

Contents

1	Introduction	1
1.1	Importance of Nonlinear Optics	1
1.1.1	Status of Nonlinear Optics in Modern Physics	1
1.1.2	Status of Nonlinear Optics in Modern Optics	2
1.1.3	Nonlinear Optics Is a Basis of Photonic Technology	3
1.2	Physical Meaning of Nonlinear Optics	5
1.2.1	Phenomenon Related with High-Order Polarization	5
1.2.2	Nonlinear Response of Medium to the Optical Field	6
1.2.3	Parameters of Medium Are Function of Optical Field	7
1.3	Research Content of Nonlinear Optics	8
1.3.1	Typical Nonlinear Optical Effects	8
1.3.2	Two Kinds of Nonlinear Optical Effects	13
1.3.3	Nonlinear Optical Materials	14
1.4	Development History of Nonlinear Optics	15
1.4.1	Brief History of Nonlinear Optics	15
1.4.2	Development Tendency of Nonlinear Optics	16
1.5	Applications of Nonlinear Optics	17
1.5.1	Application in Laser Technology	18
1.5.2	Application in Information Technology	18
1.5.3	Application in Material Technology	19
	References	21
2	Polarization Theory of Nonlinear Medium	23
2.1	Wave Equations of Nonlinear Medium	23
2.1.1	Maxwell's Equations for Nonlinear Medium	23
2.1.2	Time-Domain Wave Equation in Anisotropic Nonlinear Medium	25

2.1.3	Time-Domain Wave Equation in Isotropic Nonlinear Medium.	26
2.1.4	Frequency-Domain Wave Equation in Anisotropic Nonlinear Medium.	28
2.1.5	Frequency-Domain Wave Equation in Isotropic Nonlinear Medium.	28
2.2	Polarization and Susceptibility of Nonlinear Medium.	30
2.2.1	Frequency-Domain Expressions of Polarization and Susceptibility	30
2.2.2	Degeneration Factor of Polarization.	34
2.2.3	Symmetry of Susceptibility Tensor	37
2.3	Real Part and Imaginary Part of Susceptibility	40
2.3.1	Relation Between Real Part and Imaginary Part of Susceptibility (K–K Relation)	40
2.3.2	Physical Significance of Real Part and Imaginary Part of Susceptibility	41
2.3.3	Relation Between Nonlinear Refractive Index and Nonlinear Absorption Coefficient	45
	Appendix A: Derivation of K–K Relation.	46
	Appendix B: Two Systems of Units	48
	I. Fundamental Formula	49
	II. Conversion of Two Unit Systems	49
	References.	49
3	Optical Three-Wave Coupling Processes	51
3.1	Three-Wave Coupled Equations	51
3.1.1	Review of Second-Order Nonlinear Optics Effects in Isotropic Medium	51
3.1.2	Approximate Description of Second-Order Nonlinear Optics Effect in Anisotropic Medium	53
3.1.3	Three-Wave Coupled Equations in Anisotropic Medium.	55
3.2	Optical Second-Harmonic Generation	57
3.2.1	Small Signal Approximation	58
3.2.2	High Fundamental Wave Consumption	61
3.2.3	Phase Matching Technology	64
3.2.4	Experimental Facilities for Second Harmonic Generation.	69
3.3	Optical Sum Frequency, Difference Frequency and Parameter Amplification.	71
3.3.1	Optical Sum Frequency and Frequency Up-Conversion	71
3.3.2	Optical Difference Frequency and Frequency Down-Conversion	75

3.3.3	Optical Parametric Amplification	78
3.3.4	Comparison of Four Kinds of Three-Wave Mixing Processes and Experimental Facilities	79
3.4	Optical Parametric Oscillator	81
3.4.1	Threshold Value Equations of Optical Parametric Oscillation	81
3.4.2	Double Resonant Parametric Oscillator	83
3.4.3	Singly Resonant Parametric Oscillator	85
	References	88
4	Optical Four-Wave Coupling Process	89
4.1	Introduction to Third-Order Nonlinear Optical Effects	89
4.2	Optical Third Harmonic and Optical Four-Wave Mixing	91
4.2.1	Optical Third Harmonic	91
4.2.2	Optical Four-Wave Mixing	94
4.2.3	Degenerated Four-Wave Mixing	95
4.3	Optical Phase Conjugation	97
4.3.1	Definition and Characteristic of Optical Phase Conjugation	97
4.3.2	Optical Phase Conjugation in Four-Wave Mixing Process	99
4.3.3	Application of Optical Phase Conjugation	105
	References	107
5	Optical Kerr Effect and Self-focusing	109
5.1	Optical Kerr Effect	109
5.1.1	Self-phase Modulation Optical Kerr Effect	111
5.1.2	Cross-Phase Modulation Optical Kerr Effect	114
5.1.3	Optical-Kerr-Effect Induced Birefringence	116
5.2	Self-focusing of Light Beam	119
5.2.1	Steady State Self-focusing	119
5.2.2	Dynamic State Self-focusing	127
5.2.3	Self-phase Modulation Based on Self-focusing	132
5.3	Z-scan Measurement of Nonlinear Optical Parameter	135
5.3.1	Experimental Method of Z-scan Measurement	135
5.3.2	Theoretical Calculation of Z-scan Measurement	138
5.3.3	Other Z-scan Technologies	143
	References	146
6	Nonlinear Stimulated Scattering	149
6.1	Introduction to Light Scattering	149
6.1.1	Classification of Light Scattering	149
6.1.2	Stimulated Radiation Light Scattering Characteristics	151

6.2	Stimulated Raman Scattering	152
6.2.1	Physical Picture of Stimulated Raman Scattering	152
6.2.2	Classical Theory of Stimulated Raman Scattering	157
6.2.3	Experiments of Stimulated Raman Scattering	163
6.3	Stimulated Brillouin Scattering	164
6.3.1	Physical Picture of Stimulated Brillouin Scattering . . .	164
6.3.2	Classical Theory of Stimulated Brillouin Scattering . . .	167
6.3.3	Experiments of Stimulated Brillouin Scattering	172
	References.	175

9.1.1	Helmholtz Equation.	252
9.1.2	Derivation of Frequency-Domain Wave Equation in Fiber	255
9.1.3	Derivation of Nonlinear Schrodinger Equation	257
9.2	Group Velocity Dispersion and Self-phase Modulation	260
9.2.1	Pulse Propagation Excluding Dispersion and Nonlinearity.	262
9.2.2	Influence of Dispersion to Pulse Propagation	262
9.2.3	Influence of Self-phase Modulation to Pulse Propagation	266
9.2.4	Combined Action of Dispersion and Self-phase Modulation	268
9.3	Time Soliton and Space Soliton	272
9.3.1	Time Soliton	272
9.3.2	Space Soliton.	276
	References.	278
10	All-Optical Switch Based on Nonlinear Optics	279
10.1	Summarization of All-Optical Switch	279
10.1.1	Research Direction of All-Optical Switch	279
10.1.2	Classification of All-Optical Switch.	284
10.2	Nonlinear Optical Coupler All-Optical Switch	289
10.2.1	Symmetric Coupler Under Low Incident Power	290
10.2.2	Symmetric Coupler All-Optical Switch in Self-phase Modulation.	293
10.2.3	Asymmetric Coupler All-Optical Switch in Cross-Phase Modulation	296
10.3	Nonlinear Sagnac Interferometer All-Optical Switch.	300
10.3.1	Symmetric Sagnac Interferometer in Low Incident Power	300
10.3.2	Sagnac Interferometer All-Optical Switch with a Non-3 dB Coupler	305
10.3.3	Sagnac Interferometer All-Optical Switch in Cross-Phase Modulation	307
10.3.4	Sagnac Interferometer All-Optical Switch with a Optical Amplifier	309

10.4	Nonlinear M–Z Interferometer All-Optical Switch	311
10.4.1	M–Z Interferometer All-Optical Switch with Different Arm Materials.	311
10.4.2	M–Z Interferometer All-Optical Switch with Different Arm Lengths.	313
10.5	Nonlinear Ring Resonator All-Optical Switch	314
10.5.1	All-Optical Switch in a M–Z Interferometer Coupled with a SCRR.	315
10.5.2	All-Optical Switch in a DCRR	321
10.6	Nonlinear Fiber Grating All-Optical Switch	325
10.6.1	Single Nonlinear FBG All-Optical Switch.	326
10.6.2	Single Nonlinear LPFG All-Optical Switch.	334
10.6.3	Nonlinear Fiber Connected LPFG-Pair All-Optical Switch	339
10.6.4	Nonlinear Fiber Connected FBG-Pair Optical Bistable Switch	348
10.7	Nanoscale All-Optical Switches	355
10.7.1	Nano-waveguide Interferometer All-Optical Switches	357
10.7.2	Photonic Crystal All-Optical Switch	363
10.7.3	Surface Plasmon Polariton All-Optical Switch.	372
10.7.4	Silicon Nano-waveguide Resonant Cavity All-Optical Switch.	382
