

Contents

1	Introduction	1
1.1	NHC-Catalyzed Annulations Via Homoenolates	1
1.1.1	Generation Via α,β -Unsaturated Aldehydes for Construction of Heterocycles	1
1.1.2	Generation Via α,β -Unsaturated Aldehydes for Construction of All Carbon Cycles	6
1.1.3	Generation Via Saturated Esters for Construction of Heterocycles	9
1.2	NHC-Catalyzed Annulations Via Azolium Enolates	10
1.2.1	Generation Via Ketenes	10
1.2.2	Generation Via Functionalized Aldehydes	11
1.2.3	Generation Via α,β -Unsaturated Aldehydes	16
1.2.4	Generation Via Esters and Aldehydes	18
1.3	NHC-Catalyzed Annulations Via α,β -Unsaturated Acyl Azolium Intermediates	20
1.3.1	Generation Via α,β -Unsaturated Esters	20
1.3.2	Generation Via α,β -Unsaturated Acyl Fluorides	21
1.3.3	Generation Via Oxidation of Homoenolate	22
1.3.4	Generation Via Bromoenals	23
1.3.5	Generation Via Ynals	23
	References	25
2	NHC-Catalyzed Annulations of Nitroalkenes	29
2.1	Introduction	29
2.2	Optimization of Conditions	30
2.3	Substrate Scope	32
2.4	Reduction of the Nitro Group of Dihydropyran	35
2.5	Studies on the Enantioselectivity of the Annulation Process	36

2.6	Mechanistic Studies	37
2.7	Summary	38
2.8	Experimental Part	40
2.8.1	Materials	40
2.8.2	[4+2] Annulation of Nitroalkenes with α -Cyano- α , β -Unsaturated Ketones Catalyzed by NHC-Precursor Cat.8b	40
2.8.3	[4+2] Annulation of Nitroalkenes with α -Cyano- α , β -Unsaturated Ketones Catalyzed by NHC-Precursor Cat.8c	52
2.8.4	Reduction of the Nitro Group of 2.3.	58
2.8.5	Recation Catalyzed by Chiral NHC-Precursor Cat.2d	60
	References.	60
3	NHC-Catalyzed Enantioselective Annulations of Enals	63
3.1	Introduction	63
3.2	Optimization of Conditions.	66
3.3	Substrate Scope	67
3.4	Applications	67
3.5	Mechanistic Studies	70
3.6	Conclusion	71
3.7	Experimental Section	72
3.7.1	NHC-Catalyzed [4+2] Annulation of Enals and Azodicarboxylates	72
3.7.2	Synthesis of Tetrahydropyridazinones	82
3.7.3	Synthesis of γ -Amino Esters	83
	References.	84
4	NHC-Catalyzed Cyclocondensation of α,β-Unsaturated Carboxylic Acids	87
4.1	Introduction	87
4.2	Optimization of Conditions.	89
4.3	Substrate Scope	90
4.4	Mechanistic Studies	93
4.5	Optimization of Conditions.	93
4.6	Substrate Scope	94
4.7	Summary	97
4.8	Experimental Part	99
4.8.1	Enantioselective [3+2] Annulation with Amino Ketones	99
4.8.2	Enantioselective [3+3] Annulation with Sulfamate-Derived Cyclic Imines	107

4.8.3	Enantioselective [3+3] Annulation with Sultam-Derived Cyclic Imines.	112
4.8.4	Reaction with Acyclic Imine 4.9.	117
	References.	117
5	Summary	121
	References.	123

New Strategies for N-Heterocyclic Carbenes Catalyzed
Annulations

Chen, X.

2017, XIV, 123 p. 66 illus., 13 illus. in color., Hardcover

ISBN: 978-981-10-2898-4
