

Preface

The 9th International Conference on Robotic, Vision, Signal Processing and Power Applications (RoViSP 2016) was held in Penang, Malaysia, from 2nd to 3rd February 2016. This conference hosted an electronic paper submission process for areas that include, but not limited to:

- Electronic Design and Applications
- Numerical Computations and Optimizations
- Artificial Intelligence and Computer Applications
- Vision, Image and Signal Processing
- Robotics, Control, Mechatronics and Automation
- Telecommunications, RF, Antenna and Applications
- Sensors and Sensing Techniques
- Biomedical, BioEngineering and Applications
- Power Systems, High Voltage Engineering and Renewable Energy
- Electrical Machines, Drives and Power Electronics

RoViSP 2016 is the latest conference held by the School of Electrical and Electronic Engineering, Universiti Sains Malaysia (USM), following its series of successful conferences. In this version, more than 90 papers were accepted for the inclusion in this publication. This proceeding gives a picture of the latest scientific and practical activities carried out in the field of Robotic, Vision, Signal Processing and Power Applications with theme of “Empowering Research and Innovation”.

The Editors acknowledge the time and effort of all reviewers and technical committee members in ensuring high-quality technical papers for RoViSP 2016. The committee would also like to express our gratitude to Springer for the technical supports.
