<b>1</b>	<b>Preliminary on Watermarking Technology</b>	<b>1</b>
1.1	Overview	1
1.2	Fundamentals of Digital Watermarking	2
1.3	Requirements of Digital Watermarking	3
1.3.1	Robustness of Digital Watermarking	4
1.3.2	Capacity of Digital Watermarking	5
1.3.3	Imperceptibility of Digital Watermarking	5
1.3.4	Tamper Resistance	7
1.3.5	Computational Cost	7
1.3.6	False Positive Rate	8
1.3.7	False Negative Rate	8
1.4	Zero Watermarking	8
1.5	Applications of Digital Watermarking	9
1.6	Book Structure	11
	References	13
 <b>Part I Signal Watermarking</b>		
<b>2</b>	<b>Audio Watermarking</b>	<b>17</b>
2.1	Introduction	17
2.2	Transmission Channel	17
2.3	Audio Watermarking Techniques	19
2.3.1	Temporal Domain	20
2.3.2	Frequency Domain	22
2.3.3	Coded Domain	26
2.4	Embedding Approach	27
2.4.1	Embedding Before Encoding (Pre-encoding)	28
2.4.2	Embedding During Encoding (in-Encoder)	28
2.4.3	Embedding After Encoding (Post-encoder)	29
2.5	Audio Attacks	29
2.5.1	Dynamics	29

2.5.2	Filter . . . . .	30
2.5.3	Ambience . . . . .	31
2.5.4	Conversion . . . . .	31
2.5.5	Loss Compression . . . . .	31
2.5.6	Noise. . . . .	31
2.5.7	Modulation . . . . .	32
2.5.8	Time Stretch and Pitch Shift. . . . .	32
2.5.9	Sample Permutations . . . . .	32
2.6	Comparison Among Different Audio Watermarking Methods . . .	36
	References . . . . .	36
<b>3</b>	<b>Speech Watermarking . . . . .</b>	<b>39</b>
3.1	Introduction . . . . .	39
3.2	Speech Versus Audio . . . . .	40
3.3	Linear Predictive Analysis (LPA) . . . . .	40
3.4	Speech Watermarking Techniques. . . . .	42
3.4.1	Speech Watermarking Based on Auditory Masking. . . . .	42
3.4.2	Speech Watermarking Based on Phase Modulation. . . . .	43
3.4.3	Speech Watermarking Based on Quantization . . . . .	45
3.4.4	Speech Watermarking Based on Transformation . . . . .	46
3.4.5	Speech Watermarking Based on Parametric Modeling. . . . .	48
3.5	Attacks for Speech Watermarking. . . . .	48
3.5.1	Additive White Gaussian Noise (AWGN) . . . . .	48
3.5.2	Low-Pass Filter (LPF) . . . . .	49
3.5.3	Band-Pass Filter (BPF). . . . .	49
3.5.4	A-Law. . . . .	49
3.5.5	$\mu$ -Law . . . . .	50
3.5.6	CELP . . . . .	50
3.5.7	Amplitude Variation . . . . .	50
3.5.8	Resample . . . . .	50
3.5.9	Requantization . . . . .	50
3.6	Challenges in Speech Watermarking. . . . .	50
	References . . . . .	51

## Part II Multimedia Watermarking

<b>4</b>	<b>Image Watermarking. . . . .</b>	<b>57</b>
4.1	Introduction . . . . .	57
4.2	Background . . . . .	57
4.3	Image Watermarking Techniques . . . . .	58
4.3.1	Spatial Domain. . . . .	58
4.3.2	Transform Domain . . . . .	60
4.3.3	Multiple Domains. . . . .	61
4.4	Image Attacks . . . . .	62
4.5	Challenges in Image Watermarking . . . . .	64
4.6	Image Watermarking Based on Human Visual System. . . . .	64

4.7	Medical Image Watermarking . . . . .	65
	References . . . . .	65
<b>5</b>	<b>Video Watermarking . . . . .</b>	<b>67</b>
5.1	Introduction . . . . .	67
5.2	Background of Video. . . . .	67
5.3	Video Watermarking Techniques. . . . .	69
5.3.1	Image-Based Video Watermarking. . . . .	69
5.3.2	Video-Based Video Watermarking . . . . .	72
5.4	Video Watermarking Attacks. . . . .	73
5.4.1	Temporal Frame Averaging (TFA). . . . .	74
5.4.2	Watermark Estimation Remodulation (WER) . . . . .	74
5.4.3	Watermark Estimations Clustering and Remodulation (WECR) . . . . .	74
5.4.4	Watermarking Subspace Estimation Draining (WSED) . . . . .	74
5.4.5	Block Replacement (BR) . . . . .	74
5.4.6	Block Combination . . . . .	75
5.4.7	Block Projection. . . . .	75
5.4.8	Block Restoration. . . . .	75
5.4.9	Block Swapping . . . . .	76
5.5	Video-Enforced Strategies. . . . .	76
5.5.1	SS System. . . . .	76
5.5.2	SS-1 System . . . . .	76
5.5.3	SS-N System . . . . .	77
5.5.4	SS- $\alpha$ System . . . . .	77
5.5.5	Discussion . . . . .	77
5.6	Critical Review in Video Watermarking . . . . .	78
	References . . . . .	79
<b>6</b>	<b>Three-Dimensional (3D) Watermarking . . . . .</b>	<b>81</b>
6.1	Introduction . . . . .	81
6.2	3D Modeling Representation. . . . .	82
6.3	Background of 3D Watermarking . . . . .	83
6.4	Attacks in 3D Watermarking . . . . .	85
6.5	Techniques in 3D Watermarking. . . . .	86
6.5.1	Fragile 3D Watermarking. . . . .	86
6.5.2	Robust 3D Watermarking. . . . .	90
6.6	Distortion Evaluation in 3D Watermarking. . . . .	95
	References . . . . .	96
 <b>Part III Document Watermarking</b>		
<b>7</b>	<b>Natural Language Watermarking . . . . .</b>	<b>103</b>
7.1	Introduction . . . . .	103
7.2	Background of Natural Language Processing . . . . .	103
7.2.1	Data Resources. . . . .	104
7.2.2	Linguistic Transformations . . . . .	104

7.2.3	Natural Language Parsing . . . . .	106
7.2.4	Word Sense Disambiguation . . . . .	107
7.2.5	Statistical Language Models . . . . .	107
7.2.6	Natural Language Generation . . . . .	108
7.2.7	Natural Language Paraphrasing . . . . .	108
7.3	Natural Language Watermarking. . . . .	109
7.3.1	Requirements of NL Watermarking . . . . .	109
7.3.2	Natural Language Watermarking Techniques . . . . .	113
7.4	NL Watermarking Versus Text Watermarking . . . . .	117
	References . . . . .	118
<b>8</b>	<b>Text Watermarking . . . . .</b>	<b>121</b>
8.1	Introduction . . . . .	121
8.2	Background of Text Watermarking . . . . .	121
8.3	Attacks in Text Watermarking . . . . .	122
8.4	Text Watermarking Robustness . . . . .	123
8.5	Text Watermarking Techniques . . . . .	123
8.5.1	Image-Based Approach . . . . .	124
8.5.2	Syntactic Approach. . . . .	124
8.5.3	Semantic Approach. . . . .	126
8.5.4	Structural Approach . . . . .	126
8.5.5	Hybrid Approach . . . . .	127
8.6	Discussion . . . . .	127
8.7	Summary . . . . .	128
	References . . . . .	128
<b>9</b>	<b>Software Watermarking . . . . .</b>	<b>131</b>
9.1	Introduction . . . . .	131
9.2	Background of Software Watermarking . . . . .	131
9.3	Formal Representation of Software Watermarking. . . . .	133
9.4	Software Watermarking Criteria . . . . .	135
9.5	Software Watermarking Techniques . . . . .	137
9.5.1	Basic Blocking Reordering Technique. . . . .	138
9.5.2	Register Allocation Technique . . . . .	138
9.5.3	Spread Spectrum Technique . . . . .	138
9.5.4	Opaque Predicate Technique . . . . .	139
9.5.5	Threading Technique . . . . .	139
9.5.6	Abstract Interpretation Technique . . . . .	139
9.5.7	Metamorphic Technique. . . . .	139
9.5.8	Dynamic Path Technique . . . . .	140
9.5.9	Mobile Agent Technique . . . . .	140
9.5.10	Graph-Based Technique . . . . .	140
9.5.11	Birthmarks Technique . . . . .	141
9.6	Attacks in Software Watermarking . . . . .	141
9.7	Discussion . . . . .	142
	References . . . . .	143

<b>10</b>	<b>Relational Database, XML, and Ontology Watermarking</b>	<b>145</b>
10.1	Introduction	145
10.2	Issues in Relational Database Watermarking	146
10.3	Database Watermarking Attacks	147
10.4	Database Watermarking Techniques	148
10.4.1	Distortion-Based Watermarking	148
10.4.2	Distortion-Free Watermarking	150
10.5	Types of Digital Watermark	152
10.5.1	Arbitrary Meaningless Bit Pattern	152
10.5.2	Image	153
10.5.3	Speech	153
10.5.4	Content Characteristics	153
10.5.5	Cloud Model	153
10.5.6	Meaningful Information	154
10.5.7	Fake Tuples	154
10.5.8	Virtual Attribute	154
10.6	Extension of Database Watermarking to XML Watermarking	154
10.7	Preliminary in XML Data	155
10.8	XML Watermarking	155
10.8.1	Query-Based XML Watermarking	156
10.8.2	Fuzzy Queries XML Watermarking	157
10.9	XML Watermarking Attacks	157
10.10	Extension of Database Watermarking to Ontology Watermarking	159
10.11	Ontology Watermarking	159
	References	160

## Part IV Advance in Watermarking

<b>11</b>	<b>Network Stream Watermarking</b>	<b>165</b>
11.1	Introduction	165
11.2	Network Traffic Modeling	166
11.3	Network Watermark Properties	166
11.4	Network Watermarking Techniques	168
11.4.1	Network Flow Watermarking	168
11.4.2	Watermarks in Anonymous Systems	169
11.4.3	Watermarks in Stepping Stones	170
11.4.4	Interval Centroid-Based Watermarking	170
11.4.5	Interval-Based Watermarking	171
11.4.6	Spread-Spectrum Watermarking	172
11.5	Network Watermarking Attacks	173
11.5.1	Active Attack	173
11.5.2	Copy Attack	173
11.5.3	Ambiguity Attacks	173
11.5.4	Packet Modification Attack	174

- 11.6 Watermarking Strategy ..... 174
  - 11.6.1 Single-Message Watermarks ..... 174
  - 11.6.2 Multi-message Watermarks ..... 174
  - 11.6.3 Multiple Messages ..... 174
- 11.7 Types of Adversaries ..... 175
  - 11.7.1 Invisibility with Isolated Adversaries..... 176
  - 11.7.2 Invisibility with Chosen Flow Adversaries ..... 177
