Part I Introductory and Background Information

1 Parameters of Magnetic Fields and Their Differential	
Biological Effects	3
1.1 Introduction.....	3
1.1.1 Static Magnetic Field vs. Dynamic Magnetic Field	3
1.1.2 Different Magnetic Field Intensities: Weak, Moderate, High and Ultra-high Magnetic Field.....	5
1.1.3 Homogeneous vs. Inhomogeneous Magnetic Field.....	10
1.1.4 Exposure Time	15
1.1.5 Magnetic Poles and Different Field Directions	16
1.1.6 Factors Contributing to the Lack of Consistencies in Bioeffects Studies of Magnetic Fields	19
1.2 Conclusion	22
References	22
2 Static Magnetic Fields (SMFs) on Human Bodies	27
2.1 Introduction.....	27
2.2 Earth Magnetic Field	29
2.3 Magnetic Resonance Imaging.....	32
2.4 Magnetic Therapy Using SMFs	35
2.5 Magnetobiology and Biomagnetism.....	40
2.6 Conclusion	43
References	43

Part II Scientific Basis for Static Magnetic Field (SMF) Effects on Biological Systems, from Molecule, Cell to WHOLE Organism Level

3	Molecular Mechanisms for Electromagnetic Field Biosensing	51
3.1	Introduction	51
3.2	Magnetism, Basic Definitions	52
3.2.1	Ferromagnetism, Paramagnetism, and Diamagnetism	52
3.2.2	Field Types and Strengths	53
3.3	Overview of Magnetoreception in Various Organisms	55
3.3.1	Bacteria	55
3.3.2	Invertebrates	56
3.3.3	Vertebrates	58
3.4	Types of Biological Magnetoreceptors	60
3.4.1	Magnetite	61
3.4.2	Chemical Magnetosensing	62
3.4.3	Electromagnetic Induction	65
3.5	Mechanisms for SMF Effects on Human Biology	66
3.5.1	“Established” Biosensors/Magnetoreceptors	67
3.5.2	“Other” Human Biosensors	69
3.6	Concluding Comments	75
	References	75
4	Impact of Static Magnetic Fields (SMFs) on Cells	81
4.1	Introduction	81
4.2	Parameters That Influence the Cellular Effects of SMFs	83
4.2.1	Magnetic Field Intensity-Dependent Cellular Effects of SMFs	84
4.2.2	Cell Type-Dependent Cellular Effects of SMFs	85
4.2.3	Cell Density-Dependent Cellular Effects of SMFs	88
4.2.4	Cell Status Influences the Cellular Effects of SMFs	90
4.3	Cellular Effects of SMFs	93
4.3.1	Cell Orientation	93
4.3.2	Cell Proliferation/Growth	97
4.3.3	Microtubule and Cell Division	99
4.3.4	Actin	103
4.3.5	Cell Viability	104
4.3.6	Cell Attachment/Adhesion	106
4.3.7	Cell Morphology	107
4.3.8	Cell Migration	108
4.3.9	Cell Membrane	109
4.3.10	Cell Cycle	110
4.3.11	Chromosome and DNA	112

4.3.12 Intracellular Reactive Oxygen Species (ROS).....	113
4.3.13 Adenosine Triphosphate (ATP).....	115
4.3.14 Calcium.....	116
4.4 Conclusion	122
References	122
5 Impact of Static Magnetic Field (SMF) on Microorganisms, Plants and Animals	133
5.1 Introduction.....	133
5.2 SMF on Microorganisms	134
5.2.1 SMF on Cellular Growth and Viability.....	134
5.2.2 SMF on Morphological and Biochemical Modifications	135
5.2.3 SMF on Genotoxicity	136
5.2.4 SMF on Gene and Protein Expression.....	137
5.2.5 Magnetosome Formation Sensing Magnetic Field	138
5.2.6 Application of SMF on Antibiotic Resistance, Fermentation and Wastewater Treatment.....	139
5.3 SMF on Plants.....	140
5.3.1 SMF on Germination	140
5.3.2 SMF on Growth	142
5.3.3 SMF on Gravitropism	142
5.3.4 SMF on Photosynthesis	143
5.3.5 SMF on Redox Status	144
5.3.6 Cryptochromes Sensing Magnetic Field.....	144
5.4 SMF on Animals.....	145
5.4.1 SMF on <i>Caenorhabditis elegans</i>	145
5.4.2 SMF on Insects	146
5.4.3 SMF on <i>Helix pomatia</i>	148
5.4.4 SMF on Aquatic Animals	148
5.4.5 SMF on <i>Xenopus laevis</i>	149
5.4.6 SMF on Mice and Rats	152
5.4.7 Magnetic Sensing Protein in Animals	158
5.5 Conclusion and Perspectives	159
References	160

Part III Opportunities for Static Magnetic Field (SMF)-Based Therapies

6 Potential Applications of Static Magnetic Fields (SMFs) in Cancer Treatment	175
6.1 Introduction.....	175
6.2 SMF Effects on Cancer Cells.....	176
6.2.1 SMFs Could Inhibit Some Cancer Cell Growth While Have a Minimal Effect on Non-cancer Cells	176
6.2.2 SMFs Change EGFR Orientation and Inhibit Its Kinase Activity to Reduce Cancer Cell Proliferation	178
6.2.3 SMFs and Cell Division.....	182
6.2.4 SMFs and Tumor Microcirculation	184

6.3	SMFs in Combination with Other Treatments.....	185
6.3.1	SMFs in Combination with Chemodrugs	185
6.3.2	SMFs in Combination with Pulsed Magnetic Field (PMF)...	189
6.3.3	SMFs in Combination with Radiotherapy	192
6.4	Patient Studies.....	194
6.5	Conclusion	196
	References	196
7	Prospects, Pitfalls, and Opportunities for Human Static Magnetic Field (SMF) Therapy	201
7.1	Introduction.....	201
7.2	Overview of Electromagnetic Field (EMF) Treatment Modalities....	202
7.2.1	Low-Frequency Sine Waves.....	202
7.2.2	Pulsed Electromagnetic Fields (PEMF).....	203
7.2.3	Pulsed Radiofrequency Fields (PRF).....	203
7.2.4	Transcranial Magnetic/Electric Stimulation (TMS)	204
7.2.5	Static/Permanent Magnetic Fields (SMF)	204
7.2.6	“Non-therapeutic” EMF Exposure Allays Safety Concerns..	205
7.3	Biomedical Effects of SMF Therapies Categorized by Field Strength.....	205
7.3.1	“DIY” Treatments with Low to Moderate Strength SMFs Are Widespread but Unproven	205
7.3.2	Hypomagnetic Fields (HMF) – Evidence for Magnetotherapy by Default?.....	206
7.3.3	Stronger Magnetic Fields – Impacts on Human Health.....	208
7.4	Prospects for Three Therapeutic Areas.....	210
7.4.1	Pain Perception	211
7.4.2	Blood Flow/Vascularization.....	211
7.4.3	<i>In Vitro</i> Evidence for Treatment of Neurological Disease and Neural Regeneration	213
7.5	Pitfalls with SMF Clinical Studies and Acceptance of Magnetotherapy	214
7.5.1	Hyperbolic and Ambiguous Claims vs. Outright Rejection of Magnetotherapy.....	214
7.5.2	Parameters Necessary to Be Controlled in Magnetotherapy	215
7.5.3	The Placebo Effect.....	216
7.6	Concluding Comments	217
	References	217

Biological Effects of Static Magnetic Fields

Zhang, X.; Yarema, K.; Xu, A.

2017, XI, 220 p. 64 illus., 45 illus. in color., Hardcover

ISBN: 978-981-10-3577-7
