Contents

1 Introduction 1
1.1 Cloud Computing and Communications 2
1.2 Heterogeneous Networks 5
References 8

2 Green Symbiotic Cloud Communications 11
2.1 Transcending Generic Cloud Computing 13
2.2 Pedestals for Systems of Future 15
2.2.1 *Data Caching*—Downloading the WWW onto the Cloud 15
2.2.2 Smart Home Integration 16
2.2.3 *Data Security*—Locally Distributed Storage 18
2.2.4 Incorporating Greenness 19
2.3 Design Postulates for GSCC Systems 20
2.3.1 Virtualization 20
2.3.2 Abstraction 20
2.3.3 Distributiveness 21
2.3.4 Greenness 21
2.3.5 Symbiosis 21
2.3.6 Pervasiveness/Ubiquity 22
2.3.7 Integration 22
2.3.8 Unification 22
2.3.9 Evolution 23
2.4 Architectural Design of GSCC Paradigm 23
2.4.1 Process Flow 25
2.4.2 Communication Process Flow 27
References 34

3 Green Symbiotic Cloud Communications—Theory and Experimentation 37
3.1 Capacity Maximization 38
3.1.1 Proposition I 40
3.2 Operational Power Dynamics 41
3.3 Experimental Evaluation 42
3.3.1 Simulation with Combined *LTE* and *Wi-Fi* 42
3.3.2 Experimental Results 54
References 62

4 *GSCC* Universal Modem: Unifying Communications 63
4.1 Architecture of *UCM* 64
4.1.1 Transmitter Architecture 65
4.1.2 Receiver Architecture 65
4.2 Channel Estimation of UCM 66
4.3 Signal Processing and Classification 68
4.4 Duplex Communication Module 71
4.4.1 Addressing Schematic 73
4.4.2 Throughput Evaluation 73
4.5 Experimental Analysis: *UCM* 74
References 78

5 GSCC Channel Characterization and Modelling 81
5.1 Existing Channel Models: Drawbacks 82
5.1.1 Voltage as a Parameter 82
5.1.2 Knowledge of the Network 83
5.1.3 Load Impedance 83
5.2 Theoretical Modelling: Channel Model 84
5.3 Theoretical Modelling: Channel Model 90
5.4 Conclusion and Future Directions 94
