
Contents

Part I Involvement of Proteases in Various Diseases

1	Matrix Metalloproteinases in Breast Carcinoma	3
	Irena Ranogajec	
2	Multifaceted Role of Matrix Metalloproteases on Human Diseases	21
	Soumitra Roy, Asmita Pramanik, Tapati Chakraborti and Sajal Chakraborti	
3	Complex Mechanisms of Matrix Metalloproteinases Involvement in Endometrial Physiology and Pathology—An Update	41
	Cornelia Amalinei, Irina-Draga Căruntu, Simona Eliza Giușcă and Raluca Anca Balan	
4	<i>Plasmodium</i> Proteases as Therapeutic Targets Against Malaria . . .	69
	Asrar Alam	
5	Role of Metalloproteinases in Melanoma Growth and Progression	91
	Cinthia Figueiredo and Ana Candida Araujo e Silva	
6	Cysteine Cathepsins: In Health and Rheumatoid Arthritis	103
	Nalini Ganesan	
7	Proteases in Neuropathophysiology	131
	Abhijit Sarkar, Sumit Ghosh, Sayanta Dutta and Parames C. Sil	
8	Proteases in Wound Healing and Immunity	147
	Namrata Singh and Debasish Bhattacharyya	
9	Translating the Knowledge of Functional Dynamics Toward Designing Inhibitors of BACE1, a Key Aspartate Protease in Alzheimer's Disease	171
	Sandipan Chakraborty and Soumalee Basu	

10 Serine Proteases and Their Inhibitors in Human Health and Disease	195
K. Vijaya Rachel and Gandreddi V.D. Sirisha	
11 Metalloproteases and Human Diseases: The Astacin Family	227
Sibani Chakraborty, Asim K. Bera, Ankur Chaudhuri and Satyajit Sen	
12 Proteases of Parasitic Helminths: Their Metabolic Role in Establishment of Infection in the Host.	247
Veena Tandon, Bidyadhar Das and Shakti Kumar	
13 Natural Polyphenols as Prospective Inhibitors for MMPs Remodeling in Human Diseases	263
Yashika Rustagi, Aditi Jain, Sharad Saxena and Vibha Rani	
14 Autophagic Proteases: Functional and Pathophysiological Aspects	285
Pijush Kanti Pramanik, Dibyendu Paik, Asmita Pramanik, Md Nur Alam, Partha Das and Tapati Chakraborti	
15 ADAM and ADAMTS Family of Metalloproteinases: Role in Cancer Progression and Acquisition of Hallmarks	303
Rajakishore Mishra and Siddavaram Nagini	
16 Role of Proteases in Lung Disease: A Brief Overview	333
Sajal Chakraborti, Jaganmay Sarkar, Pijush Kanti Pramanik and Tapati Chakraborti	
17 Caspases: Moonlighting Proteins with Theranostic Potential	375
Siddavaram Nagini and Satwinderjeet Kaur	
18 Functional Aspects of Activated Protein C (APC) in Regulating Homeostasis and Disease.	395
Ramesh Prasad, Abhishek Roy and Prosenjit Sen	
Part II Role of Proteases in Cardiovascular Diseases	
19 Role of Calpains (Calcium-Dependent Proteases) on Coronary Artery Disease and Metabolic Syndrome	411
Brittany A. Potz, M. Ruhul Abid and Frank W. Sellke	
20 Role of Matrix Metalloproteinases in the Development and Progression of Atherosclerosis.	425
Karina Di Gregoli and Jason Lee Johnson	
21 Protease Cathepsins in Cardiomyopathy: From Mechanism to Intervention	447
Rui Guo and Sreejayan Nair	

22	Cysteine-Dependent Aspartate-Specific Proteases in Coronary Artery Disease	463
	Gundapaneni Kishore Kumar and Hanumanth Surekha Rani	
23	Association of Matrix Metalloproteinases with CVD: Functional Aspects	473
	Veena Dhawan and Riyaz Ahmad Rather	
24	microRNAs-Mediated MMPs Regulation: Novel Mechanism for Cardiovascular Diseases	497
	Sharad Saxena, Yashika Rustagi, Aditi Jain, Sonali Dubey and Vibha Rani	

Proteases in Human Diseases

Chakraborti, S.; Chakraborti, T.; Dhalla, N.S. (Eds.)

2017, XVII, 513 p. 63 illus., 52 illus. in color., Hardcover

ISBN: 978-981-10-3161-8
