

Contents

- 1 Basic Concepts** 1
 - 1.1 Guns 2
 - 1.2 Bombs 3
 - 1.3 Missiles 3
 - 1.4 Summary 4
 - References 5
- 2 Guns** 7
 - References 9
- 3 Bombs** 11
 - 3.1 General Purpose Bombs 11
 - 3.2 Atomic Bomb 16
 - 3.2.1 Nuclear Fission 16
 - 3.2.2 Energy Release in the Fission 17
 - 3.2.3 Criticality 17
 - 3.2.4 Different Kinds of Fission Bombs 18
 - 3.3 Hydrogen Bomb 19
 - 3.4 Neutron Bombs 22
 - References 23
- 4 Missiles** 25
 - 4.1 Classification of Missiles 26
 - 4.1.1 Type 26
 - 4.1.2 Launch Mode 27
 - 4.1.3 Range 28
 - 4.1.4 Propulsion 28
 - 4.1.5 Warhead 30
 - 4.1.6 Guidance Systems 30
 - 4.2 Missile Structure 31
 - 4.2.1 Airframe 32
 - 4.2.2 Flight Control 32

4.2.3	Guidance	32
4.2.4	The Fuze	33
4.2.5	Warhead	34
4.3	Missile Aerodynamics	35
4.4	Missile Propulsion	37
4.4.1	Uses of Propulsion Systems	37
4.5	Missile Control and Guidance	38
4.5.1	Control Force Generation	39
4.5.2	Aerodynamic Control	39
4.5.3	Thrust Vector Control	40
4.5.4	Reaction Control System or Vernier Rockets	40
4.6	Ballistic Missile	40
4.6.1	Characteristics of Long-Range Ballistic Missiles	41
4.6.2	Need for Staging	41
4.7	Problems Associated in Missile Launch	42
4.7.1	Launchers and Ground Support Systems	43
	References	44
5	Armament Materials	45
6	The United Nations	47
6.1	United Nations Organization	47
6.2	The Role of United Nations in Peacekeeping	48
	References	50
	Appendix A	51
	Appendix B	61
	Bibliography	63

Essentials of Aircraft Armaments

Kaushik, M.; Hanmaiahgari, P.R.

2017, XIII, 63 p. 12 illus., Softcover

ISBN: 978-981-10-2376-7
