

Contents

Part I Earthquake- and Tsunami-Resistant Design of Nuclear Power Plants

1	Introduction to Earthquake-Resistant Design of Nuclear Power Plants	3
	Masanori Hamada, Michiya Kuno and Satsuya Soda	
2	Assessment of Standard Seismic Motion	33
	Masanori Hamada and Michiya Kuno	
3	Stability Assessment of Foundation Ground and Surrounding Slope	51
	Masanori Hamada and Michiya Kuno	
4	Earthquake-Resistant Design of Building and Structure	65
	Masanori Hamada, Michiya Kuno and Satsuya Soda	
5	Earthquake-Resistant Design of Equipment and Piping	91
	Masanori Hamada and Michiya Kuno	
6	Earthquake-Resistant Design of Important Civil Engineering Structures	109
	Masanori Hamada and Michiya Kuno	
7	Tsunami-Resistant Design	125
	Masanori Hamada and Michiya Kuno	
8	Seismic Probabilistic Risk Assessment	143
	Tatsuya Itoi, Michiya Kuno and Masanori Hamada	

9	International Standards and National Regulation on Seismic Safety Assessment	171
	Tatsuya Itoi, Michiya Kuno and Masanori Hamada	
10	Planning, Construction, Operation, and Decommission of Nuclear Power Plants	185
	Michiya Kuno and Masanori Hamada	
11	Radioactive Waste Treatment and Disposal Technique	211
	Michiya Kuno and Masanori Hamada	
12	Future Technology for the Seismic Safety of Nuclear Power Facilities	229
	Satsuya Soda, Masanori Hamada and Michiya Kuno	
 Part II Fundamentals of Seismology and Earthquake Engineering		
13	Earthquake, Ground Motion, and Tsunamis	249
	Masanori Hamada and Michiya Kuno	
14	Dynamic Response Analysis	269
	Masanori Hamada	
15	Earthquake-Resistant Design	287
	Satsuya Soda, Michiya Kuno and Masanori Hamada	

Earthquake Engineering for Nuclear Facilities

Hamada, M.; Kuno, M. (Eds.)

2017, X, 303 p. 244 illus., 108 illus. in color., Hardcover

ISBN: 978-981-10-2515-0
