

# Contents

## Part I Fracture Mechanics

<b>Strong but Slippery Adhesion of Mushroom-Shaped Polysaccharide Gels</b> . . . . .	3
Yoshimi Tanaka and Teppei Nakamichi	
<b>Bridging the Scales Between Discrete and Continuum Dislocation Models</b> . . . . .	15
Patrick van Meurs	
<b>Phase Field Crack Growth Model with Hydrogen Embrittlement.</b> . . . .	27
Takeshi Takaishi	
<b>On Singularities in 2D Linearized Elasticity</b> . . . . .	35
Hiromichi Itou	

## Part II Shape Optimization

<b>Two-Parameter Topological Expansion of Helmholtz Problems with Inhomogeneity.</b> . . . .	51
Victor A. Kovtunen	
<b>Solution of Shape Optimization Problem and Its Application to Product Design</b> . . . . .	83
Hideyuki Azegami	
<b>Shape Optimization by GJ-Integral: Localization Method for Composite Material.</b> . . . .	99
Kohji Ohtsuka	
<b>Shape Optimization Approach by Traction Method to Inverse Free Boundary Problems</b> . . . . .	111
Shogen Shioda, Ahsani Ummi Maharani, Masato Kimura, Hideyuki Azegami and Kohji Ohtsuka	

### **Part III Earthquakes and Inverse Problems**

<b>Synthesis of Seismic Wave Envelopes Based on the Markov Approximation</b> . . . . .	127
Kentaro Emoto	

<b>Propagation Velocity of Pulse-Like Rupture Along Earthquake Faults</b> . . . . .	143
Shiro Hirano	

<b>Inverse Source Problem for a Wave Equation with Final Observation Data</b> . . . . .	153
Daijun Jiang, Yikan Liu and Masahiro Yamamoto	

### **Part IV Fluid Mechanics and Interface Dynamics**

<b>The Contribution of Kawada to the Analytical Solution for the Velocity Induced by a Helical Vortex Filament and Modern Applications of Helical Vortices</b> . . . . .	167
Yasuhide Fukumoto, Valery L. Okulov and David H. Wood	

<b>A New Model for Fungal Hyphae Growth Using the Thin Viscous Sheet Equations</b> . . . . .	175
Thomas de Jong, Georg Prokert and Joost Hulshof	

<b>On Boundary Conditions for Hele-Shaw Problem</b> . . . . .	185
Hisasi Tani	

### **Part V Industrial Applications**

<b>Computer Simulation of the Phase Separation of Polymeric Materials for Industrial Applications</b> . . . . .	197
Takeshi Aoyagi	

<b>Highly Parallel Computation of Generalized Eigenvalue Problem in Vibration for Automatic Transmission of Vehicles Using the Sakurai–Sugiura Method and Supercomputers</b> . . . . .	207
Takanori Ide, Yuto Inoue, Yasunori Futamura and Tetsuya Sakurai	

<b>Mathematical Analysis of Synchronization from the Perspective of Network Science</b> . . . . .	219
Hirotada Honda and Atusi Tani	

<b>Index</b> . . . . .	229
------------------------	-----

Mathematical Analysis of Continuum Mechanics and  
Industrial Applications

Proceedings of the International Conference CoMFoS15

Itou, H.; Kimura, M.; Chalupecky, V.; Ohtsuka, K.;

Tagami, D.; Takada, A. (Eds.)

2017, VIII, 231 p. 69 illus., 32 illus. in color., Hardcover

ISBN: 978-981-10-2632-4
