

Contents

1	From Circle Integral to Ellipsoidal Integral	1
1.1	Introduction	1
1.2	From Circle and Elliptical Integrals to Ellipsoidal Integral	2
2	Application Background of Circle Integrals	11
3	Application Background of Elliptic Integrals	15
3.1	Capacitance of Elliptic Conductor C	15
3.2	Perimeter of Ellipse L	17
4	Application Background of Ellipsoidal Integral	21
4.1	Capacitance of Ellipsoid Conductor C	23
4.2	Complete Ellipsoidal Integral of the First Kind	26
4.3	Complete Ellipsoidal Integral of the Second Kind	32
5	Theory of Ellipsoidal Function	43
5.1	Introduction of Ellipsoidal Function	43
5.1.1	The Basic Property of the Ellipsoidal Function	44
5.1.2	Derivative of Ellipsoidal Function	45
5.1.3	Integral of Ellipsoidal Function	46
5.2	Addition Theorem of Ellipsoidal Function	48
5.2.1	Addition Theorem	48
5.2.2	Double Argument Formula	54
5.3	Periodicity of the Ellipsoidal Function	55
5.3.1	The Real Period of the Ellipsoidal Function	55
5.3.2	The Imaginary Period of the Ellipsoidal Function	58
6	Conformal Mapping of Ellipsoidal Integral	63
6.1	Conformal Mapping of Ellipsoidal Integral	63
6.2	Dual Periodicity of Ellipsoidal Function	67

7 Network of Ellipsoidal Function	71
7.1 Design of Filter Based on Ellipsoidal Function	71
7.2 Analysis of Ellipsoidal-Function Filter	72
7.3 Ellipsoidal Function Filter	79
7.3.1 Frequency Response Function of the Filter	79
7.3.2 Synthesis of the Ellipsoidal Function Filter	81
7.3.3 Ellipsoidal Function Filter with $n = 3$	84
Appendix A: Correlation of Two Kinds of Ellipsoidal Integrals	89
Appendix B: Correlation of $E(\xi)$ and $n(x, e, h)$	91
Appendix C: Other form of M.	93
References	97

Notes on the Ellipsoidal Function

Liang, C.-H.

2017, XI, 97 p. 28 illus., Hardcover
