

Contents

Renaissance and Electric Vehicles Development	1
C.C. Chan	
Smart Mobility: Driver State Estimation and Advanced Driver-Vehicle Interfaces	11
Lucas P.J.J. Noldus, Andrew J. Spink, Ramon Bollen and Tobias Heffelaar	
Modular Hydraulic Trailer Technology	19
Jochen Landes	
Current Situation and Prospect of Transportation Development in China	25
Lu Huapu	
Civil Engineering Innovation Shaping Mobility of the Future	37
Boris Reyher and Mike Schlaich	
Future Shapes of Bridges in Urban Environment	43
Max Meyer	
Making of Bandra-Worli Sea Link	49
Santosh Rai	
Digitally Reimagining Mobility	59
K. Ananth Krishnan	
Willingness to Pay for Improvement in Service Quality of Public Transit System	69
Vinod Vasudevan and Keshav Lunani	
Shinkansen/High Speed Railway	73
Harutoshi Hayasaka	
Unique Engineering Features of Delhi Metro	79
Mangu Singh	

Creating Sustainable Transportation System in India—Materials Engineer Perspective	87
Aravind Krishna Swamy and Priyansh Singh	
Lack of Enforcement Nullifies the Benefits of Mobility Improvement Measures: Some Examples	91
L.R. Kadiyali	
Optimizing Traffic Control for a Minimization of Fuel Consumptions and Emission Values	99
Zsuzsanna Bede and Péter Gáspár	
Author Index	103

Mobility Engineering

Proceedings of CAETS 2015 Convocation on Pathways
to Sustainability

Tandon, M.C.; Ghosh, P. (Eds.)

2017, XIV, 103 p. 49 illus., 42 illus. in color., Hardcover

ISBN: 978-981-10-3098-7
