

Contents

1	Introduction	1
1.1	Human Body Communication	4
1.2	Objectives	6
1.3	Organization of the Book	7
2	Literature Review	9
2.1	IBC Specifications and Methods	10
2.2	Electrical Properties of the Human Tissues	12
2.3	Modeling Methods of Body Tissues	13
2.3.1	Human Tissues Parametric Model	13
2.3.2	Body Channel Circuit Model	17
2.3.3	Finite Element Model (FEM)	18
2.3.4	Circuit-Coupled FEM Model	19
2.3.5	FDTD Model	20
2.3.6	Theoretical Electromagnetic Model	20
2.4	IBC Transceiver Design	21
2.5	IBC Challenges	24
2.6	Summary	25
3	Experimental Methodology	27
3.1	Pre-measurement Preparation and Safety	27
3.2	Measurement Setup	28
3.2.1	On-Body Electrodes	29
3.2.2	Human Body Channel	30
3.2.3	Electronic Equipment	31
3.3	Summary	36
4	Empirical Measurement	37
4.1	Influence of Joint-Segments	38
4.1.1	Two-Electrode Configuration	40
4.1.2	Four-Electrode Configuration	42
4.1.3	Discussion	45

4.2	Effect of Body Posture on IBC.	46
4.2.1	Discussion.	51
4.3	Arm Posture and Effect of Channel Length	52
4.3.1	Discussion.	55
4.4	Environmental Effects on IBC	56
4.4.1	Results and Discussion	56
4.5	Summary	58
5	Body Channel Modeling	59
5.1	Background on IBC Channel Models.	60
5.2	Methods	61
5.2.1	Anatomy of the Human Arm	62
5.2.2	Limb-Joint Circuit Model	64
5.3	Measurement and Simulation	65
5.3.1	Empirical Measurement.	66
5.3.2	Circuit Model Simulation	68
5.4	Results	73
5.5	Discussion	75
5.6	Summary and Conclusion.	78
6	IBC System Design	79
6.1	IBC Hardware Overview	80
6.2	High Frequency Pulse Transmission.	82
6.2.1	Pulse Duty Cycle Effect on IBC	86
6.3	IBC Hardware Architecture	88
6.3.1	Transmitter Unit	89
6.3.2	Analog Front-End (AFE) for Receiver	93
6.3.3	Receiver Unit	94
6.4	Measurement Results and Discussion	95
6.5	Summary and Conclusion.	99
	Appendix: RTL Schematic	101
	References	103

A Novel Intrabody Communication Transceiver for
Biomedical Applications

Seyedi, M.H.; Huei Lai, D.T.

2017, XXIII, 108 p. 77 illus., 69 illus. in color., Hardcover

ISBN: 978-981-10-2823-6
