1	Introduction	1
1.1	Background	1
1.2	Aims and Objectives	2
	References	3
2	Literature Review	5
2.1	Anthocyanins	5
2.2	Color of Anthocyanins	7
2.3	Function of Anthocyanins	7
2.4	Stability of Anthocyanins	8
2.4.1	Structure Influence	8
2.4.2	Co-pigmentation Influence	9
2.4.3	pH Influence	9
2.4.4	Thermal Influence	9
2.4.5	Solid Content Influence	10
2.4.6	Water Activity (Aw) Influence	10
2.4.7	Oxygen Influence	11
2.5	Degradation of Anthocyanins	11
	References	11
3	Monte Carlo Modelling of Non-isothermal Degradation of Two Cyanidin-Based Anthocyanins in Aqueous System at High Temperatures and its Impact on Antioxidant Capacities	15
3.1	Introduction	15
3.2	Materials and Methods	16
3.2.1	Materials	16
3.2.2	Purification Procedure of Anthocyanins	16
3.2.3	Thermal Treatment of Anthocyanin Solutions	17
3.2.4	Quantification and Identification of Anthocyanins Using LC/DAD and LC/MS	17
3.2.5	Non-isothermal Kinetic Modelling	18
3.2.6	Monte Carlo Simulation	20

3.2.7	Validation of the Developed Models	21
3.2.8	Antioxidant Capacity Measurement.	21
3.3	Results and Discussion.	22
3.3.1	Anthocyanin Composition of Black Rice	22
3.3.2	Degradation Rate Constant and Activation Energy	22
3.3.3	Model Validation	25
3.3.4	Monte Carlo Simulation of Non-isothermal Degradation	25
3.3.5	Antioxidant Capacity of Thermally Treated Anthocyanin Solutions	28
3.4	Conclusions	29
	References.	29
4	Combined Effect of pH and High Temperature on the Stability and Antioxidant Capacity of Two Anthocyanins in Aqueous Solution.	33
4.1	Introduction	33
4.2	Materials and Methods.	34
4.2.1	Materials.	34
4.2.2	Cleaning Procedure of Anthocyanins.	34
4.2.3	Preparation of Anthocyanin Buffer Solution	34
4.2.4	Thermal Treatment of Anthocyanin Buffer Solutions	35
4.2.5	Quantification of Anthocyanins Using HPLC/DAD	35
4.2.6	Antioxidant Capacity Analysis.	35
4.2.7	Kinetic Model Development	35
4.2.8	Statistical Analysis	37
4.3	Results and Discussion.	37
4.3.1	pH Profile of Anthocyanin Buffer Solutions	37
4.3.2	Thermal Degradation Kinetics	37
4.3.3	Antioxidant Capacity	43
4.4	Conclusions	46
	References.	46
5	Changes in the Color, Chemical Stability and Antioxidant Capacity of Thermally Treated Anthocyanin Aqueous Solution Over Storage	49
5.1	Introduction	49
5.2	Materials and Methods.	50
5.2.1	Materials.	50
5.2.2	Purification Procedure of Anthocyanins.	50
5.2.3	Thermal Treatment of Anthocyanin Aqueous Solution.	51
5.2.4	Accelerated Shelf-Life Testing.	51
5.2.5	Quantification of Anthocyanins Using HPLC/DAD	51
5.2.6	Color Measurement and Modelling	51
5.2.7	Antioxidant Capacity Measurement.	52
5.2.8	Statistical Analysis	52

5.3	Results and Discussion.	53
5.3.1	Changes in Color During Storage	53
5.3.2	Analysis and Modelling of TCD	56
5.3.3	Changes in Anthocyanin Concentration During Storage	58
5.3.4	Changes in Antioxidant Capacity During Storage	60
5.4	Conclusions	63
	References	63
