

Contents

1	Introduction	1
1.1	Clinical Perspective	1
1.2	Failure of Implants	3
1.3	Defining Biomaterials and Related Concepts	6
1.4	Conclusion	10
	References	12
2	Case Study: Hydroxyapatite–Titanium Bulk Composites for Bone Tissue Engineering Applications	15
2.1	Background: Brittleness of Hydroxyapatite	15
2.2	Processing of HA–Ti Composites	18
2.2.1	Conventional Sintering	18
2.2.2	Advanced Sintering	21
2.3	Mechanical Properties	22
2.4	Toughening Mechanisms and Toughness Properties	26
2.5	Correlation with Existing Theoretical Models	33
2.6	Biocompatibility Properties of HA–Ti Composites	36
2.6.1	<i>in vivo</i> Biocompatibility	36
2.7	Future Perspective	39
	References	40
3	Case Study: Hydroxyapatite Based Microporous/Macroporous Scaffolds	45
3.1	Relevance of Porous Scaffolds	45
3.2	HA-Based Microporous Scaffolds	48
3.2.1	Osteoblast-like Cell Adhesion and Spreading	48
3.2.2	Osteoblast-like Cell Growth and Differentiation	50
3.3	Polymer-Replication Based Processing of HA-Based Macroporous Scaffold	52

3.4	HA-Gelatin Based Micro Porous Scaffold.	54
3.4.1	Freeze Drying—Cryogenic Curing Based Processing Approach.	57
3.4.2	Micro-CT Analysis of Porous Architecture	58
3.4.3	BSA Adsorption/Release	62
3.5	Challenges in Bone-Mimicking Porous Scaffolds	64
3.6	Closure	66
	References.	67
4	Case Study: Osseointegration of Strontium Containing Glass Ceramic	73
4.1	Introduction	73
4.2	Materials and Methods	75
4.2.1	Materials	75
4.2.2	<i>in vivo</i> Implantation.	76
4.2.3	Explantation and Histopathological Analysis.	77
4.2.4	Bone Labeling.	78
4.2.5	Micro-CT Analysis	79
4.2.6	Statistical Analysis	80
4.2.7	Bone Morphometric Analysis	80
4.3	<i>in vivo</i> Osseointegration	82
4.3.1	Histological Observations	83
4.3.2	Bone Labeling.	84
4.4	Discussion	88
4.5	Closure	94
	References.	95
5	Microstructure and Composition Dependent Physical and Cytocompatibility Property of Glass-Ceramics for Dental Restoration.	99
5.1	Background—Materials for Dental Restorations	99
5.2	Microstructure-Mechanical Property Correlation	102
5.3	Biom mineralisation in Artificial Saliva	108
5.4	Wear Resistance in Artificial Saliva	110
5.5	Cell Proliferation and Differentiation, <i>in vitro</i>	113
5.6	Bactericidal Property, <i>in vitro</i>	114
5.7	Correlation Among Microstructure, Property and Cytocompatibility	117
5.8	Summary	120
	References.	120
6	Processing, Tensile and Fracture Properties of Injection Molded HDPE–Al₂O₃–HAp Hybrid Composites.	125
6.1	Introduction	125
6.2	Injection Moulding	127

6.3	HDPE Composites with 30 % Ceramic Fillers	128
6.3.1	Processing Related Challenges	128
6.3.2	Compositional Dependence of Viscoelastic Properties	131
6.3.3	Notched Behavior in Flexure.	132
6.4	HDPE Composites with 40 % Ceramic Fillers	134
6.4.1	Tensile Properties	137
6.4.2	Cell Adhesion and Proliferation.	137
6.4.3	<i>in vitro</i> Mineralization.	138
6.4.4	Protein Adsorption and Cell Functionality.	139
6.4.5	Influence of Surface Energy on <i>in vitro</i> Mineralization	141
6.4.6	Osseointegration Property	144
6.5	Summary	147
	References.	148
7	Case Study: Development of Acetabular Socket Prototype	151
7.1	Introduction	151
7.2	Clinical Perspective	152
7.3	Polymer Composites in THR	154
7.4	Acetabular Socket Prototype Fabrication	158
7.4.1	Lab-Scale Testing of Coupon Samples	159
7.4.2	Prototype Fabrication.	165
7.5	Summary	168
	References.	169
8	Case Study: 3D Printed Cartilage	173
8.1	Introduction	173
8.2	Limitation of Scaffold-Based Cartilage Tissue Engineering	174
8.3	3D Bioprinting	176
8.3.1	Bioink	176
8.3.2	Printers	179
8.3.3	Printing Process and Parameters	180
8.4	Characterization of 3D Printed Constructs	180
8.4.1	Cell Viability.	180
8.4.2	Printing of Chondrogenic Construct and Characterization	181
8.4.3	Bioprinting of Complex Cartilaginous Tissue Constructs	185
8.5	Future Perspective	186
	References.	187

9	Clinical Trials	191
9.1	Introduction	191
9.2	Some Concepts and Definitions	192
9.2.1	Clinical Trial	192
9.2.2	Clinical Trial Protocol	192
9.2.3	Good Clinical Practice (GCP)	193
9.2.4	Good Laboratory Practice (GLP)	193
9.2.5	Klimisch Score	194
9.3	Some Illustrative Examples to Substantiate the Need of Clinical Trials	194
9.3.1	Osteoporosis Treatment	195
9.3.2	Clinical Trials on New Hip Implants	196
9.3.3	Prosthetic Treatment	196
9.4	Types of Clinical Trials and Randomised Control Trial	198
9.4.1	Randomization	199
9.4.2	Allocation Concealment	199
9.4.3	Blinding	200
9.5	Clinical Trial Phases	201
9.6	Ethical Issues and Approval Processes	203
9.7	Clinical Trial Protocol	205
9.8	Illustrative Example—Design of Limited Clinical Trial Experiments in Prosthetics	206
9.9	Clinical Trials—Case Studies	206
9.9.1	Hydroxyapatite Based Burr-Hole Buttons for Cranioplasty Applications	207
9.9.2	Degradable Hydroxyapatite-Bioactive Glass Ceramic for Iliac Crest Implant	209
9.9.3	Calcium Phosphate Cement for the Treatment of Human Periodontal Intraosseous Defects	212
9.9.4	Treating Tibial Plateau Fractures with Synthetic Porous Hydroxyapatite Granules	213
9.10	Closure	215
	References	215
10	Case Study: Development of Constructs for Maxillofacial Reconstruction	217
10.1	Introduction	217
10.2	Clinical Perspective	220
10.3	Textile Braided Structure	222
10.3.1	Preparation and Characterization of Silk Braids	222
10.3.2	Case Study Using Silk Braids	223
10.4	3D Printed Hydroxyapatite	225

10.5	Characterization	226
10.5.1	<i>in vitro</i> Cell Culture	226
10.5.2	<i>in vivo</i> Osseointegration	227
10.6	Future Perspective	230
	References.	230
11	Assessment of Technology and Manufacturing Readiness	
	Levels	235
11.1	Introduction	235
11.2	Concept of Technology Readiness Level (TRL)	235
11.2.1	Various TRL Stages	235
11.3	Concept of Manufacturing Readiness Level (MRL)	240
11.4	Various MRL Levels	241
11.5	Illustrative Examples of TRL Assessment in Cartilage Tissue Engineering Research	242
11.6	TRL Concept Illustration in Developing Natural Bone-Mimicking Composites	244
11.7	Closure	245
	References.	246
12	A Way Forward	247
12.1	Patient-Specific Implants.	247
12.2	Design Related Challenges for Porous Scaffolds.	249
12.3	Challenges in Mechanical Property Evaluation	250
12.4	Additive Manufacturing Related Challenges	251
12.5	Challenges in Biomedical Device Development	254
	References.	257
