- 1 Introduction** 1
 - 1.1 Thesis Contributions 2
 - 1.2 Thesis Organization 3
 - References 4
- 2 Perspectives on Net Neutrality and Internet Fast-Lanes** 5
 - 2.1 Introduction 5
 - 2.2 Technology, Economic, and Societal Perspectives 6
 - 2.2.1 Technology Aspects 6
 - 2.2.2 Economic Aspects 7
 - 2.2.3 Societal Aspects 8
 - 2.3 A Worldwide Perspective 8
 - 2.3.1 United States 8
 - 2.3.2 United Kingdom 10
 - 2.3.3 European Union 10
 - 2.3.4 Canada 11
 - 2.3.5 Chile and Brazil 11
 - 2.3.6 India 11
 - 2.3.7 East Asia 12
 - 2.3.8 Australia 12
 - 2.4 A Three-Party Approach to Fast-Lanes 13
 - 2.5 Existing Solutions 14
 - 2.5.1 Quality Control Techniques 14
 - 2.5.2 Differentiated Pricing Models 16
 - 2.6 Conclusions 18
 - References 18
- 3 Dynamic Fast-Lanes and Slow-Lanes for Content Provider** 23
 - 3.1 Introduction 23
 - 3.2 Use-Cases and Opportunities 27

3.2.1	Real-Time/Streaming Video	27
3.2.2	Bulk Transfer	28
3.3	System Architecture and Algorithm	28
3.3.1	Architectural Choices and Trade-Offs	28
3.3.2	Operational Scenario	29
3.3.3	The Slow-Lane Scheduling	32
3.4	Simulation and Trace Analysis	33
3.4.1	Trace Data and Campus Network	33
3.4.2	Simulation Methodology and Metrics	35
3.4.3	Performance Results	36
3.5	Prototype Implementation and Experimentation	41
3.5.1	Hardware and Software Configuration	41
3.5.2	Experimental Results	43
3.6	Conclusions	44
	References	45
4	Economic Model for Broadband Fast Lanes and Slow Lanes	47
4.1	Introduction	47
4.2	New Broadband Ecosystem	49
4.2.1	Dynamic Fast-Lanes for Video Streams	50
4.2.2	Dynamic Slow-Lanes for Bulk Transfers	51
4.2.3	ISP Revenue from Fast- and Slow-Lanes	51
4.2.4	CP Revenue Enhancement	53
4.3	Evaluation Using Traffic Trace	53
4.3.1	Simulation Data and Methodology	53
4.3.2	Performance Results	55
4.4	Conclusions	58
	References	59
5	Dynamic Fast Lanes with Two-Sided Control	61
5.1	Introduction	61
5.2	Two-Sided Fast-Lane System Architecture	63
5.2.1	End-User Facing APIs	63
5.2.2	Content Provider Facing APIs	65
5.2.3	Challenges with Two-Sided Control	66
5.3	Dynamic Negotiation and Economic Model	67
5.3.1	Dynamic Negotiation Framework	67
5.3.2	Economic Model	69
5.4	Simulation Evaluation and Results	70
5.4.1	Simulation Trace Data	70
5.4.2	Simulation Methodology	71
5.4.3	Performance Results	72
5.5	Prototype Implementation	77
5.5.1	Campus Experimental Results	80

5.6	Conclusions	84
	References.	85
6	Third-Party Customization of Residential Internet Sharing.	87
6.1	Introduction	88
6.2	System Architecture	89
6.2.1	Entities, Roles, Flow of Events.	90
6.2.2	APIs Exposed by the Network	91
6.2.3	Service Creation by the SMP	93
6.3	Customizing Internet Sharing	93
6.3.1	Quality of Experience (QoE).	94
6.3.2	Parental Filters	95
6.3.3	Usage Control.	95
6.3.4	IoT Security	96
6.4	Prototype Implementation.	97
6.5	Residential Experimental Results	101
6.5.1	Quality of Experience	101
6.5.2	Parental Filters	103
6.5.3	Usage Control.	105
6.5.4	IoT Protection.	105
6.6	Conclusions	106
	References.	106
7	Conclusions and Future Work	109
7.1	Future Work.	110
	References.	111

The Role of SDN in Broadband Networks

Habibi Gharakheili, H.

2017, XXIII, 111 p. 31 illus., 21 illus. in color., Hardcover

ISBN: 978-981-10-3478-7
