

Contents

1	Introduction to Thermal Pure Quantum State Formulation of Statistical Mechanics.	1
	References.	3
2	Typicality and Ergodicity	5
2.1	Typicality and Ergodicity in Classical Statistical Mechanics.	5
2.1.1	Ergodicity and Its Problems	5
2.1.2	Typicality in Weak Sense	6
2.2	Typicality and Ergodicity in Quantum Statistical Mechanics	8
2.2.1	Ergodicity in Quantum Mechanics	8
2.2.2	Strong Typicality in Quantum System.	10
2.2.3	Mechanical Variables and Genuine Thermodynamic Variables.	11
2.2.4	Canonical Typicality	12
2.3	Summary and Discussions of this Chapter	13
	References.	14
3	Canonical Thermal Pure Quantum State	15
3.1	Definition of Thermal Pure Quantum State.	15
3.2	Introduction of Canonical Thermal Pure Quantum State.	16
3.3	Main Results	18
3.4	Mechanism	20
3.5	Thermo Field Dynamics	21
3.6	Grandcanonical Thermal Pure Quantum State.	22
3.7	Derivations of Main Results	23
3.7.1	Random Average and Variance.	23
3.7.2	Normalization Constant (Partition Function)	25
3.7.3	Mechanical Variables	25
	References.	30

4	Microcanonical Thermal Pure Quantum State	31
4.1	Construction of TPQ State	31
4.2	Mechanism	32
4.3	Main Results	33
4.4	Comparison Between cTPQ State and mTPQ State	36
	References.	37
5	Equilibrium State and Entanglement.	39
5.1	Time Evolution.	39
5.2	Linear Response Theory	40
5.3	Quantum and Thermal Fluctuations	41
5.4	Entanglement	43
5.4.1	Entanglement Measure for Pure State	43
5.4.2	Entanglement Measure for Mixed State.	44
5.4.3	Entanglement at Finite Temperature in Ensemble Formulation.	44
5.4.4	Entanglement at Finite Temperature in TPQ Formulation—Analytics	45
5.4.5	Entanglement at Finite Temperature in TPQ Formulation—Numerics	48
5.5	Stability Against Noise.	48
	References.	50
6	Relation Among TPQ States.	51
6.1	Decomposition of cTPQ State and gTPQ States.	51
6.2	Practical Formula	54
6.3	The TPQ Formulation of Statistical Mechanics	55
	References.	55
7	Application to Numerical Calculation	57
7.1	TPQ Formulation as Numerical Method	57
7.2	Comparison to Other Methods	58
7.2.1	Quantum Monte Carlo	59
7.2.2	Density Matrix Renormalization Group.	59
7.2.3	Numerical Diagonalization	60
7.2.4	Transfer Matrix Monte Carlo Method.	60
7.2.5	Finite Temperature Lanczos Method.	61
7.2.6	Kernel Polynomial Method	61
7.3	Application to Kagome Lattice Model	62
	References.	64
8	Conclusion	65
	Curriculum Vitae	67
	Appendix A: Derivation of Formula (6.31)	69

Formulation of Statistical Mechanics Based on Thermal
Pure Quantum States

Sugiura, S.

2017, XII, 73 p. 4 illus. in color., Hardcover

ISBN: 978-981-10-1505-2
