

Contents

1	Introduction	1
1.1	Development of SAR	1
1.2	Development of GMTI and GMTIm Techniques	3
1.2.1	Technique Backgrounds	3
1.2.2	Recent Development of GMTI and GMTIm Technique	4
1.3	Book Structure and Organization	6
	References	8
2	SAR Ground Moving Target Indication and Imaging Theory	13
2.1	Introduction	13
2.2	Principle of SAR	14
2.3	Signal Analysis of Moving Target in SAR	16
2.3.1	Signal Model of a Moving Target	16
2.3.2	Doppler Centroid	19
2.3.3	Doppler Modulation Rate	21
2.3.4	RCM	22
2.4	Principle of Existing GMTI Algorithms	24
2.4.1	Principle of Single-Antenna GMTI Algorithms	24
2.4.2	CFAR Detection	26
2.5	Principle of GMTIm Algorithms	28
2.5.1	RCMC of Moving Targets	28
2.5.2	Motion Parameter Estimation	30
2.6	Conclusion	31
	References	31
3	Fast Moving Target Indication and Imaging in Stripmap SAR	33
3.1	Introduction	33
3.2	Echo Model of Fast Moving Target	34

3.3	Doppler Centroid Estimation of the Clutter	38
3.3.1	Principle of Energy Balancing Method	38
3.3.2	Adaptive Doppler Centroid Estimation Algorithm Based on Curve Fitting	39
3.3.3	Simulation Results and Analysis	41
3.4	Multiple Moving Target Indication and Spectrum Extraction	43
3.4.1	The Two-Step GMTI Algorithm	43
3.4.2	Real Data Processing Results	44
3.5	Fast Moving Target Imaging Algorithm Based on Hough Transform and Third-Order PFT.	47
3.5.1	Principle of the Proposed Algorithm.	47
3.5.2	Processing Steps of the Algorithm	49
3.5.3	Results of the Simulation and Real Data Processing.	51
3.6	Conclusion	55
	References.	56
4	Ground Moving Target Indication and Imaging in WAS Mode	59
4.1	Introduction	59
4.2	Key Technique in Airborne SAR Mechanic Scanning Mode	60
4.2.1	Mechanic Scanning Mode and the Principle of DBS	60
4.2.2	System Design Scheme of the Airborne Mechanic Scanning SAR.	63
4.3	Real-Time DBS Algorithm Based on CZT.	64
4.3.1	The Modification of Traditional DBS Algorithm.	64
4.3.2	Principle of the Proposed Algorithm.	64
4.4	GMTI and Parameter Estimation Algorithm Based on Multiple Revisits	67
4.5	Conclusion	69
	References.	70
5	GMTI and GMTIm in FMCW SAR	71
5.1	Introduction	71
5.2	Principle of FMCW SAR and Signal Model	72
5.2.1	Principle of FMCW SAR	72
5.2.2	Signal Model and Analysis	74
5.3	Nonlinearity Correction of FMCW SAR	75
5.3.1	Analysis of the Nonlinearity Problem	76
5.3.2	Principle of Derivative Algorithm.	77
5.3.3	Nonlinearity Correction Algorithm Based on Homomorphic Deconvolution	78

- 5.4 Along-Track Moving Target Indication and Imaging in FMCW SAR 84
 - 5.4.1 Signal Model of Moving Targets in FMCW SAR. 84
 - 5.4.2 Along-Track Moving Target Indication Algorithm in FMCW SAR. 85
- 5.5 Conclusion 89
- References. 90
- 6 Non-ideal Motion Error Analysis in GMTIm 93**
 - 6.1 Introduction 93
 - 6.2 Motion Error Compensation in Stationary SAR Imaging 94
 - 6.2.1 Motion Error Analysis in Airborne SAR. 94
 - 6.2.2 Principle of PGA. 97
 - 6.3 Signal Model of Moving Target with Non-ideal Motion Error . . . 100
 - 6.4 Motion Error Analysis 102
 - 6.4.1 Platform Velocity Error. 102
 - 6.4.2 Cross-Track Velocity Error of the Moving Target. 102
 - 6.5 Non-ideal Motion Error Estimation and Correction Algorithm . . . 104
 - 6.5.1 Algorithm Principle. 104
 - 6.5.2 Simulation and Raw Data Processing 105
 - 6.6 Conclusion 108
 - References. 109

Study on Ground Moving Target Indication and Imaging
Technique of Airborne SAR

Yang, J.

2017, XX, 109 p. 57 illus., 27 illus. in color., Hardcover
