

Contents

Part I What is Building Envelope?

1 The Skin of a Building	3
1.1 Introduction.	3
1.2 The Role of <i>Daylighting</i>	4
1.2.1 The Outside View	6
1.2.2 Smart Windows.	7
1.3 Comparison with Skin	8
1.4 The Arab World Institute	9
References	10

Part II Dynamic Shading

2 Cellular Automaton-Based Shading System (CASS)	15
2.1 Cellular Automata	15
2.2 Why Cellular Automata to Drive Shading of a Building Envelope?	20
2.3 Are Cellular Automata Organic?	23
2.4 CASS in Regular Tessellations	24
2.5 Definitions of CASS Parameters	27
2.5.1 Boundary Conditions	28
2.5.2 The Sequence of Initial Conditions (SIC)	28
2.5.3 Quantitative Evaluation of a CA Pattern	30
2.6 Optimization of CA _{SH}	34
2.6.1 Ideal SIC by Backtracking	35
2.6.2 Implementation of Evolutionary Algorithms (EA)	36
2.6.3 Discussion	45
2.7 One-Dimensional Cellular Automata Applied on Surfaces	47
2.7.1 Elementary Cellular Automata for CASS	48
2.7.2 The Original CA for Shading (CA _{SH}).	48

2.7.3	Four Semi-totalistic Siblings of CA_{SH}	49
2.7.4	Totalistic Siblings of CA_{SH}	49
2.7.5	Half-Distance Cellular Automata	52
2.7.6	Higher Order Cellular Automata	54
2.8	Robustness of CASS	55
2.8.1	Permanent Malfunction of a Single Cell in IC	55
2.8.2	Electric Failure	57
	References	59
3	Polarized Film Shading System in Regular Grids (PFSS)	63
3.1	Dihedral Rotations	63
3.2	Topological Properties of Grids and Neighborhoods	66
3.3	Examples of PFSS in Regular Grids	69
3.3.1	Square Grid ($PFSS_{SQ}$)	69
3.3.2	Hexagonal Grid	71
3.3.3	Triangular Grid ($PFSS_T$)	72
	References	75
4	Two-Dimensional Triangular Cellular Automata on Surfaces	77
4.1	From Triangulated Surface to Triangular Cellular Automata (TCA)	77
4.2	Types of TCAs	77
4.3	What Is an Appropriate TCA?	79
4.4	Voids in a Mesh	83
4.5	Free-Form 3D Surfaces	84
4.5.1	Triangulated 3D Mesh	84
4.5.2	Totalistic Triangular Cellular Automata (tTCA)	87
4.5.3	Semi-totalistic Triangular Cellular Automata (stTCA)	91
4.6	Grayness at the Stable State (G_S)	93
4.7	TCA on a Free-Form Surface (FFS)	95
	References	97
5	Cellular Automaton-Based Shading System Prototypes	99
5.1	LC-Based Prototype in Square Grid ($CASS_{LCS}$)	99
5.2	Concept of LC-Based Prototype in Triangular Grid ($CASS_{LCT}$)	104
5.3	Directly Controlled Shading Based on Polarized Films (PFSS-D)	106
	References	109

Part III Static Shading

6 Static Solar Shading of a Free-Form Building with Shade-Z.	113
6.1 Introduction.	113
6.2 Shade-Z	115
6.2.1 Importing the Geometry and Automated Aperture Detection.	115
6.2.2 Shading Period Selection	115
6.2.3 Generation of Geometry of the Static Shading in SZ	115
6.2.4 SZ for Periods of Days.	118
References	119
Glossary	121

Discrete Optimization in Architecture

Building Envelope

Zawidzki, M.

2017, XIV, 121 p. 118 illus., 35 illus. in color., Softcover
