

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Background and Significance	1
1.2	Review	3
1.2.1	Shaking Table Test Technology	3
1.2.2	Dynamic Characteristics of Slope	5
1.2.3	Deformation Characteristics and Instability Mechanism	8
1.2.4	Seismic Stability Evaluation Method	9
1.2.5	Prediction Model for Earthquake-Induced Landslide Hazard	13
1.3	Problems	14
1.4	Research Objectives and Content	15
<b>2</b>	<b>Seismic Array Monitoring Results Analysis</b>	19
2.1	General Condition	19
2.2	Monitoring Data of Seismic Array in 5.12 Wenchuan Earthquake	21
2.3	Response Characteristics Analysis	22
2.4	Frequency Spectrum Response Characteristics	25
2.4.1	Fourier Spectrum Along Elevation	25
2.4.2	Seismic Ground Motion Response Spectrum Along Elevation	28
2.5	Brief Summary	30
<b>3</b>	<b>Shaking Table Test of Rock Slopes</b>	31
3.1	Large-Scale Shaking Table Test Design	32
3.1.1	Purpose	32
3.1.2	Installation	32
3.1.3	Similarity System	32
3.1.4	Similar Materials	38
3.1.5	Test Instruments and Monitoring Points Disposition Principle	40

3.1.6	Testing Points Disposition . . . . .	43
3.1.7	Design and Manufacture . . . . .	46
3.1.8	Sensors . . . . .	51
3.1.9	Loading Scheme . . . . .	53
3.1.10	Data Collecting System . . . . .	57
3.1.11	Result Record . . . . .	57
3.2	Result Analysis . . . . .	60
3.2.1	Influence Factors of Acceleration Amplification Effect . . .	61
3.2.2	Fourier Spectrum and Response Spectrum of Acceleration . . . . .	81
3.3	Brief Summary . . . . .	88
<b>4</b>	<b>Numerical Analysis Research . . . . .</b>	<b>91</b>
4.1	Brief Introduction to GDEM . . . . .	91
4.1.1	Advantages of GDEM Software . . . . .	92
4.1.2	Fundamental Principle of GDEM . . . . .	93
4.1.3	Verification . . . . .	94
4.1.4	Fundamental Function . . . . .	97
4.1.5	Modeling Progress and Methods . . . . .	98
4.2	Key Problems in Numerical Analysis . . . . .	98
4.2.1	Numerical Analysis Model . . . . .	99
4.2.2	Material Parameters and Constitutive Model . . . . .	101
4.2.3	Boundary Conditions . . . . .	101
4.2.4	Seismic Ground Motion Input Conditions . . . . .	102
4.3	Verification of Numerical Analysis Results . . . . .	104
4.4	Seismic Dynamic Response Features . . . . .	105
4.4.1	Acceleration Amplification Effects . . . . .	105
4.4.2	Acceleration Fourier Spectrum . . . . .	107
4.4.3	Acceleration Amplification Effects . . . . .	110
4.5	Local Topography Effect . . . . .	111
4.5.1	Key Problems in Numerical Analysis . . . . .	112
4.5.2	Calculation Results Analysis . . . . .	114
4.6	Brief Summary . . . . .	118
<b>5</b>	<b>Theoretical Solutions of Acceleration Amplification of Hill . . . . .</b>	<b>121</b>
5.1	Formula Derivation . . . . .	121
5.1.1	General Thinking and Basic Assumption . . . . .	122
5.1.2	Generalized Analysis Model . . . . .	122
5.1.3	Derivation Process . . . . .	123
5.1.4	Time–Frequency Analysis Process . . . . .	128
5.1.5	Practical Application . . . . .	128
5.2	Solving Approach . . . . .	130
5.3	Verification . . . . .	130
5.3.1	Overview . . . . .	130
5.3.2	Verification . . . . .	131

5.4	Parameter Analysis . . . . .	133
5.4.1	Peak Value . . . . .	133
5.4.2	Frequency . . . . .	133
5.4.3	Bevel Angles. . . . .	135
5.4.4	“Whiplash Effect” . . . . .	136
5.5	Comparative Analysis. . . . .	137
5.5.1	Brief Introduction of Some Seismic Design Code. . . . .	137
5.5.2	Code for Seismic Design of Buildings GB50011-2010 . . . . .	138
5.5.3	Specifications for Seismic Design of Hydraulic Structures DL/5073-2000. . . . .	138
5.5.4	Design Specification for Slope of Hydropower and Water Conservancy Project SL/386-2007 . . . . .	139
5.5.5	Comparative Analysis . . . . .	139
5.6	Brief Summary . . . . .	141
<b>6</b>	<b>Slope Deformation Characteristics and Formation Mechanism . . . . .</b>	<b>143</b>
6.1	Brief Introduction . . . . .	144
6.1.1	Numerical Simulation Method. . . . .	145
6.1.2	Numerical Analysis Model . . . . .	145
6.1.3	Numerical Constitutive Model and Material Parameters. . . . .	145
6.1.4	Boundary Conditions. . . . .	147
6.2	Deformation Characteristics and Disaster Mechanism. . . . .	147
6.2.1	Whole Landslide Process. . . . .	147
6.2.2	Landslide Hazard Phenomenon . . . . .	149
6.2.3	Landslide Mechanism Analysis . . . . .	151
6.3	Brief Summary . . . . .	161
<b>7</b>	<b>Slope Seismic Stability . . . . .</b>	<b>163</b>
7.1	Slope Seismic Stability. . . . .	164
7.1.1	General Thinking and Basic Assumption. . . . .	164
7.1.2	Generalized Analysis Model . . . . .	165
7.1.3	Reflective and Transmission Coefficients. . . . .	166
7.1.4	Instant Seismic Stability Coefficient . . . . .	169
7.1.5	Time–Frequency Analysis Process of Seismic Waves . . . . .	171
7.1.6	Practical Application of Seismic Wave Time–Frequency Effects . . . . .	171
7.2	Time–Frequency Analysis Formula Derivation. . . . .	174
7.3	Verification. . . . .	174
7.3.1	Overview. . . . .	175
7.3.2	Gravitational Stress Field. . . . .	176
7.3.3	Calculation Results’ Comparison. . . . .	176

7.4	Study on Parameters . . . . .	179
7.4.1	Incident Angle on Transmitted and Reflected Coefficients of the Structural Surface . . . . .	180
7.4.2	The Influence of Elasticity Modulus of Cover Layer on Transmitted and Reflected Coefficients of the Structural Surface . . . . .	182
7.4.3	The Influence of Incident Angle on Transmitted and Reflected Coefficients of the Structural Surface . . . . .	183
7.4.4	The Influence of Elasticity Modulus of Cover Layer on Transmitted and Reflected Coefficients of the Structural Surface . . . . .	185
7.4.5	The Influence of Elasticity Modulus of Cover Layer on Total Transmitted and Reflected Energy Coefficients of the Structural Surface . . . . .	187
7.5	Advantage . . . . .	188
7.6	Brief Summary . . . . .	191
<b>8</b>	<b>Prediction Model . . . . .</b>	<b>193</b>
8.1	Field Investigation . . . . .	194
8.2	Controlling Factors . . . . .	195
8.3	Analysis of Controlling Factors . . . . .	195
8.3.1	Correlation Between Landslide Volume $V$ and Horizontal Sliding Distance $L$ and Vertical Sliding Distance $H$ . . . . .	196
8.3.2	Correlation Between Bevel Angle $\tan\theta$ and Equivalent Friction Coefficient $f$ . . . . .	196
8.3.3	Seismic Ground Motion Attenuation Model Based on Measured Data of Wenchuan Earthquake . . . . .	197
8.3.4	Correlation Between PGA and Horizontal Sliding Distance . . . . .	199
8.4	Prediction Model O . . . . .	200
8.5	Case Analysis of Donghekou Landslide and Magongwoqian Landslide . . . . .	202
8.6	Parameters . . . . .	204
8.7	Brief Summary . . . . .	205
	<b>Conclusions and Prospects . . . . .</b>	<b>207</b>
	<b>Bibliography . . . . .</b>	<b>215</b>

Slope Earthquake Stability

Changwei, Y.; Jingyu, Z.; Jing, L.; Wenying, Y.; Jianjing, Z.  
2017, X, 218 p. 255 illus., 219 illus. in color., Hardcover
