

Contents

Variational Methods in Statistical Thermodynamics—A Pedagogical Introduction	1
Zhen-Gang Wang	
Square-Gradient Model for Inhomogeneous Systems: From Simple Fluids to Microemulsions, Polymer Blends and Electronic Structure	31
Jianzhong Wu	
Classical Density Functional Theory for Molecular Systems	65
Jianzhong Wu	
Classical Density Functional Theory of Polymer Fluids	101
Jan Forsman and Clifford E. Woodward	
Variational Perturbation Theory for Electrolyte Solutions	137
Leo Lue	
Self-consistent Field Theory of Inhomogeneous Polymeric Systems	155
An-Chang Shi	
Variational Methods for Biomolecular Modeling	181
Guo-Wei Wei and Yongcheng Zhou	
A Theoretician's Approach to Nematic Liquid Crystals and Their Applications	223
Apala Majumdar and Alexander H. Lewis	
Dynamical Density Functional Theory for Brownian Dynamics of Colloidal Particles	255
Hartmut Löwen	
Introduction to the Variational Monte Carlo Method in Quantum Chemistry and Physics	285
Brenda Rubenstein	
Appendix: Calculus of Variations	315

Variational Methods in Molecular Modeling

Wu, J. (Ed.)

2017, XII, 324 p. 69 illus., Hardcover

ISBN: 978-981-10-2500-6
