

Contents

- 1 Introduction** 1
 - 1.1 What Is Emergency Response 1
 - 1.2 What Is a Decision Support System (DSS)? 3
 - 1.3 What Is an Emergency Response Decision Support System (ERDSS)? 4
 - 1.4 ERDSS Business Values 5
 - 1.5 Current ERDSS Research. 6
 - 1.6 ERDSS Challenges and Trends 6
 - References 9
- 2 The Emergency Response Decision Support System Framework** 11
 - 2.1 The ERDSS Framework. 11
 - 2.2 The Emergency Service Helpdesk Module. 12
 - 2.3 The Command and Coordination Center Module. 14
 - 2.4 The Emergency Plan Management Module 16
 - 2.5 The Emergency Relief Supplies Management Module. 17
 - 2.6 The Emergency Finance Budget Management Module 19
 - 2.7 The Emergency Organization and Activity Management Module 20
 - 2.8 The Emergency Knowledge Warehouse Module 22
 - 2.9 The Emergency Warning Management Module. 24
 - 2.10 The Emergency Alarm Management Module. 25
 - 2.11 The Problem Analysis and Management Module. 26
 - References 28
- 3 ERDSS Key Technologies** 29
 - 3.1 Disaster Assessment Technology 29
 - 3.1.1 Assessment Indicator Framework 29

3.1.2	Assessment Indicator Algorithm	30
3.1.3	Evaluation Process	31
3.2	Adaptive Information Evaluation Technology	31
3.3	Knowledge Management Technology	33
3.3.1	Constructing Ontologies	33
3.3.2	Case Similarity Algorithm	34
3.4	Knowledge Evaluation Technology	35
3.4.1	User Satisfaction and Artificial Quality Evaluation	35
3.4.2	Information Quality Classification and Evaluation Methods	36
3.5	Blog Evaluation Technology	37
3.5.1	Blog Theme Recognition in the Emergency Response Category	37
3.5.2	Blog Evaluation Model Based on Information Entropy	38
3.6	Information Dissemination Analysis Technology	38
3.6.1	Emergency Information Evaluation in the Virtual Community	38
3.6.2	Evaluation Framework for Emergency Information Propagation	39
3.6.3	Emergency Propagation Model for the Virtual Community	39
3.7	Emergency Resource Scheduling Technology	40
3.7.1	Modeling the Urban Emergency Supplies Scheduling Process	40
3.7.2	Unit Analysis of the Emergency Resource Scheduling Process	40
3.7.3	Establishing the Petri Net Model	41
3.8	Simulation Modeling Technology	42
3.8.1	Analysis of Agent Structures in the Emergency Plan	42
3.8.2	Petri Net-Based Emergency Plan Process Modeling	42
3.9	Other Related Technologies	43
3.9.1	Dijkstra's Algorithm	44
3.9.2	Ant Colony Optimization Algorithm	45
3.9.3	Network Terminal Reliability	46
3.9.4	Path Selection and Network Indices	47
3.9.5	Cost Estimation	47
3.9.6	Artificial Neural Networks (ANNs)	48
3.9.7	GIS (Geographic Information System)	49
3.9.8	Mobile Technology	50
3.9.9	Immunology	50
3.9.10	Social Media	51
3.9.11	Information and Communications Technology (ICT)	53

- 3.9.12 RFID (Radio Frequency Identification) 54
 - 3.9.13 Internet of Things 55
 - References 57
- 4 Case Study 61**
 - 4.1 Disaster Rescue Decision Support System for Beijing 61
 - 4.2 Beijing Flood Emergency Management Intelligent Database System 64

Emergency Response Decision Support System

Shan, S.; Yan, Q.

2017, XII, 70 p. 18 illus., 1 illus. in color., Softcover

ISBN: 978-981-10-3541-8
