1	Introduction	1
1.1	Organization	4
	References	4
2	Literature Review on Spatial Audio	7
2.1	Basics of Spatial Hearing	7
2.1.1	How Do We Hear Sound	8
2.1.2	How Do We Localize Sound	8
2.1.3	Direction Perception: Azimuth and Elevation	10
2.1.4	Distance Perception	11
2.1.5	Sound in Rooms: Reflections and Reverberation	13
2.1.6	Psychoacoustics and Critical Band	14
2.2	Spatial Audio Reproduction	15
2.2.1	A Brief History of Sound Reproduction Systems	15
2.2.2	Representations of Audio Content	16
2.2.3	Spatial Audio Reproduction Techniques	17
2.2.4	Spatial Audio Processing	19
2.2.5	Spatial Audio Evaluation	22
2.2.6	Summary and Comparison of Spatial Audio Reproduction	23
2.3	Prior Work in Primary Ambient Extraction	24
2.3.1	Stereo Signals	25
2.3.2	Multichannel Signals	28
2.3.3	Single-Channel Signals	28
2.4	Sound Scene Decomposition Using PAE and BSS	29
2.4.1	Decomposition Using BSS	29
2.4.2	A Comparison Between BSS and PAE	31
2.5	Conclusions	32
	References	33

3	Linear Estimation-Based Primary Ambient Extraction	39
3.1	Stereo Signal Model	40
3.2	Linear Estimation Framework and Performance Measures	43
3.2.1	Group 1: Measures for Extraction Accuracy	43
3.2.2	Group 2: Measures for Spatial Accuracy	45
3.3	Linear Estimation-Based PAE Approaches	46
3.3.1	PAE Using Principal Component Analysis	46
3.3.2	PAE Using Least Squares	49
3.3.3	PAE Using Minimum Leakage Least Squares	50
3.3.4	PAE Using Minimum Distortion Least Squares	51
3.3.5	Comparison Among PCA, LS, MLLS, and MDLS in PAE	51
3.3.6	PAE Using Adjustable Least Squares	54
3.4	Experiments and Discussions	55
3.4.1	Comparison of PAE Using PCA, LS, MLLS, and MDLS	56
3.4.2	Performance of ALS in PAE	60
3.4.3	General Guidelines in Selecting PAE Approaches	62
3.5	Conclusions	63
	References	64
4	Ambient Spectrum Estimation-Based Primary Ambient Extraction	67
4.1	Ambient Spectrum Estimation Framework	68
4.1.1	Ambient Phase Estimation	69
4.1.2	Ambient Magnitude Estimation	71
4.2	Ambient Spectrum Estimation with a Sparsity Constraint	73
4.2.1	Ambient Phase Estimation with a Sparsity Constraint	73
4.2.2	Ambient Magnitude Estimation with a Sparsity Constraint	75
4.2.3	Computational Cost of APES and AMES	77
4.2.4	An Approximate Solution: APEX	77
4.3	Performance Measures	79
4.4	Experiments and Discussions	81
4.4.1	Experimental Results on APES	81
4.4.2	Experimental Results on ASE Approaches	83
4.4.3	Experimental Results on Robustness of ASE Approaches	87
4.4.4	Experimental Results on Subjective Listening Tests	88
4.5	Conclusions	90
	References	91

5	Time-Shifting-Based Primary Ambient Extraction	93
5.1	Complex Cases in PAE	94
5.2	Performance of Conventional PAE in the Primary-Complex Case	95
5.3	Time-Shifting Technique Applied in PAE	100
5.4	Experiments and Discussions	103
5.4.1	Experiment 1: Fixed Direction	104
5.4.2	Experiment 2: Panning Directions	106
5.4.3	Experiment 3: Reverberation Ambience	107
5.4.4	Experiment 4: Recordings	108
5.5	Conclusions	111
	References	112
6	Multiple Source-Based Primary Ambient Extraction	115
6.1	Subband Technique and Frequency Bin Partitioning	116
6.1.1	Time-Shifted PCA in Frequency Domain	116
6.1.2	Frequency Bin Partitioning	117
6.1.3	Experimental Results and Discussions	118
6.2	Multishift Technique	120
6.2.1	Multishift PCA	121
6.2.2	Experimental Results and Discussions	123
6.3	Further Discussions and Conclusions	126
	References	127
7	Conclusions and Future Works	129
7.1	Conclusions	129
7.2	Future Works	131
