

Contents

1	Graphs and Matrices	1
1.1	Graphs	1
1.2	Linear Spaces and Matrices	4
1.3	Adjacency Matrices	6
1.4	Adjacency Algebras	9
1.5	More Matrices Associated to Graphs	11
1.6	Generalizations of Graphs	14
2	Spectra of Finite Graphs	17
2.1	Characteristic Polynomials	17
2.2	Spectra	19
2.3	Spectra of K_n, C_n and P_n	21
2.4	Bounds of Spectra	25
2.5	Star Products	27
3	Spectral Distributions of Graphs	31
3.1	Quantum Probability	31
3.2	Matrix Algebras	33
3.3	Spectral Distributions of Graphs	36
3.4	Asymptotic Spectral Distributions: Motivating Examples	39
4	Orthogonal Polynomials and Fock Spaces	43
4.1	Orthogonal Polynomials	43
4.2	Chebyshev Polynomials	46
4.3	Interacting Fock Spaces and Quantum Decomposition	47
4.4	Boson, Free and Fermion Fock Spaces	50
4.5	Accardi–Bożejko Formula	57
5	Analytic Theory of Moments	63
5.1	Moments of Probability Measures	63
5.2	Determinate Moment Problem	66

5.3	Finite Jacobi Matrices	69
5.4	Continued Fractions	70
5.5	Stieltjes Transform	73
6	Method of Quantum Decomposition	79
6.1	Fock Spaces Associated with Graphs	79
6.2	Distance-Regular Graphs	82
6.3	Adjacency Algebras of Distance-Regular Graphs	84
6.4	Hamming Graphs	87
6.5	Homogeneous Trees and Kesten Distributions	91
6.6	Spidernets and Free Meixner Distributions	94
6.7	Asymptotic Quantum Decomposition	97
7	Graph Products and Asymptotics	101
7.1	Graph Products	101
7.2	Cartesian Products and Commutative Independence	105
7.3	Distance- k Graphs of Cartesian Powers	109
7.4	Kronecker and Strong Products	113
7.5	Restricted Lattices with Kronecker Product Structure	115
7.6	Lexicographic and Comb Products, and Monotone Independence	121
7.7	Star Products and Boolean Independence	125
	References	129
	Index	135

Spectral Analysis of Growing Graphs

A Quantum Probability Point of View

Obata, N.

2017, VIII, 138 p. 22 illus., 9 illus. in color., Softcover

ISBN: 978-981-10-3505-0
