1	Introduction	1
1.1	Background	1
1.2	Review	2
1.2.1	Lorentz Spacecraft	2
1.2.2	Spacecraft Relative Motion	4
1.3	Outline of the Book	6
	References	8
2	Dynamical Model of Lorentz-Augmented Orbital Motion	11
2.1	Model of Absolute Orbital Motion	11
2.1.1	Geomagnetic Field	11
2.1.2	Two-Body Model	15
2.1.3	J_2 -Perturbed Model	18
2.2	Model of Relative Orbital Motion	19
2.2.1	Two-Body Model	19
2.2.2	Analytical Solutions to Two-Body Model	23
2.2.3	J_2 -Perturbed Model	27
2.3	Conclusions	32
	References	33
3	Relative Navigation of Lorentz-Augmented Orbital Motion	35
3.1	State and Observation Equations	35
3.1.1	State Equation of Relative Translational Motion	36
3.1.2	State Equation of Relative Rotational Motion	38
3.1.3	Observation Equation	39
3.2	Filtering Algorithm for Relative Navigation	41
3.2.1	EKF Algorithm	41
3.2.2	UKF Algorithm	44
3.2.3	Numerical Simulations	44
3.3	Conclusions	50
	References	50

4 Dynamics and Control of Lorentz-Augmented Spacecraft	
Hovering	53
4.1 Problem Formulation and Dynamical Model	53
4.1.1 Problem Formulation.	53
4.1.2 Dynamical Model	54
4.2 Case of Two-Body Circular Reference Orbit	58
4.2.1 Open-Loop Control	58
4.2.2 Closed-Loop Control.	68
4.2.3 Numerical Simulation	68
4.3 Case of Two-Body Elliptic Reference Orbit	76
4.3.1 Open-Loop Control	76
4.3.2 Closed-Loop Control.	77
4.3.3 Numerical Simulation	82
4.4 Case of J_2 -Perturbed Reference Orbit.	88
4.4.1 Dynamical Model	88
4.4.2 Open-Loop Control	91
4.4.3 Numerical Simulation	91
4.5 Conclusions	94
References.	95
5 Dynamics and Control of Lorentz-Augmented Spacecraft	
Formation Flying	97
5.1 Problem Formulation and Dynamical Model	97
5.1.1 Problem Formulation.	97
5.1.2 Dynamical Model	98
5.2 Case of Two-Body Circular Reference Orbit	99
5.2.1 Formation Configurations in Circular Orbits	99
5.2.2 Problem Formulation.	101
5.2.3 Open-Loop Control	104
5.2.4 Closed-Loop Control.	106
5.2.5 Numerical Simulation	106
5.3 Case of Two-Body Elliptic Reference Orbit	114
5.3.1 Formation Configurations in Elliptic Orbits.	114
5.3.2 Open-Loop Control	115
5.3.3 Closed-Loop Control.	116
5.3.4 Numerical Simulation	122
5.4 Conclusions	130
References.	130
6 Dynamics and Control of Lorentz-Augmented Spacecraft	
Rendezvous	131
6.1 Problem Formulation and Dynamical Model	131
6.1.1 Problem Formulation.	131
6.1.2 Dynamical Model	132

6.2	Case of Two-Body Reference Orbit	133
6.2.1	Open-Loop Control	133
6.2.2	Closed-Loop Control	134
6.2.3	Numerical Simulation	135
6.3	Case of J_2 -Perturbed Reference Orbit	138
6.3.1	Dynamical Model	138
6.3.2	Open-Loop Control	139
6.3.3	Numerical Simulations	139
6.4	Conclusions	142
	References	142
Appendix		143

Dynamics and Control of Lorentz-Augmented Spacecraft
Relative Motion

Yan, Y.; Huang, X.; Yang, Y.

2017, XI, 148 p. 70 illus. in color., Hardcover

ISBN: 978-981-10-2602-7
