic Indices 50
 - 1.4.2 The Population Momentum 54
 - 1.4.3 Preston–Coale System 59
 - 1.4.4 Perturbation Theory 61
 - 1.5 Age Profile Dynamics of Quasi-stable Populations 65
 - References 69
