

Contents

1	Mechanics	1
1.1	Linear Elastostatics	2
1.2	Nonlinear Elastostatics	15
1.3	Hyperelastic Materials in Statics	26
1.4	Linear Rheology	34
1.5	Fractional Rheological Materials	49
1.6	Associated Plasticity	59
1.6.1	Isotropic Hardening	63
1.6.2	Kinematic Hardening	68
1.7	Linear Viscous Fluids	76
1.8	Nonlinear Viscous Fluids	86
1.9	Fluid Structure Interaction	99
	References	109
2	Thermodynamics	111
2.1	Temperature Distribution in Macromechanics	112
2.2	Heat Transfer in Micromechanics	120
2.3	Thermodynamics in a Nutshell	126
2.4	Thermoviscoelasticity	141
2.5	Thermoplasticity	153
	References	164
3	Electromagnetism	167
3.1	Conducting Wire	168
3.2	Polarized Materials	178
3.2.1	Capacitor Simulation	193
3.2.2	Transformer Simulation	199
3.2.3	Proximity and Skin Effects	207
3.3	Thermoelectric Coupling	213

3.4 Plastic Fatigue in a Circuit Board	228
3.5 Piezoelectric Transducer	243
3.6 Magnetohydrodynamics in Metal Smelting	273
References	291
Appendix	293
Index	307

Computational Reality
Solving Nonlinear and Coupled Problems in Continuum
Mechanics

Abali, B.E.

2017, XVII, 308 p. 48 illus. in color., Hardcover

ISBN: 978-981-10-2443-6
